

BRAND NEW OEM WHITEMETAL BEARING SUPPLY

FOR CRITICAL EQUIPMENT
& APPLICATIONS

**Original Bearing
Manufacturer supply
for Turbines, Generators,
Motors, Compressors,
Gearboxes, Pumps
and more!
Direct like-for-like supply
of OEM-specific bearings.**

Brand new Whitemetal Bearings supplied at lower cost and faster lead times than Major Equipment OEM's.

At Alloy Bearings, we aim to satisfy all your needs through our network of proven, quality suppliers worldwide and ensure that you get brand new Whitemetal Bearings supplied to you that are like for like, the same or better quality than the Original Equipment Manufacturer, at a lower cost and faster lead time.

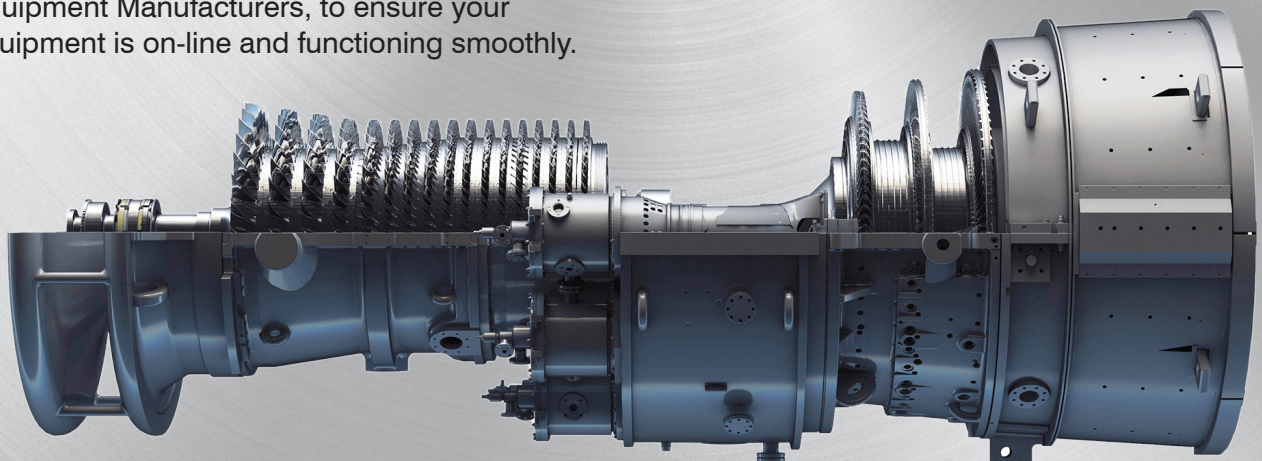

We supply Whitemetal Bearing solutions for multiple Original Equipment makes & models, and act as your one stop shop to all your Whitemetal Bearing needs.

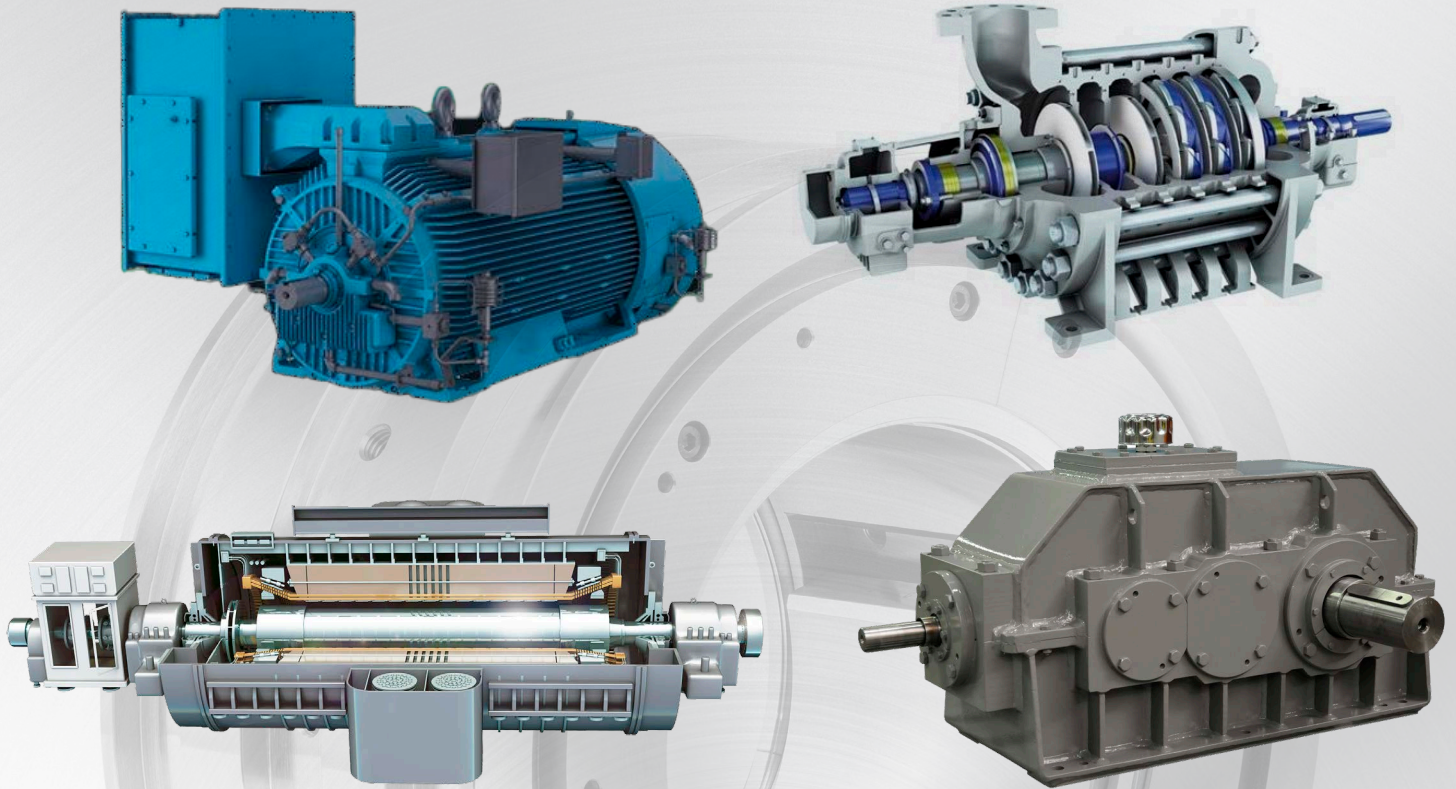

We supply high-quality and precise replacement parts, direct from the Original Bearing Manufacturers, who manufacture for the Major Equipment Manufacturers, to ensure your equipment is on-line and functioning smoothly.

The materials match your requirement in fit, form, and function based on the information we receive. This means you get **QUALITY PARTS** and **ON TIME DELIVERY** at a price that doesn't put a hole in your pocket, which translates into substantial savings over the course of time. Our suppliers are trained and empowered with skills and knowledge that enables them to deliver service in accordance with your expectations.

Alloy Bearings has a reputation for reliability, integrity, and a stable balanced approach. Alloy Bearings is relationship driven; many of our supplier and customer relationships have lasted for years, if not decades.

With our **EASY FREIGHT** service, all logistical requirements including customs clearances are taken care of for our customers.

Some of the equipment brands and models that we have either refurbished, reverse engineered, manufactured, or supplied brand new OEM Whitemetal / Babbitt Bearings for include (but are not limited to):
