

Think ahead.

Tork Washstation System

Reduce risk, increase efficiency with Tork Washstation System

**Durable water resistant
dispenser for easy wipe
or spray down**

**High capacity
dispensing with
250m recycled refills**

**Food Zone Primary
certified blue roll**

You face some of the toughest challenges.

That's why you need dispensers you can rely on. Purpose built for food manufacturing and wet environments, the new Tork Washstation System is engineered to help mitigate risks and maximise operational efficiencies.

Tork Washstation System

Gasketed push button to open

Keyless lock mechanism prevents water entry

Durable plastic casing

Easy to clean and will withstand impacts and won't shatter if broken

Water guiding channels

Route water away from potential entry points

Pressure washer tested

Tested to perform with water to 60°C at 1800 PSI

Back plate or direct screw-in

Limits openings and allows for easy mounting and removal

Stub roll feature

Allows additional capacity and full roll usage

Corrosion resistant parts

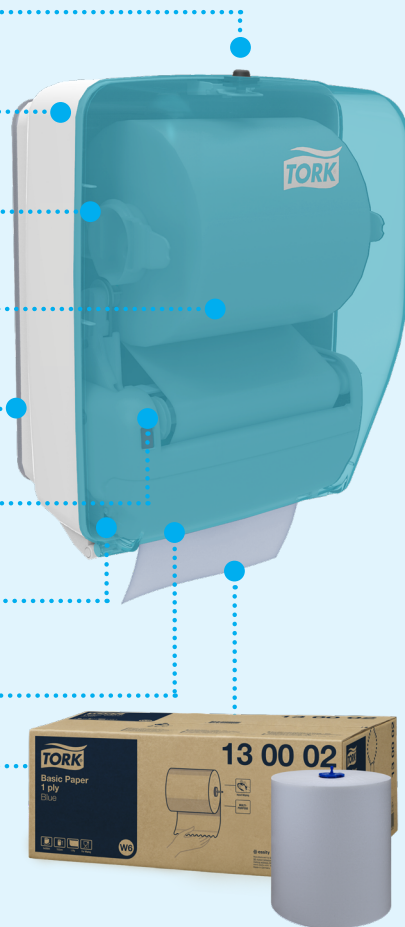

Stainless steel won't rust in humid environments

Thoughtfully designed opening

Stops water from wicking and allows for draining or drying

Hands-free dispensing

Touch only what you take

Improve hygiene

- Durable water-resistant dispenser design keeps refills safe and hygienic
- Smooth, durable plastic casing is easy to maintain and keep clean
- HACCP certified food contact system ensures safe for direct food contact
- Blue paper offers traceability in food materials, improving safety of production
- Hygienic hands-free dispensing – only touch what you take

Maximise efficiency

- Reduce waste and save labour and time with a water-resistant dispenser that protects refills
- No need for removal or cover up during spray-downs
- High-capacity 250m blue refills with stub roll function for fewer run outs and refilling
- Strong, highly absorbent paper stands up to high humidity for efficient wiping
