Company Profile

Food Processing Packaging and Materials Handling Equipment Provider.

Established 1995, Esko Australia Pty Ltd works with its major European Food Processing & Packaging systems equipment suppliers, to develop, promote & supply key quality solutions to their customers. Based on the motto "INNOVATIONS FOR SOLUTIONS", Esko offers solutions ranging from standalone machines through to turn-key End-to-End lines. This is complemented by a full service from initial concept to installation, selecting primary machine system suppliers that are world known & who are well experienced in each of their market applications.

The food industry faces a great challenge to create cost reductions and increase efficiencies without compromising on quality. ESKO is part of this movement in providing solutions to serve Food and Beverage Industry. New Value-Added food products are driving the innovations and challenging today's packaging era with ESKO assisting right from product development through to processing, product handling and packaging of the final product. With staff experience of over 50 years working with small and major food groups has provided Esko with the knowledge to help customers achieve a competitive product in today's challenging market. Through modernisation using some of the most innovative concepts, Esko strives to keep abreast to the Australian and New Zealand Food manufactures with these advancements.

What sets ESKO aside from others is the ability to provide customized and unique systems engineered to fit the ever-changing demands and needs of the food manufacturing Industry. Esko partners with customers to make their process more efficient, lower costs and innovate Food packaging in this highly competitive market. ESKO is therefore key to not only providing off the shelf technical solutions, but also customized solutions to improve production efficiencies with the objective to bring down the daily cost of manufacturing.
