EXECUTIVE SUMMARY

Energus is Australia's leading commercial solar solutions provider.

With over 70 years of combined industry experience, Energus' team of technologists and engineers have deep expertise in areas ranging from technology and module development to system design and installation.

As a CEC approved retailer, Energus is committed to providing leading-edge technologies, while adhering to the strictest installation standards.

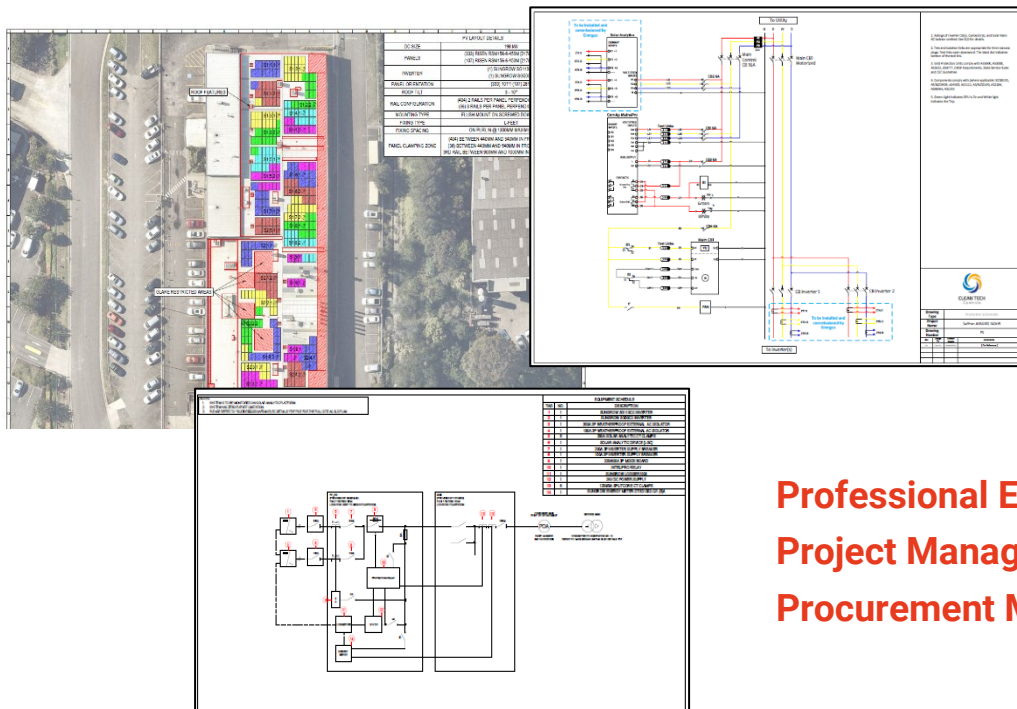

Energus' impressive project track record is only matched by its excellent customer service. Energus empowers customers with complete transparency during all stages of the project lifecycle, while delivering systems on time and within budget.

ACHIEVEMENTS

- 2,740kW commercial rooftop systems for NSW schools
- 1,636kW commercial rooftop systems, Sydney Olympic Park, NSW
- 356kW commercial rooftop system, CSR Bradford, Ingleburn, NSW
- 371kW numerous commercial rooftop systems, BOC & ELGAS (Linde Corporation)
- 348kW commercial rooftop systems, Royans Group
- 297kW commercial rooftop systems, Logos Villawood Logistics Estate, Villawood NSW
- 235kW commercial rooftop system, eArc (lightweight panel), Darling Harbour, Sydney, NSW
- 223kW commercial rooftop system, NSW Police Stations
- 200kW commercial rooftop system, Charter Hall, Chullora NSW
- 198kW commercial rooftop system, Bankstown Airport, NSW
- 192kW commercial rooftop system, Dangrove Art Storage, Alexandria, NSW
- 166kW commercial rooftop system, CSU Orange, NSW
- 161kW commercial rooftop system, North Shore Health Hub, St Leonards NSW
- 158kW commercial rooftop system, Arundel, QLD
- 156kW commercial rooftop system, Tridon, Silverwater, NSW
- 100kW ground mount system, Coonamble Feed Lot, Coonamble, NSW

**Professional Engineers,
Project Managers and
Procurement Managers**

PROFESSIONAL QUALIFICATIONS

- Clean Energy Approved Retailer
- Clean Energy Council – Member
 - All subcontractors CEC accredited
- Master Electricians of Australia – Member
- New Energy Tech Approved Seller
- WHS Management Systems - AS4801
 - Global Mark certified compliant

INSURANCES

Energus is fully insured for all aspects of its work, including:

- General and Product Liability
- Public Liability
- Workers' Compensation
- Professional indemnity

Details provided on request.

WHY ENERGUS

- ✓ Skytrust
- ✓ Site Specific Safety Management Plans for System Over 30kW
- ✓ 3rd Party Safety Auditing and Certifications
- ✓ Staff Training and Stringent Subcontractor On-Boarding Process
- ✓ Auditing
- ✓ Testing and Commissioning Plans
- ✓ Inspection Testing Planning sheets
- ✓ Handover Documents

Energus were always attentive to my needs and offered the best value for money of any of the providers they were competing with. 5 star company. I couldn't recommend them highly enough. A+++

Daniel Lezcano

WE'VE INSTALLED SOLAR FOR

Long Term Reliable Solar Systems

Long term reliable systems that deliver long term savings for customers.

Dedicated Team

Our systems have their own dedicated team of project and procurement managers, and engineers.

Due Diligent Quotes

Quote = Actual cost.
We've already checked with our engineers to mitigate any potential issues.

OUR LEADERSHIP TEAM

Jenny Lu

GENERAL MANAGER

Jenny has over 10 years of experience in the Solar PV industry. She specialises in managing and undertaking large scale projects and business development. Jenny is responsible for the overall project delivery.

Dr. Shi

SENIOR ADVISOR

With a career spanning more than 30 years as a leading solar scientist and entrepreneur, Dr. Shi is the inventor of 18 patents in photovoltaic technologies, and has published and/or presented more than 50 articles and papers in PV-related scientific magazines and at conferences. He has personally lead development and commercialization of many technologies in his career. He is the senior advisor for this project.

Anthony Li

HEAD ENGINEER

Anthony began working in the commercial and industrial solar industry in 2014. Having been the lead engineer in over 4MW of projects, Anthony is fully involved in any projects lifecycle and is able to provide insight into all aspects of a systems technical complexities.

Akash Shah

HEAD PROJECT MANAGER

Akash has a combined experience of 8 years working in various roles within the solar industry. He has project management experience of managing several MW projects for high profile clients across the country. He excels in giving special attention to detail to deliver a very safe and quality solar solution to our clients. He is exceptional at ensuring flow of communication between all stakeholders involved within the project, thus giving customer service a top priority.
