

Check Your System

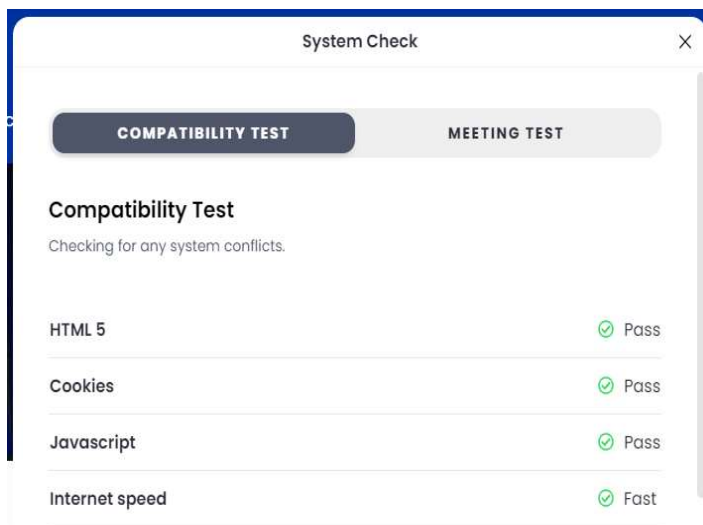

Navigate to your Virtual Lobby and select the

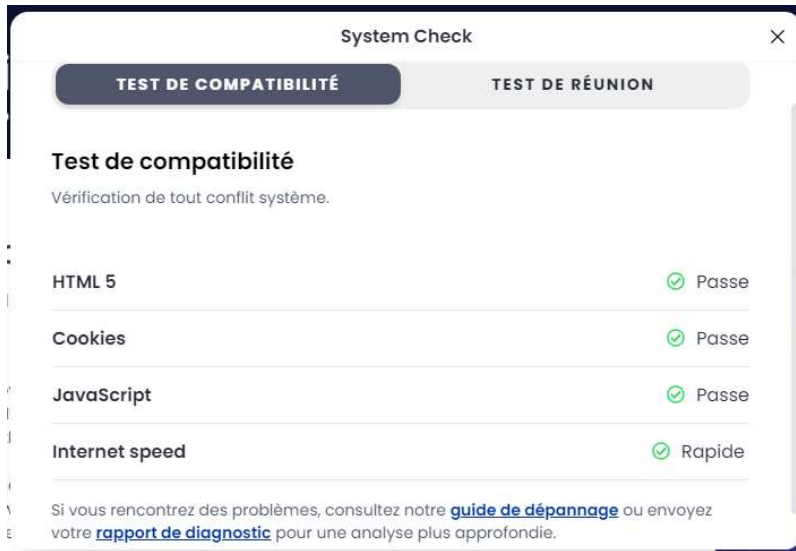

icon in the upper right corner of the menu.

From there, select Check Your System.

The Check Your System content will be displayed in the language selected on your login page.

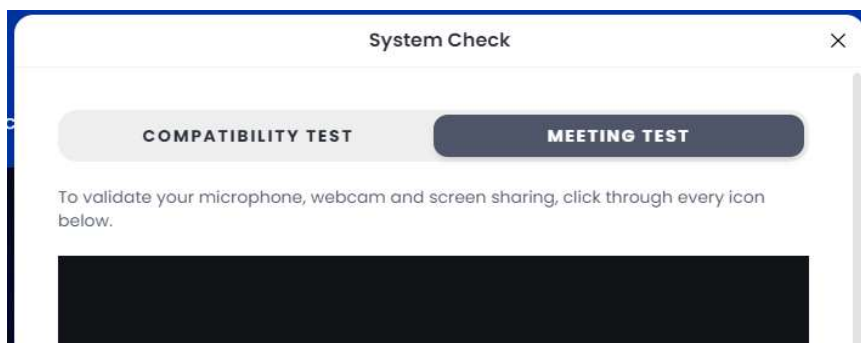

The compatibility test will check for system conflicts:

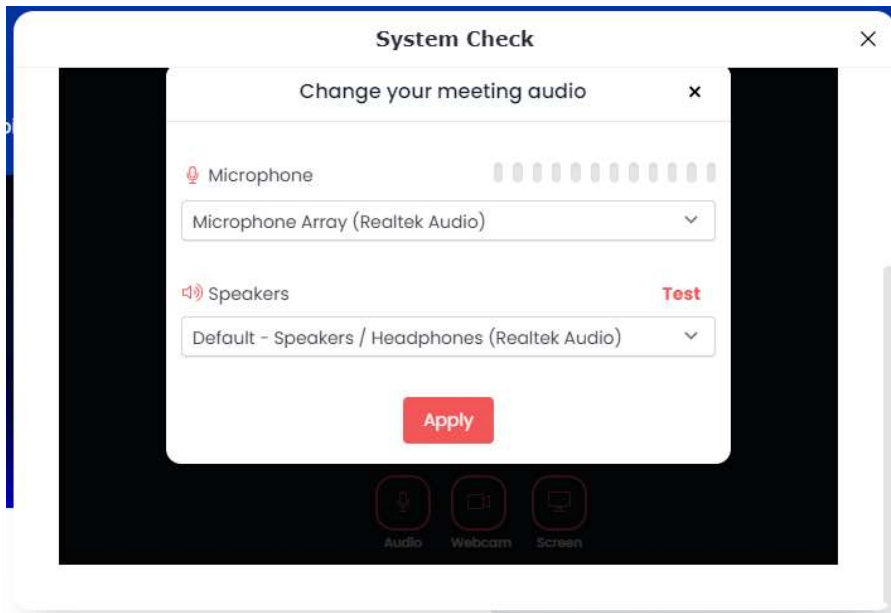

- HTML5
- Cookies
- Javascript
- Internet Speed

The Meeting test will ask you to check your:

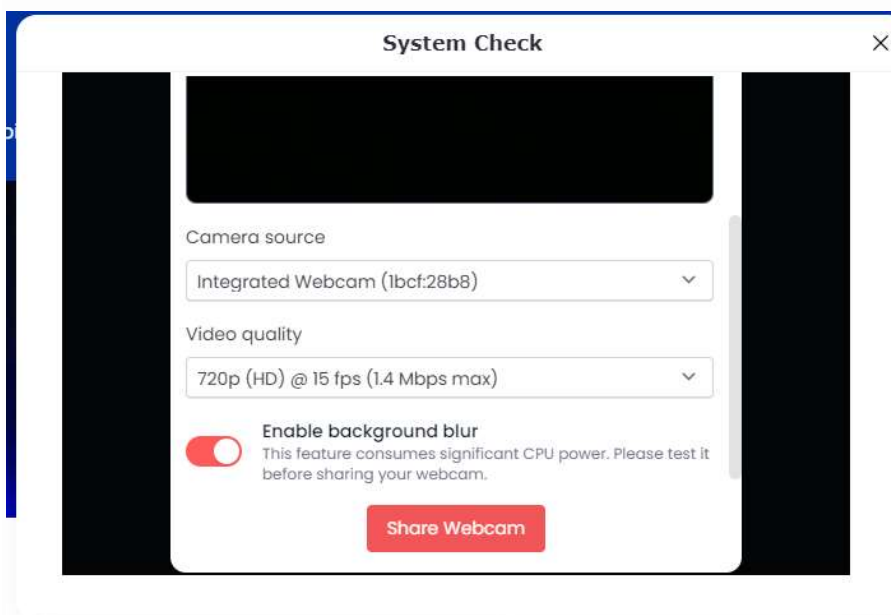

- Audio
- Webcam
- Screen

Within this test, you will have the ability to change your Meeting Audio.

When testing your system, you will have the ability to test and setup your webcam sharing settings. Within this setup, you can choose the Camera Source and Video Quality. You will also be able to enable the background blur here.

Within the Meeting Test System Check, you will also have the ability to test the sharing of all or part of your screen and playing an external video.
