

CORPORATE IDENTITY DESIGN

DESIGN CONCEPT.

The "a" means passion and dynamism of newly growing Asian Food Service. It was developed based on a powerful leap forward. Small letter "a" can give a more friendly and gentle image to people. The typography which is modern and formative contains philosophy to provide trendy services to customers and keep pace with their partners.

- It means the transparency of corporate operations and reliability with partners.
- It means foods, taste and pleasure. The rectangle on the CI means packaged products.
