Automatically measuring, feeding, filling and bag forming, date code printing, bag sealing and cutting.

Metal Detector

Suitable for drugs, health products, dried food and food. Machine can be coupled with smart rejector or stop the belt function.

Our commitment to Service

Our commitment to service is to produce highest quality machines at reasonable cost that can cater to your business needs. At the same time, our customers can save cost and time in manufacturing.

As consumers are becoming more sophisticated and educated, our R&D team aims to help our customers to reduce wastage in the manufacturing process. This way our customers can be socially responsible and also have lower wastage to reduce overall costs in manufacturing.

Our sales team and engineering team have a minimum of 15 years of experience in this industry. They can offer practical solutions to help streamline your manufacturing process.
