Light vehicle emissions standards for Australia

Angela Hoefnagels
Review Director

Australia's transport emissions

Australia is improving, lags behind others

Benefits of a standard

- Greenhouse gas emissions reductions
- Consumer fuel savings
- Consumer choice is preserved
- Suppliers have flexibility in their compliance
- Brings Australia into line with other markets

2013

192
g CO₂/km

2025

105
g CO₂/km

\$830
annual fuel saving
for motorists for
a new car in 2025

59 Mt
CO₂-e emissions
prevented by 2030

\$580
net benefit to Australia
for each tonne of
CO₂-e prevented

Next steps

- Climate Change Authority is consulting on Australia's climate policy options in its **Special Review**
- Submissions welcome
- Australian Government is considering how to improve light vehicle efficiency as part of its **National Energy Productivity Plan**
