

Specialist IN ORGANICS RECYCLING AND MANAGEMENT

From biosolids and liquid food to green waste, Loop Organics offers tailored, cost effective and sustainable organic waste reuse solutions.

Resource Recovery in the Circular Economy

Closing the loop between wastewater treatment products, food processors and primary producers, resulting in healthier soils that boost agricultural production.

We offer Integrated Management of organics including transport, processing, and land application via our agile team of technical staff and highly skilled operators.

Our Services include:

- Composting facility in the Hunter Valley
- Products for Mine rehabilitation
- Sustainable transport & soil injection of food wastes
- Biosolids dewatering, testing and classification
- Environmental site assessment and consulting
