Aboriginal
Owned and
Operated

www.yirayarkiny.com.au

Keeping your digital assets safely protected.

Delivering top-tier cyber security solutions, we transform organisational performance and productivity. To safeguard your business in hostile, competitive environments, we offer:

- GRC consultancy services
- Tailored Digital Security
- Operational Technology Security
- Software licensing service

**Our expertise is built upon
4 Key Pillars:**

- 1. Attack Prevention**
- 2. Attack Detection**
- 3. Incident Response**
- 4. Recovery & Mitigation**

Established in 2019, Yira Yarkiny Group is a 100% Aboriginal-owned and operated business. One of our key aims is to empower our workforce through education and employment, with a particular focus on building the economic resilience of the Aboriginal community.

Our Key Services.

Strategy and Consulting

Our multi-disciplined cyber experts will plan, implement and optimise your cyber security, providing actionable insights to accelerate your growth and profitability.

IT and OT Security

Seamlessly creating synergy between IT and OT needs will greatly increase productivity, performance, and profitability. We're experts at enhancing IT connectivity to help digitally transform your Operational Technology too.

Governance, Risk and Compliance

Our expert guidance helps manage risk, enhance operational control, increase profitability, and ensure regulatory compliance. We provide impact assessments, continuity planning, recovery planning, third party risk assessment, and more.

Security Integration and Engineering

We build cyber resilience into your infrastructure, including network security, communications, cloud, collaboration, and mobility solutions. Focussing on the early solution lifecycle, our approach to cyber-architecture creates highly secure solutions.

Managed Security Services

Our cyber security expertise enhances and protects your organisation's digital infrastructure, achieving tangible business outcomes. With specialists on-call 24/7, we anticipate and identify threats, providing real-time alerts.

Identity & Access Management

With our effective digital identity management, we help you to control costs, and importantly, maintain appropriate system access to your most critical information and resources.

Network & Infrastructure Solutions

We seamlessly design, integrate, engineer and deploy the full suite of digital assets to enhance your business resilience. We deliver fast and efficient technology capabilities to match your organisation's exact requirements.

Cloud Security

Providing actionable business and data insights, we can design, build and manage secure cloud and data solutions, helping you stay ahead of the shift towards automation, scalability, and security.

Client Cyber Culture

With our industry-leading training and education programs, tailored to your needs, we can upskill your team's cyber security understandings, developing skills and improving in-house cyber capability across your entire organisation.

We work with market-leading products and alliance partners to provide a best-in-class service.
