

TOKN's next gen productivity platform, bringing your systems and data together with powerful apps, that will automate your workflows, engage people and optimise operational efficiency.

Harnessing the Power of Mobile Productivity

TOKN is a unifying platform as a Service (iPaaS) that connects the organizations, delivering real-time information making operations safer, better connected and more productive. This allows businesses of all sizes and budgets to rapidly digitally transform critical processes at scale, without the associated costs and delays or traditional development projects.

Offering Enterprise Integration to bring your complex systems together with powerful apps templates, TOKN is transforming businesses globally, across a number of industries, driving value from day one.

Our partners and integrators benefit by quickly providing solutions that automate workflows, enhance payroll processing, boost cash flows, improve compliance and engage their teams. Putting everything in one place, on one platform, allowing you to scale your business.

Your Team

Unify

All your systems and data brought together, driving real transformation.

Simplify

Apps for your business, for the way you work.

Automate

Workflow automation and process efficiency.

Scale

Secure, scalable cloud delivery, sustained and renewed.

- Save countless hours with digital workflow automation - no more paper
- Drive better safety and compliance
- Automate business operations, improve speed and agility
- Access to real time data for better decision making
- Bring all your data together with powerful integration
- Connect your workforce and engage your team

Our Company

TOKN is founded on the vision to be the is the Number #1 Digital app platform for medium sized businesses. TOKN sees a world where these organizations can easily harness the power of digital technology to substantially improve productivity by removing duplication and waste from their processes.

Headquartered in Perth, TOKN are winners of WITTA (West Australian Innovation and Technology awards) and the Innovator of the Year encouragement awards. TOKN has a passionate global team that are focused on product development, distribution and customer satisfaction.

TOKN is more than just a platform. It is an expanding global ecosystem of vendors, resellers and customers all working closely together to deliver solutions we love to use. TOKN is founded on long term customer and partner relationships, striving to deliver responsive, open and honest customer service at every turn.

“ With help from TOKN, our asset management systems and processes have gone from good to great. All stakeholders of our business have benefited from the TOKN apps.

Stephen Ardnt - Managing Director

Expense Management

Capture expenses on your mobile with a simple-to-use interface, allowing for the upload of attachments. No more lost or forgotten receipts!

Leave Management Made Easy

Leave Management

Approve and reject leave on the go. Expedite your leave application cycle, ensuring payroll always has the most up-to-date information on hand.

TOKN Mobile Client

TOKN's award winning pre-built mobile client deploys app changes instantly, pre-published on all stores. Known as the “app within an app” concept unique to TOKN, the client offers full offline processing functionality and bring your own device (BYOD) capability.

Providing secure containerization for all mobile applications, the TOKN Client secures your applications and data, separating work and play seamlessly, leaving you free to choose your device type while ensuring the highest level of device control and security.

The TOKN Client includes Bi-factor authentication and an easy 1 click user enrolment step.

TOKN Management Console

An intuitive cloud based administration application, that includes all the capability required to easily administer all TOKN services. The Console provides instant access, wherever you are via a web browser, to all of the essential TOKN services.

The console runs on AWS and is tenanted at the Sydney data centre, using containers that automatically scale up and down in size, as needed. The Console consists of 5 key components; Connect, Workbench, Workflow, Control & Sense that all work seamlessly with the TOKN Mobile Client, to bring complex systems together with powerful apps. This ensures accelerated delivery while maintaining the most optimal user experience across all applications running on TOKN.

Connect

TOKN Connect is a comprehensive enterprise integration framework allowing quick and secure configuration of connections to external systems, using a variety of services.

Administration users can interrogate an API, select required fields, create data structures and connect to external systems to fetch and post data. Any external system that uses open APIs or REST/SOAP/OData can be connected to TOKN.

Workbench

The TOKN Workbench allows administrators to collaboratively build intuitive applications quickly, that drive value.

TOKN Workbench includes:

- Code editors to complete more advanced app builds
- Pre-built app components accelerates the build process
- Template libraries of pre-built app templates
- Code upload functions to import code snippets
- App testing tools to visualise mobile applications
- Code promotion features to seamlessly promote code between DEV, WAS & PRD instances

Workflow

TOKN Workflow simplifies the lifecycle management, deployment and workflow creation.

TOKN Workflow unifies end user data across different business systems, providing a high degree of flexibility in how a user might interact with different connected systems.

Users creation can be automated using one of TOKN's micro services, such as the TOKN Active Directory Service.

Control

Securely manage connected devices using the enhanced device management capability embedded within TOKN Control. TOKN Control provides a comprehensive device management framework, with a complete view of and control over all connected devices.

TOKN Control includes:

- Device manager listing all connected devices
- Geo-location including geo-position and geo-fencing
- Enhanced security features: remote wiping & backlisting
- Embedded app analytics, reports and change logs

Sense

Investigate potential faults before your customers even know there is a problem with TOKN Sense. Retrofit existing equipment with sensors and start collecting live data that is transmitted via nodes to TOKN Sense, in the cloud.

Dashboards are used to analyse the data, highlight trends, predict component failures, send alerts and create jobs in connected systems when readings are outside the specified range.

Content Management System

The TOKN CMS connects and engages your workforce by distributing vital information through the TOKN Mobility Client App, replacing the need for intranets or portals for workers on the go. Give your organisation an identity and create a “window” into the organisation, while reflecting your organisation’s brand, style and image. Includes video streaming, messaging, learning management and document management.

Your Industry Covered

- Labour Hire
- Mining Services Workforce Management
- Construction
- Aged Care and Community Care
- Utilities
- Real Estate

We want to be really connected to our mobile workforce, to keep them operating safely and make our business more productive. TOKN provides technology that helps us achieve that.
