OFFSHORE

GO
OFFSHORE

A dramatic photograph of an offshore oil rig at sunset. The rig's structure is visible on the left, with a bright sun low on the horizon creating a golden glow. The sky is filled with colorful, wispy clouds in shades of orange, yellow, and blue. The ocean surface is dark with small waves reflecting the light. A semi-transparent white circle is positioned behind the text on the right side of the image.

GO OFFSHORE

GO OFFSHORE has a dynamic team of local, experienced industry experts who specialise in providing marine logistics solutions for the upstream oil and gas sector.

GO OFFSHORE will specifically tailor our service delivery to suit your needs, from providing the best people, finding the right marine asset for your project, or creating simple efficiencies through combined logistics solutions to help improve your bottom line.

GO OFFSHORE is industry accredited and maintains compliance to the relevant international standards for Quality, ISO 9001:2015; Environmental, ISO 14001:2015; and Occupational Health & Safety, OHSAS 18001:2007 and AS4801:2001.

**WE ARE LOCAL,
WE KNOW THE INDUSTRY,
WE HAVE THE EXPERIENCE AND
WE WILL DELIVER.**

THAT IS OUR PROMISE.

HSE COMMITMENT

Safety has become the official language of the Offshore Industry, and we are committed to continually improving our fluency.

GO OFFSHORE endorses the fundamental role that safety plays in everything we do offshore. It is a credit to the Offshore Industry as a whole that safety has evolved so successfully to pervade our culture.

But where to from here? Where will the next risk strategy and mitigation tools appear from? How will we forecast and then manage the next quantum leap?

GO OFFSHORE knows that the missing link between safety systems and safety performance is to successfully instilling cognitive safety in the minds of every person at the coalface. Safety genius, Just Culture and personal safety ownership must all exist at the front end. Our Safety Management is committed to infusing creativity, strategy and initiative to continually move safety forward.

CHARTERING

The GO OFFSHORE chartering team will work to understand your unique needs and then select and secure the right asset for your every offshore requirement. We offer flexible chartering arrangements, including time charter or bareboat charter, and will always provide the most cost effective and efficient solution.

We have a vast local and global network, with partnerships that include vessel owners and brokerage firms, so that we can offer you a wide range of vessel options such as:

- Offshore supply (OSV)
- Platform supply (PSV)
- Anchor handling (AHT/AHTS)
- Multipurpose subsea support (diving, IMR and construction)
- Seismic (SRV)
- Lift boats and barges
- Crew transfer (CTV)

GO OFFSHORE can support you through the entire oil and gas project life cycle, from exploration to decommissioning phase. We can even meet your non-oil and gas related chartering requirements.

GO OFFSHORE understands that the safety and performance of the asset is the highest priority. If the vessel has not already been integrated into the GO OFFSHORE managed fleet, our experienced technical and operational team will conduct a comprehensive inspection and suitability survey to ensure the asset will adequately meet not just your requirements but those of the end client. With over 360 successful charter parties completed to date, and over 90 individual assets operated under our management system, GO OFFSHORE is the right solution to all of your chartering needs.

CREWING

GO OFFSHORE is a MLC 2006 Certified provider of local and international marine and drilling personnel for the oil and gas sector. We recruit, employ and manage, on behalf of our clients, qualified maritime crew for a wide range of vessel types, including AHTS, PSVs, ASVs, DSVs, drilling, construction, accommodation and seismic vessels.

Managing every aspect of the employment cycle is our dedicated team of specialists who have amassed more than 100 years of combined in-depth industry knowhow working in the upstream maritime industry.

Our staff have become experts in their fields and extremely knowledgeable about the level of experience, required competencies and qualifications each offshore position requires.

Our team will always take the time to understand your culture before choosing the best methods and the right people for the job. Our comprehensive range of services allows us to tailor a manpower package that will not only meet your requirements but exceed your expectations.

Our collaborative and responsive attitude will always provide you with a personal and professional service and give you peace of mind that the crew onboard your vessels are well managed and taken care of 24/7, 365 days of the year. Our services include:

- Recruitment and selection
- Reference checks

- In house training and courses tailored to suit client needs
- Managing grievances, discipline and terminations
- Comprehensive reporting to suit client requirements
- On the ground logistics support
- Attendance at crew changes

GO BEYOND THE EXPECTED

LOCAL CONTENT & LOGISTICS SUPPORT

GO OFFSHORE offers a diverse range of services and tailored support specialising in planning and executing complete solutions for companies that intend to operate in Australia without actually having a local support structure on the ground.

In-house we have experienced operators, accredited systems and robust communication processes necessary to meet all of your operational needs each and every day of the year. Our services are modular, allowing you to select only what you need, when and where you need it.

From total asset management to pure personnel engagement, we will be your local partner to ensure every need is met and every regulatory requirement is adhered to while working in the region.

Our range of services include:

SHIP MANAGEMENT

Based on years of accumulated experiences and accredited to the highest industry standards, our ship management services are based on best practice and innovation. With our expertise, competence, network and international reach, we aim to safely deliver operational performance at the most competitive price.

All vessels are managed based on the requirements of the ISM Code, MARPOL, flag state and class, in addition to any local content requirements, and the requirements of the charterer and vessel owner.

PROJECT MANAGEMENT SUPPORT

To meet the challenges in the current “do more with less” economy, businesses can reap tremendous benefits from outsourcing support functions that would have previously been done in-house or that are only required on an ad-hoc basis.

With GO OFFSHORE's vast experience in the upstream maritime oil and gas sector and a team of administrative professionals to call upon, there is plenty of diversity in the type of value added support GO OFFSHORE can provide on any given day.

Whether GO OFFSHORE are providing senior managers, experienced subject matter experts, office space, IT/network support or just another pair of hands for one day or even one hour, our integration and customised project management support services are available when and where you need them most.

TECHNICAL MANAGEMENT

GO OFFSHORE can provide an efficient and effective tailor-made solution for technical management and local on-the-ground support for vessels working in remote regions without the requirement to enter into a full ship management arrangement.

GO OFFSHORE understand the importance of uninterrupted availability. Using a combination of in-house technical management, experienced senior engineers and industry experts, our technical management team can provide you with around-the-clock support.

DRY DOCKING

GO OFFSHORE have experience in the professional planning, supervision and execution of vessel dry docks in Australia and abroad. With every dry dock GO OFFSHORE appoints a dedicated chief engineer and technical manager to oversee the entire process. Our dry dock services and costs are personalised to meet the actual requirements for each vessel and region in which the dry dock will occur, and we always strive to deliver a cost efficient service regardless of location.

VESSEL COMPLIANCE

We aim to please our clientele and therefore recently added to our list of standalone services vessel compliance. As the complex regulatory parameters with which vessel owners and operators are required to abide by continues to grow and become more stringent, vessel owners are seeking alternatives to having to manage compliance internally. At GO OFFSHORE, we offer a comprehensive solution to suit your budget and requirements.

PROCUREMENT

Looking for an ongoing or temporary solution to vessel procurement? In the age of technology, we can provide support at the click of a button with access to cost effective, economic and efficient procurement of provisions, stores, consumables, lubricating oils and vessel parts thanks to our long-term relationship with major suppliers and service providers.

FREIGHT FORWARDING

Utilising our vast local and international networks, GO OFFSHORE is your 'door to door' solution for all freight importation and exportation requirements. We will negotiate the best price to move your goods in the most efficient and reliable manner.

VESSEL IMPORTATION/ EXPORTATION

We specialise in planning and executing works to ensure imported and exported vessels comply with the Australian regulatory environment, providing third party quality assurance support that includes:

- OVID/IMCA inspections
- Asbestos inspections
- Union inspections
- Invasive Marine Species inspections
- AQIS inspections
- Importation
- Customs
- Manning and inductions
- Sailing plan
- Area of operation requirements
- Security plans
- Appointment of agents

RIG MOVING AND RIG CONSULTANCY

GO OFFSHORE have a number of highly experienced and competent deep water semisubmersible and jack-up rig movers available to satisfy legislative and quality assurance requirements in Australia and overseas. Full Marine Orders 47 compliant rig moving teams are available at short notice.

Our rig moving service provides planning, procedures, analysis and equipment procurement prior to commencing the operation. A rig move specialist and MO47 team to carry out the anchor retrieval, passage and anchor deployment. A client debrief and full report is provided on completion of the operation. Our specialist expertise can reduce costs through vessel coordination, and optimum planning of anchor deployment/retrieval.
