*Better for you.
Better for the environment*

our story

In a world where disposable sanitary pads were causing harm to women's health and polluting the environment, a small community called Bamboo Babe emerged with a mission to create eco-friendly and healthy products. Their success gained a loyal following, but they were forced to close their doors.

However, Khyati, who shared the same passion for the environment and women's health, stumbled upon Bamboo Babe's story and decided to keep their legacy alive. She convinced her family to buy Bamboo Babe and focused her energy on making it even better than before. They also decided to set up a foundation to use parts of their profits to empower women globally.

Sanitary pads take 500 to 800 years to decompose due to non-biodegradable plastic and that the perfumes used in them are harmful to women's health. Bamboo Babe's vision was to provide natural, effective, and harm-free products. They aimed to create ongoing change and inspire others to do the same.

Thanks to Khyati and her team, the Bamboo Babe community continues to grow, empowering women to make a positive impact on the environment and their health. Together, they are making a difference, one pad at a time.

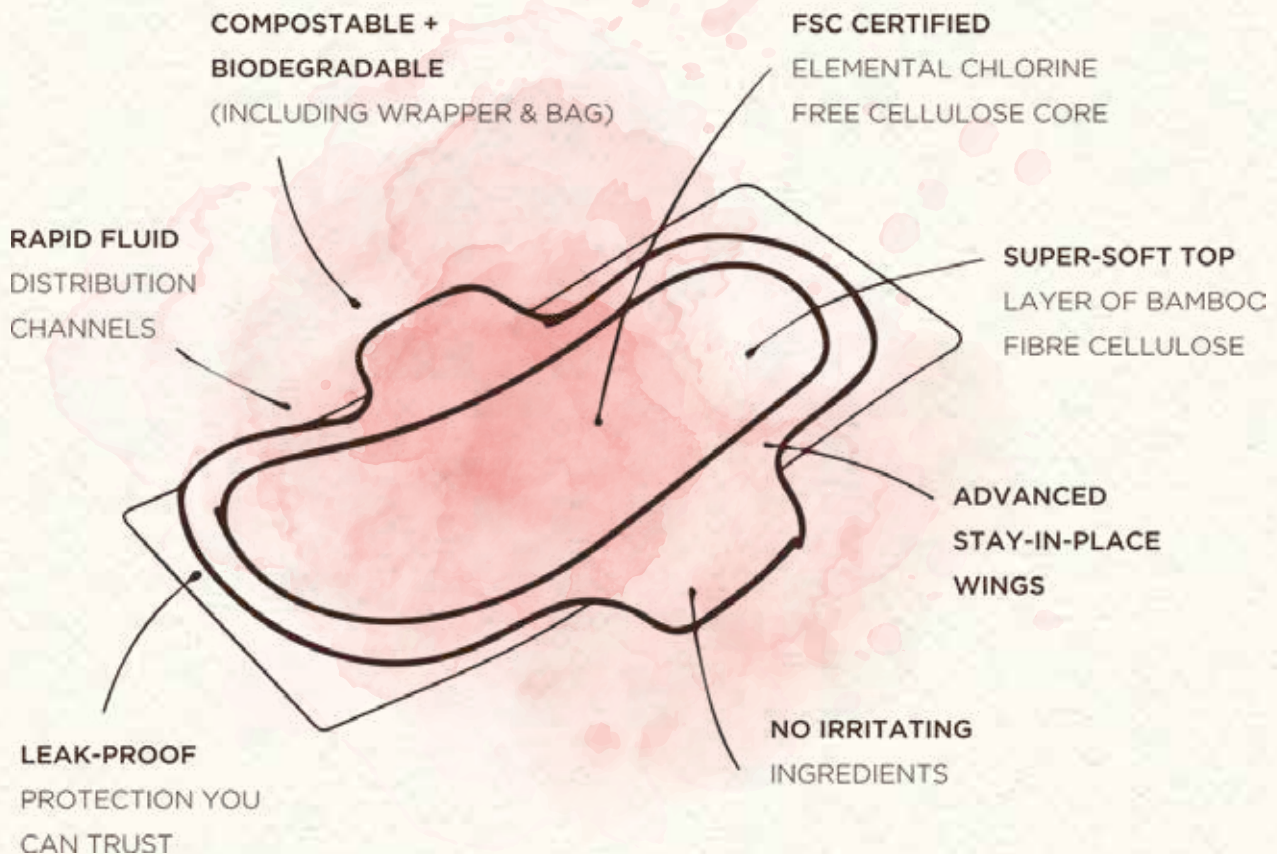

THE DIFFERENCE

Bamboo Babe is proud to be fully owned and designed in Australia.

We use 100% bamboo fibre which are naturally grown and responsibly sourced from a FSC approved plantation.

Our bamboo is naturally hypoallergenic so you stay comfortable and naturally anti-bacterial which helps control odour and keeps you fresh.

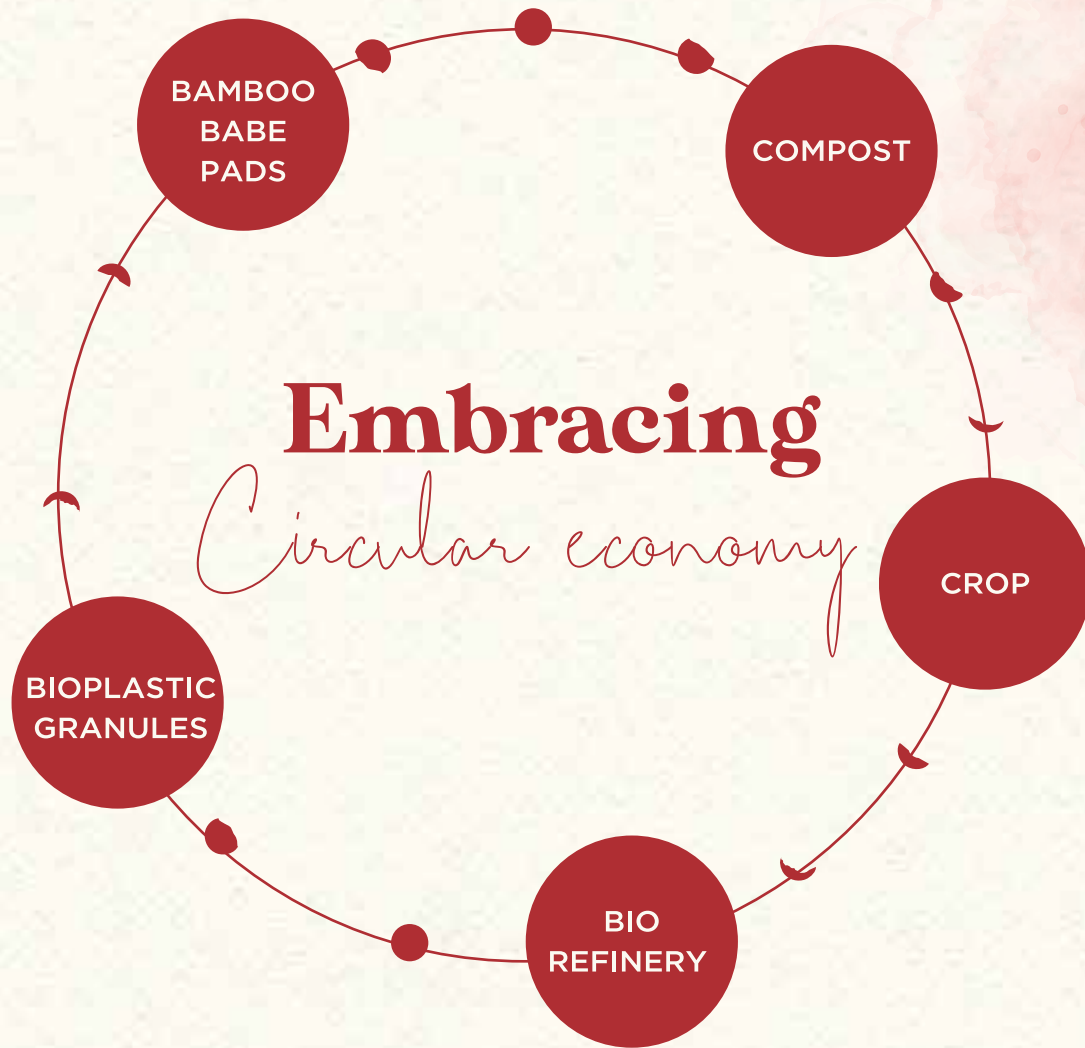

Our pads are compostable and biodegradable. Super thin, ultra absorbent and touch dry against your skin, you can trust Bamboo Babe with your most intimate area.

Why bamboo?

- Bamboo is a sustainable and renewable resource.
- Bamboo uses less water than cotton to grow.
- Bamboo is naturally hypoallergenic, keeping you comfortable.
- Bamboo is naturally antibacterial, keeping you fresh.

Circular Economy is a change to the model in which resources are mined, made into products, and then become waste.

Circular economy reduces material use, redesigns materials, products, and services to be less resource intensive, and recaptures “waste” as a resource to manufacture new materials and products.

Circularity is embraced within the sustainable materials management approach and is an important part of slowing climate change.

the babes

NIGHT 340 mm

Compostable sanitary pads created with sustainable plant-based ingredients that are designed to biodegrade and go back to nature. Bamboo Babe Night Pads are perfect for overnight use or an extra heavy flow.

Compostable sanitary pads created with sustainable plant-based ingredients that are designed to biodegrade and go back to nature. Bamboo Babe Super Pads are perfect for heavy flow during the day.

Customer reviews

AMAZING PRODUCTS

Fantastic pads. Comfy, natural & top quality. The packaging is brilliant also. Super service- thank you

Kirsty C.

AMAZING PRODUCT

My girls love these. They say they're the only pads that don't leak. I love them because they work & they are Earth-friendly.

Lisa H.

PANTY LINERS

I love these. They are light but provide great coverage, easy to keep in your handbag & biodegradable. What more could a girl want?

Melissa F.

EASY ALTERNATIVE

As someone who has tried cups and other sustainable period options, Bamboo Babe are the easiest & the most comfortable option. The only ones I will buy from now on.
