

# World Leading Climate Control Solutions

## A complete range of world-class commercial climate control solutions

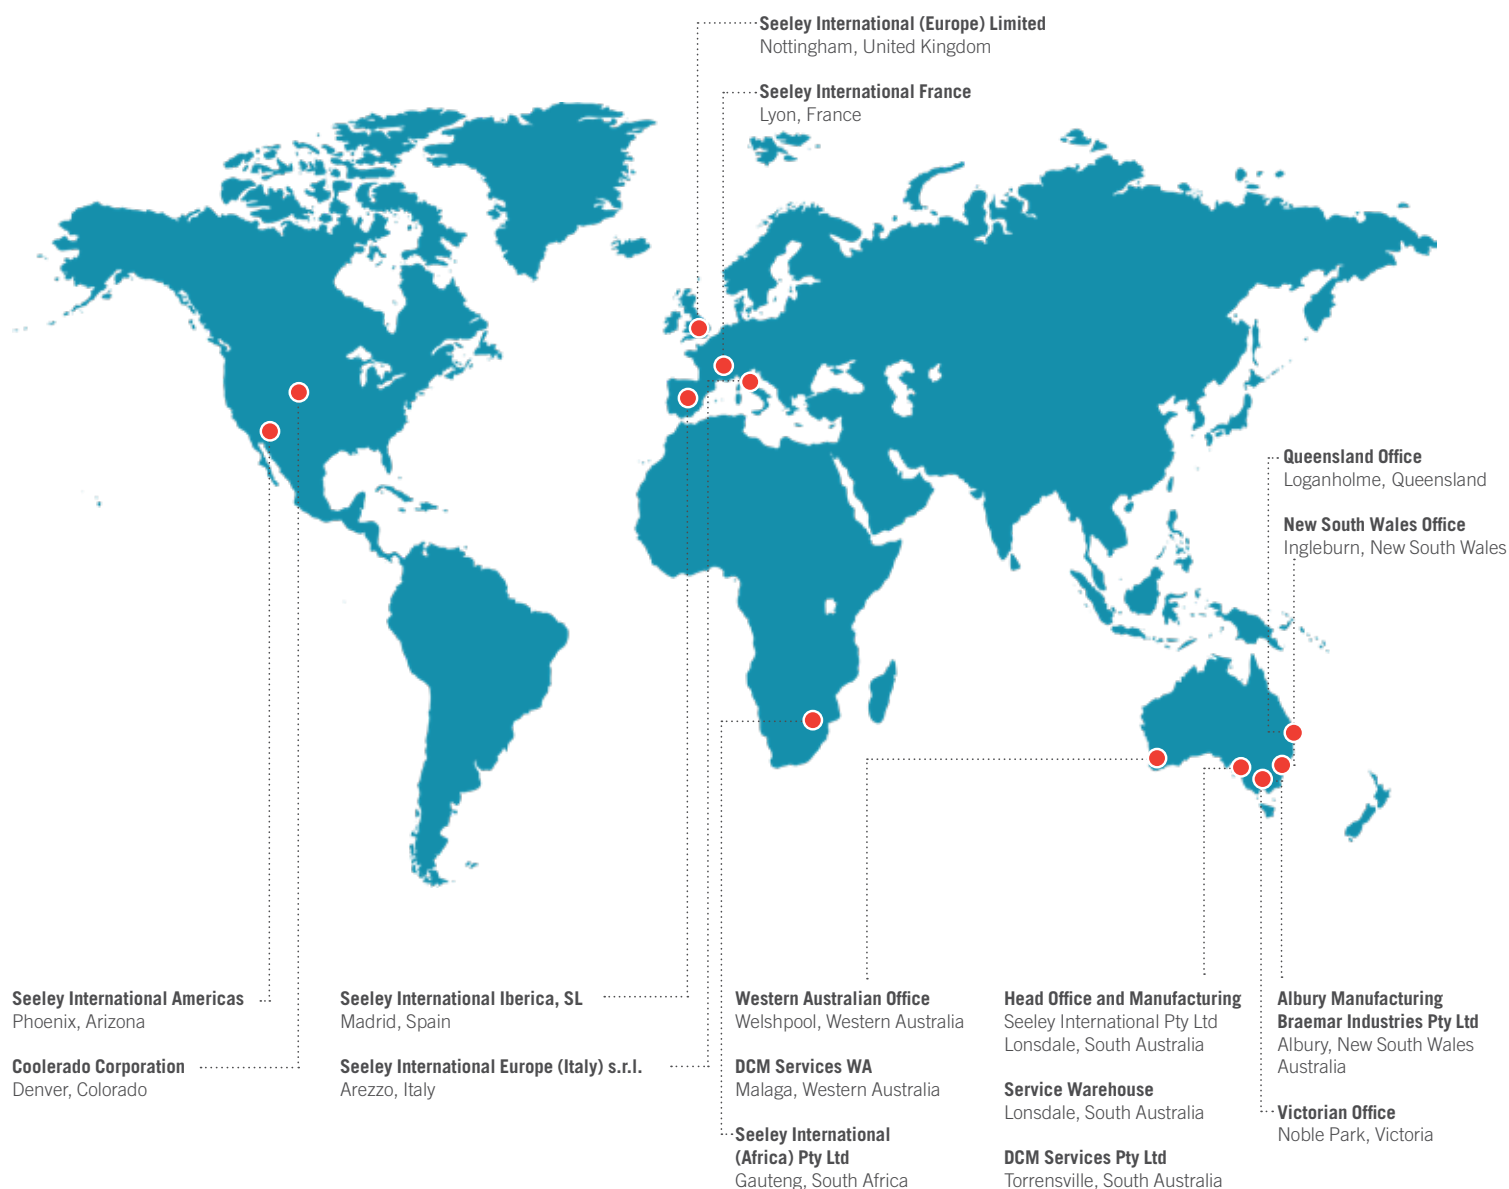

Seeley International is Australia's largest air conditioning and ducted gas heating manufacturer and a global leader in developing ingenious, energy efficient cooling and heating products. Its long track record demonstrates the expertise, infrastructure and resources to seamlessly deliver HVAC solutions around the world.

Founded in 1972, by Frank Seeley AM, Seeley International has experienced more than 45 years of success and grown to become a global leader in the HVAC manufacturing industry. More than 80,000 products and 1,500,000 components are manufactured in Australia every year.

### Global Presence

Seeley International has more than 300 independent dealerships and specialist retailers in Australia and an extensive network of distributors and retailers across Europe, Asia, Africa and the USA.

## Continual investment in R&D

Investing millions in research and development every year and employing more than 50 expert engineers working on revolutionary, “over-the-horizon” product innovations, the company continues to deliver extremely durable, reliable and innovative solutions that meet the customers’ every need.

Having world first products and processes, over 300 patents, the company is continually bringing world first innovative products to market.

## Next generation manufacturing capability

The company has no shortage of innovative ideas and advanced manufacturing improvements. Automated guided vehicles, state of-the-art robotic assembly machines and collaborative robots sharing workspaces with humans reflect the company’s vision and commitment to staying ahead of the curve, meeting future market demands and delivering a total sustainable HVAC solution to all customers. Seeley International has the capacity to supply on scale and meet the extraordinary demands that arise in a global landscape.

## Premium quality and durability

It’s no wonder Seeley International products represent the highest quality and durability that deliver an exceptional customer experience. In its state of the art R&D division, the company operates a world leading NATA Accredited Meridian Test Laboratory, thus ensuring all product performance claims meet or exceed every industry standard. The company also puts existing and new product designs through an extensive research and testing program to ensure the highest quality and durability.

## Climate Wizard Indirect Evaporative Air Conditioners

Generate 100% fresh, cool, outside air, at temperatures that rival refrigerated systems, with up to 80% lower energy costs\*.

Climate Wizard's unique indirect evaporative heat exchange core provides hyper-efficient cooling of outside air. Climate Wizard delivers the added benefits of:

- Reduced running costs by up to 80%\*
- No high electrical demand charges, even in hot weather
- Temperatures are similar to those produced by refrigerated systems
- No moisture added to the air\*\*
- Flexible design and engineering configurations
- Ideal for use as a DOAS (dedicated outdoor air system), data centre cooling or for comfort cooling applications
- Wiser use of water (R-718). No synthetic refrigerants or chemicals to harm the environment
- Features an Auto-Cleanse™ water management system to minimise water consumption and to maintain quality
- Simple, reliable solution to improve COP/EER (coefficient of performance/energy efficiency ratio)
- Australian designed and made with easy maintenance
- National service network with after sales support and easy access to spare parts.
- Connectivity - Schneider PLC

\* Compared to refrigerated systems performing the same duty

\*\* Climate Wizard Supercool (indirect/direct option) adds a small amount of moisture to the supply air for installations that require controlled humidity.

### The future of cooling: Climate Wizard CW6S

Climate Wizard CW6S uses Seeley International's latest innovation, a new Micro-Core™ technology for smaller or uniquely challenging applications. The concept of how it works remains unchanged, combined with equally effective cooling performance found in Climate Wizard's commercial models.

## AIRA Commercial and Industrial Evaporative Air Conditioners, Heaters and Hybrid Heating/Cooling Systems

All AIRA products are designed, manufactured, and tested at the Seeley International facility in Albury, NSW to ensure customers receive superior quality and performance.

With built to purpose and standard configurations, AIRA provides economical and energy-efficient solutions that are adaptable to suit a wide range of applications including:

- Evaporative coolers in a variety of sizes and capacities. Designed for large areas such as factories, warehouses, stadiums and clubs
- Heating, cooling and energy recovery units that can complement refrigerated systems or stand alone. Designed for factories, warehouses, sporting complexes, manufacturing facilities and specialised climate control requirements
- Gas heaters that can be coupled with cooling systems or used for stand alone heating. Includes indirect and direct fired gas heaters and infrared radiant tube heating. Designed for all commercial buildings, factories, warehouses, showrooms, door curtains and more.

## The Ultimate In Combined Safety, Reliability, Comfort and Energy-Efficiency

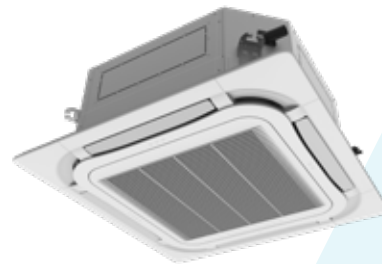

Founded in 1938 Braemar remains one of Australia's most recognised and trusted brand names today, which is testament to its quality, performance, reliability and aftersales support, serving many Commercial customers and installations over that time.

Braemar™ offers the full range of high performing and world leading heating and cooling solutions including fixed evaporative air conditioning (FEAC), ducted gas heating (DGH), refrigerated air conditioning including mini and large VRF products for commercial and industrial applications.

### The Braemar Reverse Cycle Range

Braemar offers the latest generation in VRF technology with a number of clever features that provide outstanding energy savings, excellent efficiency, airflow and performance in combination with smart management and reliable operation.

- Solutions ranging from Mini VRF up to large capacity heat pump and heat recovery VRF
- Wide range of control options with 12 indoor unit types
- Fast start due to outstanding energy – saving all DC inverter technology
- Flexible design options, including substantial pipe length and communication wire options
- CAN Bus communication technology allows for faster system response and reliable communication.

### Commercial & Industrial Evaporative Air Conditioners

Braemar's extensive range of evaporative air conditioning systems provide the perfect cooling solution.

Australia's number one choice, known for unmatched reliability, outstanding performance and cost effectiveness provides other added benefits such as:

- Vast product range for wide spread applications
- Low maintenance and running costs year after year
- Operating more than 40 years in the commercial and industrial sector
- The preferred choice for mechanical services, contractors, engineers, architects and specifiers
- Impressive cooling capacity through use of high-efficiency axial fan modules in conjunction with venturis and turning vanes
- Revolutionary Mini-Cell<sup>^</sup> Chillcel<sup>®</sup> Pad technology provides a dramatic improvement in cooling efficiency compared to other products on the market.

If you are looking for small, medium or large commercial cooling applications for open spaces including factories, schools, warehouses, hotels and other commercial projects, Seeley International's award-winning Braemar brand provides uncompromising cooling performance, reliability, safety and comfort, all with market leading energy-efficiency.
