

Managing your security workforce just got easier.

A guard tour system that uses GPS, sensors and automation to help you prove service, manage incidents and improve guard safety.

Real-Time Positioning and Live Maps

Continuous tracking of guards using GPS, NFC, QR Codes and Bluetooth Beacons.

Mobile Forms and Activity Reports

Capture security logs, incident reports and guard inspections via simple mobile forms.

Messages and Alerts

Group and individual messaging and alerts for improved team communication.

Duress and Notifications

Mobile duress and emergency communication and notifications.

Analytics Dashboard and Reports

Dashboards, automated daily activity reports and on-demand data exports.

Mobile Time & Attendance

Ensure guards are at the right location for their correct shift time.

A Mobile-First Guard Tour Solution

- Ensure your guards are on site and tours are completed on time.
- Receive daily activity reports delivered to your inbox when you want them.
- Provide mobile tools that improve the safety and productivity of guards.
- Improve customer satisfaction with automated reporting and alerts.
