

Delivering the best solutions to meet your most challenging technical monitoring problems.

Capability Statement

Portable, Wireless and Fixed Industrial Monitoring Solutions

Encore Monitoring has been providing specialized industrial monitoring sales and service since 1997. As premium partners of world class manufacturers, our qualified and experienced staff have a reputation for high level application knowledge.

Located in Balcatta, Western Australia we service mining, oil and gas, construction, power generation and many other industry sectors in Australia, Africa, South America and South East Asia.

Having the best technical experts in the field of gas monitoring means we deliver the best, most cost - effective gas monitoring solutions, even for the most challenging applications.

Our premium customer care ensures we deliver the best possible customer experience every time.

Encore Monitoring has the best turnaround times for gas detector calibration and service in the industry, without compromising on our premium service.

Our prudent history of meeting and exceeding customer expectations has built repeat business and long-standing relationships in the industrial gas detection industry.
