

ORYX DESERT SALT

PRODUCT INFO

WHAT IS DESERT SALT?

The salt is harvested from a salt pan in the remote pristine Kalahari Desert in Africa. Beneath the pan lies an ancient underground brine lake.

Oryx Desert Salt is unrefined and unprocessed – a 100% pure, crystal white, naturally organic, unpolluted desert salt.

Filled with essential minerals and trace elements from the earth, as balanced by nature over millions of years

SUSTAINABLE AND RENEWABLE

The salt is from an ancient underground salt lake, 55 million tons which is renewed & sustained by 3 rivers that flow 30-100m below ground converging in the lake.

The rivers flow and are filtered through Dwyka rock strata tested at 280-300million years old

OUR GRINDERS

Unlike many other grinders, ours are glass and have a ceramic head, this has 2 main advantages:

- Up to 20x more refillable than plastic head grinders*
- No chance of plastic pieces in your food.*

PRODUCT INFO

#REFILLNOTLANDFILL

Due to our glass grinders with ceramic heads we encourage the purchase of our refill cartons.
