

BUTLER TECHSENSE
Sensing the Future

OUR COMPANY

We have been involved with the supply of measurement instrumentation and datalogging solutions for 20 years. There's not much about a datalogging we don't know. Our technical personnel have a solid understanding of measurement applications and will typically offer our customers more than one solution for their project. We work closely with our customers to establish long term partnerships that ultimately serve our customers well.

MEASUREMENT INSTRUMENTATION & ENVIRONMENTAL MONITORING SYSTEMS FOR PHARMACEUTICAL AND FOOD INDUSTRIES

INSTRUMENTATION

Process and handheld meters for industrial & scientific applications from European manufacturers. Suberb quality and precision.

SENSORS

Sensors for the measurement of temperature, relative humidity, pressure, CO₂, O₂, light and particle count just to name a few.

IoT SOLUTIONS

New generation IoT solutions for environmental monitoring of laboratories, production plants warehouses and clean rooms.

WHAT WE DO

- Supply of Environmental Monitoring and Recording Systems
- Supply of Measurement Instrumentation
- Supply of Environmental Sensors and Probes
- Calibration and Mapping Service

OUR PRODUCTS

We stock and supply many of the worlds leading brands of data logging instruments. For your export shipments we recomend LogTag, tempmate and Verigo Pod dataloggers. Verigo have the added benefit of Bluetooth connectivity. Our partners Center Technology and Delta Ohm offer a wide range of handheld instruments and transmitters for measurements of environmental parameters. Grant Instruments and JRI manufacture high resolution dataloggers and IoT solutions for multiple site recording of temperatures, humidity and process outputs.

CALIBRATION

We provide traceable NATA calibration to ensure instruments operate accurately helping satisfy your quality and regulatory requirements. Talk to us about our on-site and return to base ISO 17025 calibration service for temperature, humidity and pressure instruments. This service is provided by one of our calibration partners. Contact us regarding your upcoming calibration requirements.

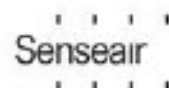

SERVICE

We support all instruments we supply during and beyond the manufacturer's warranty. All repairs or faulty instruments still in manufacturers warranty are processed rapidly. Spare parts and batteries are available on request. Contact us for service support.
