

***Benang Information***

***AOG Energy Exhibition 2024***

Benang Energy Infrastructure Pty Ltd, commonly known as Benang, is a Western Australia-based, Aboriginal-owned and operated business specializing in multi-utility infrastructure projects. Our services cater to various sectors, including water, power, gas, and mining and resources. We are committed to delivering high-quality projects while maintaining the highest standards of safety, environmental care, and community engagement.

Over the past three years, Benang has experienced significant revenue growth, reaching \$6.1 million, showcasing our ability to deliver successful projects and maintain strong relationships with our clients. We have achieved this also thanks to our innovative services and progressive strategies in key projects that include the Brand Highway Culvert & Drainage Works, Grass Valley Rail Culvert Extension, ATCO Maintenance and Project Services, and the NBN Network Rollout. This growth can be attributed to our commitment to quality, safety, and environmental responsibility, as well as our diverse range of services and our ability to adapt to the evolving needs of our clients.

Benang continually seeks to innovate in our services, products, and approaches to strengthen our market presence and diversify our offerings to customers. For instance, we have expanded our services to include renewable power systems, reflecting our commitment to sustainable energy solutions. We have also introduced wet-hire services, providing clients with access to our extensive fleet of modern and well-maintained plant and equipment, along with our highly skilled operators.

Benang is a Pinnacle Awards 2023 Aboriginal and Torres Strait Islander Business Excellence Award winner, demonstrating the company's outstanding achievements and commitment to excellence in its field. Additionally, Benang was a finalist in several prestigious awards in 2023, including the RISE Business Awards, Telstra Business Awards, and Women in Business Excellence Awards. These recognitions are a testament to Benang's dedication to industry leadership, innovation, and its impactful contributions to the business community.

Our commitment to innovation is also evident in our marketing and communications efforts. We have made significant investments in our online presence, allowing us to engage more effectively with our customers and the wider community. We also regularly publish 'Benang News', our company newsletter, which provides updates on our projects and insights into our industry.

Benang is dedicated to growing our client base, networks, and linkages with relevant industry bodies. Our Apprenticeship Program, launched in June, provides young people in the community with the opportunity to learn valuable skills and gain practical experience in the infrastructure construction and maintenance industry. This program not only invests in the future workforce of Western Australia but also strengthens our relationships with local communities and industry partners.

We also support the Aboriginal community through various initiatives and programs, promoting diversity and inclusion as an integral part of our community engagement. Our commitment to community engagement and local content has resulted in well above 20% Aboriginal Engagement and above 15% local spend content in our projects.

At Benang, we are committed to delivering projects of the highest standards, ensuring quality, safety, and environmental responsibility. As a testament to our dedication, we have obtained certifications in Quality Management (ISO 9001), Workplace Health and Safety (ISO 45001), and Environmental Management (ISO 14001). These certifications reinforce our commitment to international standards and serve as evidence of the high standards we set for ourselves and

our work. They provide our clients with the confidence that they are partnering with a responsible and reliable organization.

Our initiatives have positively impacted our organization and its stakeholders. Our Apprenticeship Program and support for the Aboriginal community have not only created employment opportunities but also fostered strong relationships with local communities and industry partners. Our commitment to environmental sustainability and our efforts to minimize our environmental footprint have also contributed to a more sustainable future for our stakeholders.

Benang demonstrates business leadership for the industry through our diverse range of services, our commitment to innovation, and our focus on community engagement and local content. Our ability to adapt to the evolving needs of our clients, our dedication to sustainable practices, and our investment in the future workforce of Western Australia showcase our leadership in the infrastructure construction and maintenance industry.

In conclusion, Benang is proud to be a leading Aboriginal business in infrastructure services in Australia, championing diversity and inclusion. We are committed to delivering high-quality projects while maintaining the highest standards of safety, environmental care, and community engagement. Our sustained revenue growth, innovation in services, products, and approaches, and our progressive strategy for growing our client base, networks, and linkages demonstrate our leadership excellence in the industry. We are excited about the future and are committed to making a positive impact on our organization, our stakeholders, and the industry in which we operate.
