Company profile

Changzhou Cognis Chemical Co., Ltd incorporated in earlier 2021 with experienced staffs, our management team has more than 20 years' experience in food ingredients business. We have very good relationship with local main manufacturers in China. We are very professional, although we are very young.

We NOT ONLY sell product, also raise advice, because we are sensitive about the market and we will give our customer advice the trend of the market to help customers to reduce the cost and keep the supply chain stable, this is the most important in some special period. Placing order right now or place the order when lower price is coming in the very near future. This is what we are different with other traders/brokers.

Currently we are mainly focus on sweeteners and acidulants, we are strong on these items.

We are looking forward to cooperating with you to make our business smoother and bigger.
