

Enabling EDIE Through Dementia Design

The aim of this workshop is to provide you with a better understanding of dementia. EDIE (Educational Dementia Immersive Experience) uses virtual reality technology to demonstrate the impact of environment on a person living with dementia.

You will gain knowledge in:

- The perspective of someone living with dementia.
- The impact of environment on a person living with dementia.
- The principles of dementia design and how to apply them.

Suitable for:

All design professionals providing advice and environment changes to support people living with dementia.

Delivery:

Face to face (two or three hours)

Price:

Starting from \$1,650 per session for up to 15 participants.
