

THE ULTIMATE SOLUTION FOR RETICULATION OF METRIC TUBE AND IMPERIAL PIPE SYSTEMS.

TigerCrimp 304 and 316L Stainless Steel system provides quality assurance while effortlessly maintaining an excellent visual installation.

TigerCrimp Imperial Fittings are designed to suit schedule 5 and schedule 10 Stainless Steel Pipe.

O-RINGS AND GRIP RING

Each TigerCrimp Fitting comes with a high quality o-ring and a Stainless Steel grip ring; creating a Dual Ring Press joint. The type of o-ring supplied is determined by the application.

Common commercially available o-rings can not be used as an alternative.

PRESSING TOOL FEATURES

- Compact and lightweight
- Quick pressing cycle
- Fast battery charging time
- Rotatable head
- Automatic piston return
- Interchangeable Jaws and Pressing Collars
- High quality durable motor

TIGERCRIMP PRODUCT RANGE BENEFITS

- No Consumables
- Up to 60% labour reduction (in comparison to conventional welding)
- Environmentally and OH&S friendly
- No hot work permits, and no welding consumables required
- Vast temperature range
- High Quality Elastomer O ring and Stainless Steel Grip Ring creating a Dual Ring Press Joint
- Long service life with no maintenance
- Press Indicators that show to completion of Press Cycle

DYNAMIC

BluePE

COMPRESSED AIR AND FLUID APPLICATIONS

Dynamic BluePE provides an exceptional piping system for compressed air and high pressure fluid applications, incorporating the advantages of polyethylene piping with 3 quality fitting ranges. Dynamic BluePE provides the Australian Industry with design flexibility, rapid installation, large safety factors and longevity.

Dynamic BluePE is made with the high grade of Polyethylene within a stringent ISO9002 Quality System. Identification of the piping is simplified by the blue colour and meets the marking requirements in the Australian Standards. Manufactured in Australia, Dynamic BluePE conforms to Australian Standards AS4130 and AS4131.

Dynamic BluePE can be used in high pressure fluid systems with the pipe having a PN25 pressure rating and a WaterMark Certification.

Fast and Easy Installation

Quick to Alter or Adapt to other Pipe Systems

Quality 50 Year Guarantee

Robust

Corrosion Free

Extensive Pipe and Fitting Range

Smooth Bore Pipe Minimises Pressure Loss

Under Pressure Pipe Fitting Connections

INSTALLATION TOOLS ELECTRO FUSION WELDER

20 - 110mm
Incredibly light & compact

INSTALLATION TOOLS SOCKET FUSION WELDING MACHINE

Bench Machine 20 - 90mm
Hand Machine 20 - 63mm

CONSTRUCTION OF COMPRESSED AIR DISTRIBUTION SYSTEMS

The WolfGrip system was designed and created specifically for constructing compressed air distribution systems. Constant development, expansion and changes to production layouts in factories and the evolution of production technologies, especially towards automation, calls for compressed air distribution systems that are appropriately sized and easily modified.

HR-POLYMER

16mm - 63mm

ALUMINIUM

20mm - 80mm

ALUMINIUM

110mm

ALUMINIUM

168mm

Clean Air
No corrosion

Light weight product

Quick and easy to install and / or add

Ultra smooth pipe bore, reduces frictional loss

Coloured Blue
No I.D. painting required

Maximum working pressure of 16 Bar*
