If you recognise any of the following issues, there is a good chance you need TaskEzy:

01   Spending hours each week on resourcing and administration

Problem

You're spending increasing amounts of time each week matching skills and accreditations with requirements and scheduling workforce resources.

Solution

Workforce management software will help to significantly reduce the time spent by streamlining processes. TaskEzy engages your clients to ensure their requirements are fulfilled; and engages your workforce resources to confirm availability and relevant accreditations.

02   Overwhelming client and regulatory compliance obligations

Problem

As a service industry you are often penalised for any failure to meet regulatory and compliance obligations. More and more time is spent documenting, updating and recording the accreditations of your workforce resources.

Solution

Workforce management software offers automated accreditation checking to ensure regulatory compliance. TaskEzy provides both standard and user created reports allowing you to ensure compliance. Easily maintain records such as sign on/off registers and incident reports.

03   Accurate record keeping and reporting

Problem

High volumes of manual data entry are both time consuming and difficult. Any error in maintaining time sheet records, incident registers, costing analysis, asset and equipment records cause business disruptions and potential penalties. Without flexible and easy to use software tools to meet your requirements, you are exposed to potentially increased human error.

Solution

Workforce management software tracks sign on/off entries in real time to ensure costing accuracy and analysis of resource productivity. For example, TaskEzy allows you to easily convert time records from a mobile device into an invoice.

04   Accurate profiles and performance

Problem

As your network of clients and suppliers grow, the number of your workforce resources increase. With high volumes of workforce turnover, maintaining profile records and analysing performance is almost impossible.

Solution

TaskEzy workforce management software will easily upload and maintain profile details for your workforce resources, verify accreditations, set criteria to analyse performance and match skill sets to allocate shifts. TaskEzy allows you to analyse individual performance, business productivity, revenue and costs.

05   Administrative overheads have increased and impact profitability

Problem

As your business grows, the administrative burden increases. Finding and training office staff becomes a challenge and the cost of administration negatively impacts business profitability.

Solution

Any workforce management software that is comprehensive, easy to implement, intuitive to use and addresses your needs must deliver significant cost benefits that exceed the investment made by you. The investment you make in TaskEzy delivers incomparable overall benefits.
