## Food Processing Specific Products

OUR MISSION:

**Ensuring our customers don't run out of food processing consumables.**

### Rolling reserve stock system

We stock over 5000 skus, and also offer a rolling reserved stock system for our customers, so you don't run out of production critical consumables.

### Global Sourcing

We source from over 20 countries to mitigate supply chain risk and ensure we have the products you need, when you need them.

### You Rated us 4.8 / 5

We value our customers at Foodcare, and aim to always provide the best service possible. On average, our customers rank us 4.8 out of 5.

SCAN ME

We understand the need to have the right glove for your ingredients and tasks. Foodcare offers the largest range on the market, from nitrile to silverlined, both short and long cuff, and colour coded. To determine the right glove for you, scan through to our website to discover more.

Hygiene wear is vital to ensure your standards are maintained. Many food processors opt for colour-coded wear as it reminds staff in which area, or for which ingredients, it can be used. Find more ways you can use hygiene wear to enhance your hygiene standards by scanning the QR code.

Organising your site has multiple benefits, from increased efficiencies to improved hygiene levels. From customisable shadow boards to Eurobin covers, Foodcare offers a wide range of production consumables. Looking for a solution? Scan the QR code to explore our range today.

Visual recognition is the most effective way of preventing cross-contamination, a key concern for all food processors. Compromising on food safety is not an option, which is why Foodcare has such a wide range of colour-coded cleaning equipment available. Our range is not only extensive in product variety but also comes in up to 11 colours. Visit our range to find the right product for your needs.

SCAN ME

What protection measures do you have in place? Protection against injury and contamination is essential in food processing. From auto-retracting knives to metal-detectable earplugs, our product range will keep both your employees safe from harm, and your food free from contamination.
