8:30 am - 9:15 am

Registration & Coffee

9:15 am - 9:20 am

Welcome & Opening Remarks

Delegates will start the first part of the morning with the in-house legal counsel attendees of the US-China Legal Summit.

9:25 am - 10:05 am

Keynote Address: Fin(Legal)Tech - Law's Future from Finance's Past

Since the global financial crisis, the legal industry has experienced significant changes. These changes have led many to question the future of the legal industry. The exploration of law's future typically involves the search for the appropriate analogy or use case to describe the current and/or future dynamics of the legal market. While no single analogy can quite characterize the matter, the history of finance (from Black-Scholes to algorithmic trading) offers important lessons for law. In this presentation, Professor Katz will explore fin(tech) and the lessons that financial technology might offer for the future of legal technology (and well as the overall legal industry).

Daniel Martin Katz, J.D., Ph.D., Associate Professor of Law, Illinois Tech - Chicago Kent Law

10:05 am - 10:50 am

Keynote Address: The Laws of The Land

Honourable Mr Justice Kevin Zervos SC was a veteran of frontline criminal prosecutions spanning two decades, with a reputation of being a formidable criminal courtroom advocate and human rights specialist. Now as a Judge of the High Court Judge Hong Kong, we are delighted to be joined by Mr Zervos as he invites us to hear his perspective on the differences in laws between jurisdictions and the issues that are arising in the globalisation of today's world.

10:50 am - 11:10 am

Honourable Mr Justice Kevin Zervos SC, High Court Judge Hong Kong
Coffee & networking

11:10 am - 12:00 pm

Panel Discussion: It's a New Age in Data Privacy - Safe Harbour

Data laws are changing and the Schrems judgment declared the "safe harbour" decision to be invalid. Companies and law firms complying with Safe Harbour will no longer automatically comply with EU data protection directives. We will explore the basis of the court's judgment, look at practical and legal implications, and discuss what steps can be taken to mitigate risks in the light of the judgment, and the impact on the manner and complexity of cross-border e-disclosure and global information governance. Come away with a checklist of questions to ask to help you understand whether your data is at risk.

***Moderator:** Chris Dale, Consultant, eDisclosure Project*

***Dmitri Hubbard**, Regional Vice President, Xerox*

***Xiaoyan Zhang**, Counsel, MayerBrown JSM*

12:05 pm - 1:00 pm

Panel Discussion: Managing Innovation and the Business; The Impact of IT Budget on Innovation

Legal services are transforming as the pressure to innovate continues. Driving innovation in your organisation is necessary to move forward into the new generation. What are clients asking for, and how can technology add real value? How are regional, market positioning and historical differences affecting innovation in law firms and legal departments? Let's explore innovations already in play; how other market participants, such as legal tech startups, accelerators and alternative business structures, are responding; and what you can do meet the challenges of innovating legal services. The success and future of the IT department depends heavily on the degree to which the CIO or IT department is ready to meet new challenges, take on difficult issues (including their own people) and make tough and far-reaching decisions. The new breed of CIO faces a changing landscape and must plan for what the IT department will look like in 5 years' time. Some companies and law firm IT departments are describing themselves as "IT companies". What is the impact and how is this being felt in Asia?

***Bob Charlton**, Head of Asia, Hong Kong Managing Partner, Berwin Leighton Paisner*

***Vivian Ng**, General Counsel, NetApp*

1:00 pm - 2:00 pm

Lunch & Networking

2:00 pm - 2:45 pm

Panel Discussion: Intersection to Interchange - The Crossroad of Technology, Data and the Regulatory Landscape

The pace of emerging technologies is increasing, as are the ways those technologies are being used in the business world and specifically in the legal industry. Business communications now reside in myriad electronic locations and on multiple devices, increasing the complexity of data privacy and eDisclosure concerns. The lawmakers try to match the speed of these developments but the regulatory framework lags behind. We will discuss the impact of emerging data issues and the regulatory lag on law firms and clients, and provide a framework for dealing with these issues that allows collaboration and communications to continue to flow unimpeded.

***Adi Elliott**, Vice President, Market Planning, EPIQ*

Sebastian Ko, Document Review Services Director, EPIQ
Conor Crowley, EDiscovery Counsel APAC, UBS AG

2:45 pm - 3:30 pm

Update: Artificial Intelligence - The Impact of AI and Real Business Applications in Legal

In the last year, there has been a resurgence of interest in artificial intelligence (AI) and its potential to disrupt and transform knowledge industries. Join us as we demystify machine learning to understand what it is and what it isn't, how your organization can benefit from the practical implications, how to decide if you should adopt AI in some manner and we will highlight examples of AI used in specific law firms.

Professor Daniel Martin Katz, J.D., Ph.D. Associate Professor of Law, Illinois Tech - Chicago Kent Law

Jane Livesey, Engagement Manager, Linklaters

Jonathan Wong, Senior Associate, Freshfields Bruckhaus Deringer

3:30 pm - 3:45 pm

Refreshment Break

Attendees of the Legaltech gathering coming together with the in-house legal delegation of the US-China Legal Summit for the closing keynote.

3:45 pm - 4:30 pm

Closing Address: Cybercrime and Cybersecurity - 2015 Review of Major Developments

To close the day the US-China delegation and Legaltech attendees will come together to appreciate an issue that is relevant to all members of an organisation; cyber-crime. Professor Reich will provide an overview of significant cross-border cases involving the Asia-Pacific Region and pending policy issues related to data privacy and data protection. This timely address will offer in-house counsel, IT Directors and key law firm leaders an understanding of how they can manage the developing issues the digital world presents us with and identify the red flags before it is too late.

Pauline C. Reich, J.D., Member of the Bar of the State of New Jersey; Professor and Director, Asia-Pacific Cyberlaw, Cybercrime and Internet Security Research Institute

4:30 pm - 6:00 pm

Cocktail Reception & Canapés
