

## SHRINK SLEEVES – Siamese Twin

Gravure printed two compartment shrink sleeves that can hold items of differing shapes and dimensions, such as a large container with small free offer etc.

- Prevents removal of smaller item .
- Easy to apply
- Available as individual sleeves or on reels for automated filling lines
- Shrinks equally without distortion.
- Available in PET or PVC
- Perforated tear lines can be applied
- Our standard single shrink sleeves are available printed or plain

## BOX Bags

Reduce double handling and packaging costs with the new BOX bag from Thriving Enterprises. Designed to provide a perfectly flat bottom for stable posture on shelf. Printable on all 5 panels. Cubes out to provide efficient space utilisation. High seal integrity allows it to hold liquids and can be filled on existing pouch filling equipment. Large opening allows for higher filling speeds to lower the cost of production. Produced in various laminate structures and available with zip closures, rounded corners, hang holes, handles or finger holes, pour spouts and one-way valves. 91

## EASY PEEL lidding film

- Seals to any plastic material. One film for all your trays!
- Double the gauge of other suppliers. Minimum gauge 70um
- Suitable for vacuum sealed trays with strong seal integrity.
- Sealing temp from as low as 100 °C
- Can be applied to microwavable containers.
- Can be supplied plain or printed.
- Available as die-cut lids or roll stock.
- Has a degree of inherent ant-fogging property.
- Easy -Peel can be incorporated into any laminate structure requiring a peelable release.
- Available in any slit width up to 1200mm.

## RETORT Pouches

Retortable pouches are a popular alternative to metal cans for shorter cook times, preservation of foods for a long life shelf, carry high quality Gravure printed graphics, reduce landfill waste and transportation costs.

Suitable for Ready-to-eat meals, Soups, Sauces and Pet Food. Microwavable or boil in bag – Our retort pouches use top quality laminate, have high strength seals, superior barriers.

- Available in, Stand-Up or Flat pouches.
- Withstand temps as high as 135°C for 15 min
- Clear or Foil high barrier laminates.
- Printed or Plain.
- 9Rounded corners & tear notches.

## Spouted Pouches

Spouted pouches can be plain or fully printed in either Stand-up, Flat, Side Gusset or 3 Side Sealed (Flat) pouches to a structure that suits your product requirements. Lids are a Tamper Evident type and come in a variety of colours. A range of spout diameters from 5mm to 35mm are offered, which can be fitted to the top corner or top center of a pouch. Filling can be through pouch top opening (T.E. Lids fitted) or through the spout (T.E. lids supplied separately). Retortable spouted pouches are available that can withstand a temperature of up to 135 °C.

# Coffee Bags

## Coffee bags with one-way valves

Coffee should always be packed in a controlled environment e.g. Side Gusset – 'Doy' Stand bags, formed from laminated structures that could include Aluminium Foil or alternative barriers designed to retain freshness. Fresh coffee will emit CO<sub>2</sub> gas, which can distort or potentially burst coffee bags. We address this problem by installing a one-way valve to vent CO<sub>2</sub>.

We custom print and produce bags to order, this along with offering a variety of stock bag sizes in plain (Silver) or printed (1 colour e.g. Black, Matt Black and Gold).

Sizes: 250g-500g-1kg and 3kgs. Please visit our web site at [www.Thriving.com.au](http://www.Thriving.com.au)

# Laminated Film

## Laminated Rewind

Our gravure printed rewind will present your product at its best.

We supply a wide variety of structures to optimise performance in any packaging situation.

Structures incorporating:- PET / NYLON / BOPP / LDPE / LLDPE / Foil etc.

- Metallised films
- Transparent high barrier films
- Low temperature high-speed sealing films /
- Easy Peel lidding film
- Pearlsided film
- Special purpose cotton papers
- Textured papers
- Anti-static film
- Conductive film (Electronic Industry)
- PTP film (Medical Products)

We can laminate specific combinations of substrates. A structure designed to suit your production application.

## Flat Bottom Side Gusset Bags

Flat bottom bags are the next generation. Available in any combination of laminates, this generation is now air tight and in combination with barrier films bags provide extended shelf-life even with the addition of viewing window. Flat Bottom bags have a flat stable base, fully printable providing superb shelf presence.
