OUR STORY

For over 50 years, API Access & Security has been a leading name in the Australian security industry. Like many other industries, the security sector is changing. Technology is evolving faster to meet customers' growing Security needs. API draws on half-a-century of expertise to develop new technologies, add increasing value to our customers, and continue to evolve as an access and security leader for modern Australia.

Many facilities around Australia have relied on API to provide supply, installation, maintenance and round-the-clock support, including schools, hospitals, aged care facilities, banks, fast-food chains and councils. Whether it is keying systems, locks and hardware, life safety devices, CCTV, automatic doors, perimeter and barrier security systems, electronic locking systems or safes and vaults, API can package up a full access and security solution in one place.

With access to leading global brands, nationwide specialists and a 24-hour, 7-day-a-week backup service, API is an ideal partner to deliver a range of products and services to all sectors with leading technology and solutions to ensure the safety and security of people and property.

To start providing secure and safe access to your facility contact us today.

API Access & Security is an Allegion™ company.

- Transportation

QUESTIONS TO CONSIDER WHEN PLANNING SECURITY

What are the possible security threats to your premises? From theft, vandalism, confidentiality breaches, and personnel safety.

How will my facilities security protect people in the event of an emergency?

Who will manage the facilities security and does it need to be integrated with current systems?

Do I need a log of all access to my facility. From the entrance, to lift access, specific room access or car parks?

How will individual's personal belongings be stored and secured?

Are my security systems energy efficient and cost effective?

How will I secure and protect confidential files and documents?

Can my security be up upgraded and extended in the future?

Does my security provider provide post installation support?

Does my security provider have fully trained, insured, qualified and licensed technicians?
