

COMPANY
PROFILE

The background image shows a large-scale industrial operation, likely a quarry or aggregate processing plant. Multiple conveyor belt systems are visible, transporting material across the site. In the upper portion, there are large mounds of processed material. The lower portion shows a closer view of the conveyor infrastructure, including metal frames, rollers, and safety railings. The entire image has a dark teal overlay, and the text is positioned on the left side within a semi-transparent green box.

FOR COMPREHENSIVE
AND EFFICIENT
CONVEYOR SERVICES,
RELIABLE CONVEYOR BELT
LEADS THE WAY.

RELIABLE CONVEYOR
BELT IS AN INDEPENDENT,
AUSTRALIAN OWNED
COMPANY THAT SPECIALISES
IN PROVIDING COMPLETE
CONVEYOR SOLUTIONS.

Established in 1973, Reliable Conveyor Belt has an enviable reputation for excellence, and is regarded as an industry leader.

Offering wide-ranging mechanical and rubber capabilities, outstanding customer service is our hallmark.

Extensive service coverage is ensured through our network of certified branches located at Newcastle, Muswellbrook, Parkes, Lithgow, Mudgee and Gunnedah.

For over 40 years, our company has demonstrated an unwavering commitment to health and safety, and a cutting edge internal training program that boasts nationally accredited qualifications.

As a result, the members of our workforce are competent, safe, and at the top of their field.

INSPECTIONS AND AUDITS

In addition to the maintenance services we offer, Reliable Conveyor Belt also is able to utilise experience from its Head Office to assist with a range of specialised management services.

Design checks on existing conveyor systems to assist with performance and troubleshooting and solutions for problem situations.

Reliable uses “Belt Analyst” conveyor design software.

Services include tension calculations, counterweight and motor selections, transfer solutions including Discrete Element Modeling (DEM).

REPAIR AND REFURBISHMENT

Reliable offers a diverse range of conveyor pulleys manufactured and refurbished to the highest standards.

These high standards ensure product suitability, reliability and performance while reducing maintenance costs.

Products available include Drive/Head and high tension pulleys, Tail, GTU/LTU and snub pulleys, Spiral/Slatted and wing pulleys (self-cleaning), flat or crowned in both live shaft & dead shaft.

CONSULTATION AND DESIGN

Our staff have many years experience in the design of conveyor maintenance systems to meet a variety of needs and purpose. We can advise clients on the best solution for their particular application and improve existing designs.

As an independent company, we are also able to supply a full range of components ensuring the best outcome for the client at a price to meet the budget.

RAPID RESPONSE - 24/7

With offices in Newcastle, Mudgee, Muswellbrook, Gunnedah, Lithgow and Parkes - each backed by a fully equipped workshop and well trained staff - Reliable Conveyor Belt takes pride in being readily accessible to clients and in providing prompt, 24 hour, seven day service to all call-outs.

We understand the importance of conveyor systems to the viability of any operation and know that unscheduled down time is costly. All staff are "on call", enabling a rapid response to breakdown calls and minimising your lost production time.

CONVEYOR SERVICES

CONVEYOR PLUS+

Conveyor Plus+ is a system that utilises a combination of reliability centred maintenance (RCM) best practices and total conveyor maintenance management strategies.

Reliable has developed its Conveyor Plus+ system through its 40+ years of experience in providing preventative maintenance systems to the industry and knowing what works and what doesn't

Conveyor Plus+ can be briefly explained as a structured process to determine the conveyor maintenance strategies required for each asset to ensure that it continues to fulfil its intended functions in its present operating context – ie: meeting its reliability target by reducing conveyor downtime.

TOTAL CONVEYOR MANAGEMENT

Reliable Conveyor Belt has steadily expanded its service delivery platform and is able to offer customers a total management service for all conveyor belt systems. This includes consultation and design, engineering and installation and a comprehensive maintenance package designed around a careful analysis of your systems and the predicted service life of components for the operating regime under which the particular belt is installed.

Engaging Reliable Conveyor Belt as your conveyor maintenance management partner ensures that you experience minimal downtime from component failure in your conveying systems. With a planned schedule of maintenance work, Reliable is able to work with the customer to program downtime around production profiles.

Ultimately, the result is improved reliability and predictable costs, plus increased confidence in the capability of your materials handling systems. All work is fully guaranteed by Reliable.

CONVEYOR BELT CLEANING SYSTEMS

Reliable supply a full range of conveyor belt cleaners and associated components.

Our belt cleaners are compatible with vulcanised and mechanically fastened conveyors both above and below ground. The belt cleaners are manufactured from stainless steel and are interchangeable with other major brands.

THE RANGE OF PRODUCTS INCLUDES

- › Primary Belt Cleaners -
Polyurethane or tungsten tip.
- › Secondary Belt Cleaners -
Both single and bi-directional.
- › Spray Bars - For belt cleaning and dust suppression.
- › Water Control Manifolds -
To regulate water sprays.
- › Vee Ploughs - Remove refuse material from return side of belt.

CONVEYOR ROLLERS & TRACKERS

Reliable Conveyor Belt is a leading supplier of high quality engineered conveyor rollers, idlers and accessories.

The company brings together world class practice to deliver cost effective high speed quality balanced rollers and idlers suitable for today's heavy mining practices that include large tonnage and high speed conveyors. Reliable is the national distributor of the Vortex range.

CONVEYOR BELTING

Reliable supply a full range of conveyor belt including Steel Cord Ply (including Fire Resistant).

Reliable carries over 3,000mtrs of belt in stock including belt specs that will meet many of your needs.

WE CAN SUPPLY:

- Heat and oil resistant belting, filter belts, bucket elevator belting, sidewall cleated and chevron belting to name a few.
- Our "QuarryPlus" range of belting - specifically developed to meet the needs of quarrying and cement applications.
- Rubber insertion, skirting and chute lining.

CONVEYOR BELT SKIRTING SYSTEMS

Reliable offers a range of conveyor skirting systems for various conveyor applications. Our systems are modular, easy to install and maintain and offer extended service life via all our stainless construction.

CONVEYOR PULLEYS

Reliable offers a diverse range of conveyor pulleys precision manufactured to the highest standards. These high standards ensure product suitability, reliability and performance while reducing maintenance costs.

Products available include, drive/high tension pulleys, Tail, take-up and snub pulleys, spiral pulleys (self cleaning), wing pulleys (self cleaning), slatted pulleys and flat or crowned.

CONVEYOR BELT FASTENERS

As part of our customer service process we can provide the belt fasteners requested by our customers. Reliable has the experience and knowledge to independently recommend the most appropriate belt fasteners for each application.

CONVEYOR BELT HOT & COLD VULCANISING MATERIALS

Reliable can supply a full range of hot and cold vulcanising materials ranging from steel cord, ply belt, solid woven, splice kits, raw rubber materials and vulcanising cements.

ELEVATOR BUCKETS & ACCESSORIES

Reliable is a stocking distributor of Maxi-Lift Elevator Buckets and accessories. Reliable has access to over 700 different bucket sizes, shapes and materials designed to give clients longer life, better reliability and a lower total cost of ownership.

Reliable has dedicated staff experienced in troubleshooting many problems faced by clients with existing elevators, including upgrading capacity for new demands and verifying existing elevator setups.

A full-page background image with a dark teal overlay. It depicts a construction worker from behind, wearing a white hard hat, safety glasses, and a high-visibility vest with reflective stripes. The worker is walking away on a concrete path or bridge deck. To the left, there are rows of vertical wooden forms or scaffolding. In the distance, a construction crane is visible against a clear sky.

SAFETY IS
PARAMOUNT

ABSOLUTE PRIORITY IS GIVEN
TO SAFETY AND WE FOLLOW STRICT
PROCESSES TO ENSURE THAT OUR
EXCELLENT JOB SAFETY RECORD
REMAINS INTACT.

RELIABLE HAS A DEDICATED WHS&E TEAM OF SPECIALISTS

Their role includes regular assessment of work procedures and appropriate training of all staff in safe work practices.

All jobs undergo a Job Safety Analysis to identify any potential hazards and enable assigned staff to take the necessary precautions. Client sign-off on the Job Safety Analysis endorses the integrity of the procedure. As a result, the members of our workforce are competent, safe, and at the top of their field.

DRUG AND ALCOHOL POLICY

We are committed to providing a safe and healthy workplace for every employee and, as a result, have introduced a comprehensive Drug and Alcohol Program.

Encouragement, rehabilitation and assistance is offered to employees to seek help if they have a problem in meeting employment conditions of zero blood alcohol content and to be free from the influence of other drugs whilst at work.

QUALITY ASSURANCE

OUR QUALITY ACCREDITATION
IS YOUR GUARANTEE THAT
ALL WORK WILL BE COMPLETED
TO CURRENT INDUSTRY
BEST PRACTICE STANDARDS.

Quality
ISO 9001
 SAI GLOBAL

Reliable Conveyor Belt are extremely proud to hold AS/NZ ISO 9001:2008 quality assurance accreditation and has held QA endorsement since 1997.

This accreditation is only achieved after a stringent and independent assessment of all aspects of a company. As part of the approval process, we are subject to annual audits to ensure that all procedures and processes continue to meet the appropriate levels set by Standards Australia.
