

Beyond Passwordless Access

Why we built Peig.

Our mission is to protect yours.

We built Peig to make sure organizations can leave security headaches behind. To achieve this, we tackled fundamental vulnerabilities like passwords and cookies. In doing so, we made Peig to be ready to take on threats of today and tomorrow.

Peig: Passwordless Access Platform

Revolutionary SaaS platform for enterprise Identity & Access Management.

Built on unique innovations, Peig ensures bullet-proof security and a truly frictionless workspace experience.

**With Peig, passwords are gone for good!
And so are OTPs and any other additional authenticators.**

Phishing, social engineering, and MitM don't ever stand a chance.

No matter how modern and cool your company is
and how smart the tech you use is...

The company is only as strong as its cybersecurity game.
