International Cancer Screening Network (ICSN)

Overview

The International Cancer Screening Network (ICSN) is a voluntary consortium of countries, organizations, and experts interested in promoting context-specific organized cancer screening through evidence-based strategies. The consortium was established in December 1988 as the International Breast Cancer Screening Database Project during an international workshop involving representatives from 11 countries. The consortium has since broadened its objectives to evaluate cancer screening implementation for cancers in which it has been demonstrated to reduce mortality (be efficacious), including breast, colorectal, cervical, and lung.

Collaborative Projects

The ICSN is dedicated to collaborative research aimed at identifying and fostering efficient and effective approaches to cancer control worldwide through population-based screening. The emphasis of the consortium is upon research regarding factors affecting the implementation of efficacious cancer screening technologies and the achievement of its expected benefit.

Participation in the ICSN is open to any country or region that has initiated a population-based cancer screening program, or is considering doing so.

ICSN members have worked together through working groups focused on targeted data research, collection, and assessment of how screening technologies are appropriately tailored to the country context in which they are applied. Consideration of new technologies that may be applied in populations is also of interest. Working groups meet the day before a general meeting.

ICSN 2017 Meeting Bethesda, MD June 19-21, 2017

The 2017 International Cancer Screening Network (ICSN) Meeting will take place in Bethesda, MD, United States. The meeting is sponsored by the U.S. National Cancer Institute (NCI), under the new leadership of the Center for Global Health, and it will provide an opportunity for international scientists working in cancer screening research to exchange practice challenges, research methods, knowledge, and results in the field of organized cancer screening, and prioritize, develop and move forward research projects through interest and working groups. Meeting topics will include research relevant to:

- Cancer screening in lower-resource settings
- Novel technologies and strategies for screening
- Evaluation and modeling effective screening strategies
- Studies of informed and shared decision making
- Studies in tailored screening
- Studies of the application of novel technologies
- Reaching hard-to-reach populations
- Approaches to assuring follow-up to abnormal cancer screening tests

WELCOME: CONFERENCE CHAIRS

Dear Colleagues,

Welcome to the 8th annual conference of the Consortium of Universities for Global Health (CUGH).

This meeting has become the world's leading academic global health conference. It brings together committed leaders, professionals, educators, students from diverse fields of study including engineering, business, law, policy, natural sciences, nursing, public health, medicine, and environmental studies to explore, discuss and critically assess the global health landscape.

This year's theme, *Healthy People, Healthy Ecosystems: Implementation, Leadership and Sustainability in Global Health*, reflects the growing realization that our health and that of our planet are inextricably linked. World-class speakers will address topics that include: planetary health; governance and political decision-making; health systems and human resources; women's health; non-communicable diseases; the social determinants of health; and infectious diseases.

Johns Hopkins University and Makerere University are delighted to be serving as co-hosts for the Conference. We are proud to say that this truly is a global event, comprised of global health leaders, faculty, and students from all spheres, addressing the most pressing issues facing our planet.

We hope that you will enjoy this exceptional opportunity to teach and learn, network and collaborate with fellow global health professionals from around the world.

Sincerely,

Patricia M. Davidson, PhD, Med, RN, FAAN
Dean, School of Nursing
Johns Hopkins School of Nursing
Chair, 2017 CUGH Conference

Nelson Sewankambo, MBChB, MMed, MSc, FRCP
Former Principal

WELCOME: CHAIR, BOARD OF DIRECTORS

Dear Colleagues,

On behalf of the Board of Directors of the Consortium of Universities for Global Health I am delighted to welcome you to our eighth annual Global Health Conference.

This year's theme, "Healthy People, Healthy Ecosystems," reflects our ongoing efforts to work collaboratively and across disciplines to address the complex challenges our world faces. We all share the same vision of a safer, healthier, more compassionate, open, and fairer world. We believe in a world without borders because the desire for health and well-being is universal and doesn't change based on race, ethnicity, nationality, socio-economic status, sexual identity, or geographic location.

CUGH is a truly global organization with active members from around the world. For the first time this year, our global health conference is being co-chaired by a member from a low- or middle-income country (LMIC). Dr. Nelson Sewankambo, former principle of the Makerere University College of Health Sciences, joined Conference Chair Dr. Trish Davidson, Dean of the Johns Hopkins University School of Nursing in this effort. We are pleased to announce that all future CUGH conferences will be co-hosted by an LMIC institution.

Our annual meeting cannot occur without the generous sponsorship from many organizations and friends. These donations help keep our registration fees reasonable and provide funds to support travel scholarships for students from LMICs to present their work at our meeting. We are immensely grateful for your generosity.

I have no doubt that you will gain a lot from this year's slate of speakers, panels, and topics. Enjoy the conference and getting to know your fellow attendees.

Best wishes,

Pierre Buekens, MD, PhD
W.H. Watkins Professor and Dean
Department of Epidemiology
Tulane School of Public Health and Tropical Medicine
Chair, CUGH Board of Directors

A new voice for a new discipline

***The Lancet Planetary Health*—a call for papers**

The Lancet Planetary Health, a gold open access journal in the *Lancet* family, is dedicated to the health of the human civilisation and the state of the natural systems on which it depends.

The journal is committed to publishing high-quality original research, editorials, comments, and correspondence that contribute to defining and advancing planetary health worldwide.

In keeping with our other journals, *The Lancet Planetary Health* offers rapid publication of research online within 8-12 weeks from submission.

Read more about the scope and aims of the journal, and stay informed by registering for email updates, notifications of newly published articles, and table of contents alerts, all of which are freely accessible online at www.thelancet.com/planetary-health.

Consider us for publication—to submit a manuscript, visit <http://ees.elsevier.com/tlplanetaryhealth>. We also welcome presubmission enquiries. To find out more please contact planetaryhealth@lancet.com.

WELCOME: CUGH EXECUTIVE DIRECTOR

Dear Friends,

Welcome to Washington DC and our 8th Annual Global Health Conference.

The conference's theme, "Healthy People, Healthy Ecosystems," reflects the twin challenges of our time: improving people's well-being while living sustainably on our planet.

Climate change, the unsustainable degradation of our planet's ecosystems and the challenge of meeting the needs of a global population expected to reach 9.7 billion by 2050 pose an existential threat to our existence, one that demands the implementation of the best, evidence-based policies available. For this to occur the global health community must be politically active. In these tumultuous times the voice of scientists has never been more important to drive the implementation of policies based on evidence, not ideology. We need to use our voice to educate policymakers and as importantly, the public, about the challenges we face and the solutions needed to address them.

To this end we have increased our public communication and advocacy efforts. On April 6th we will run our first Advocacy Day on Capitol Hill. We have and will continue to collaborate with other organizations to support leadership and investments in global health. We have mobilized our members and spoken out in defense of people's rights, and public institutions that comprise the foundation of stable democracies. We have and will continue to speak out in support of investments in global health, human rights, organizations like the CDC, NIH, USAID, EPA, NOAA, UN agencies, and important democratic pillars, such as a free press, and an independent judiciary.

CUGH's activities and the benefits we provide to our members continue to expand (new workshops, webinars etc), our Committees (Education, Research, Enabling Systems, Advocacy and Communications) create new products that are open access and support the global health community's work.

I would like to thank our conference chairs, Dr. Patricia Davidson, Dean of the Johns Hopkins School of Nursing and Dr. Nelson Sewankambo, former Principal, Makerere University College of Health Sciences; co-chair Dr. Tom Quinn, Director, Johns Hopkins University, Center for Global Health and their staff; Adam, Anna F., Harriet, Rachel and Anna K., my team at the Secretariat, Karen, Dalal, and Bailey; Norm and Doris, our conference support team from MSI; members of the local organizing committee; the Scientific Program Advisory Committee and our many volunteers for your hard work helping to organize this event. We are also immensely grateful to all the sponsors (listed in this program) for your generous donations. Your support is crucial to the success of our conference.

Please join and participate in our work by becoming an institutional member or an individual member (www.cugh.org).

We hope you enjoy your time at CUGH2017 (please use your social networks to share what you hear at the meeting). We look forward to seeing you at CUGH 2018, March 15-18 in New York City.

Best wishes,

Hon. Keith Martin MD, PC
Executive Director, CUGH
Conference Co-Chair

Your first discovery might be your new career!

The National Institute of Allergy and Infectious Diseases (NIAID), one of the largest Institutes of the world-renowned National Institutes of Health (NIH), conducts and supports a global program of bio- medical research to better understand, treat, and ultimately prevent infectious, immunologic, and allergic diseases. With the efforts of its scientific and administrative staff, NIAID plays a leading role in accelerating the development of treatments and prevention strategies for many of the world's most widespread diseases, to respond to emerging public health threats.

Join NIAID and make a difference!

A talented and diverse workforce is one of NIAID's greatest assets, and we seek qualified candidates for an array of research trainings, fellowships, and career opportunities available for candidates with science and non-science backgrounds. NIAID's training programs provide a chance for recent graduates to obtain invaluable experience conducting basic and clinical research while working side-by-side with world-renowned scientific investigators.

NIAID also offers administrative training and career opportunities, where students can train or work in a variety of roles supporting our science. With the effort of its scientific and administrative staff, NIAID can quickly address evolving public health needs.

ABOUT CUGH

The Consortium of Universities for Global Health (CUGH) is a rapidly growing Washington, DC-based non-profit consortium of over 150 universities, institutions, organizations, and individuals from around the world involved in global health. CUGH was established in 2008 with generous funding from the Bill & Melinda Gates Foundation and The Rockefeller Foundation.

MISSION:

To build interdisciplinary collaborations and facilitate the sharing and implementation of knowledge to address global health challenges. CUGH assists members in strengthening their global health programs and sharing their expertise across education, research, advocacy and service. It is dedicated to creating equity and reducing health disparities everywhere. CUGH promotes mutually beneficial, long-term partnerships between universities in resource-rich and resource-poor countries, developing human capital and strengthening institutions' capabilities to address these challenges. It is committed to translating knowledge into action.

VISION:

Making the university a transforming force in global health.

CUGH Activities Include:

IMPACT: Convenes the global health community at its annual conference. Bridges the knowledge-needs gap by increasing access to information and research; facilitates partnerships between academic institutions in high, middle and low income countries and between them and governments, foundations, NGOs, and the private sector.

ADVOCACY: Engages in public education & advocacy for policies that address global health challenges and issues important to our members. Connects scientists with congressional offices.

CAPACITY BUILDING: Provides a mentorship program for global health programs. Helps strengthen education and research in developing nations by connecting trainers and curricula with the training needs of these institutions.

EDUCATION: Runs webinars and workshops throughout the year. www.CUGH.org is a resource center for curricula, information and services that support global health education, research, and service activities. Identifies the needs of the workforce, defines competencies and student needs.

RESEARCH: Identifies important research questions, helps strengthen research capabilities amongst members and in institutions in low resource settings.

ENABLING SYSTEMS: Facilitates inter-university information exchanges and developing global operational tools and resources that will strengthen university-based global health programs.

COMMUNICATIONS & INFORMATION RESOURCES: www.CUGH.org is an information hub for the academic community, policymakers, the public, and the media. It provides an opportunity for members to share information about educational materials, forums, best practices, policy updates, training modules, funding, jobs, grants, research opportunities, and other content across disciplines.

HOW TO DONATE & SUPPORT CUGH

CUGH's membership has nearly tripled since we opened our Secretariat in Washington, DC in Sept. 2012.

We have increased the benefits we provide to our members; creating new grants, & awards; expanded our international network; revamped our website as a hub for knowledge sharing, advocacy, and training; strengthened our committees; convened global health directors; held new workshops & webinars; provided services to global health programs; and increased our student focused activities.

CUGH is a 501c(3) non-profit organization. All donations in the US are tax deductible. You can also donate equities. Your support is much appreciated & helps us expand the programs and services we provide so we can improve health outcomes around the world.

THANK YOU VERY MUCH FOR YOUR CONSIDERATION!

To donate online go to www.CUGH.org/donate
To donate equities please contact Dalal Najjar, dnajjar@cugh.org

ABOUT CUGH

WANT TO MAKE A DIFFERENCE?

Join CUGH's Emergency Response Corps and Service Corps.

Responding rapidly to humanitarian emergencies and building capacity in low resources settings are two of the world's biggest global health challenges. Chronic human resources deficits and a lack of skilled trainers persist in many areas of the world. To address these problems CUGH created two rosters of professionals with medical and non-medical skills.

Our Emergency Response Corps. includes professionals interested in helping in a humanitarian emergency. Our Service Corps., includes experts prepared to train, build capacity and potentially provide service in a low resource setting. To learn more about this exciting initiative and sign up please see: <http://www.cugh.org/content/emergency-response-and-capacity-building-rosters>

CUGH INTEREST GROUPS AND DISCUSSION FORUM

CUGH's **Interest Groups** parallel major global health challenges. It is a platform for researchers, implementers, students, and others in the global health community to post good/best practices, training modules, and advocacy issues. It is designed so that individuals from different disciplines can share knowledge, collaborate, and advocate around particular problems. It will help break down barriers between disciplines and facilitate true multidisciplinary collaborations.

Our website also has a **Discussion Forum** for you to post questions and discuss issues. CUGH members can contribute to these resources. So please join us, use it, and make an impact.

Visit our website at www.CUGH.org/join to register as a member and contribute to the site.

Interest Group and Discussion Forum Topics include:

Non-Communicable Diseases, Global Oral Health, Global Surgery & Anesthesia, Infectious Diseases, Innovation, Nutrition and Food Security, Mental Health etc.

CUGH'S SPEAKERS BUREAU AND EMERGING LEADERS BUREAU

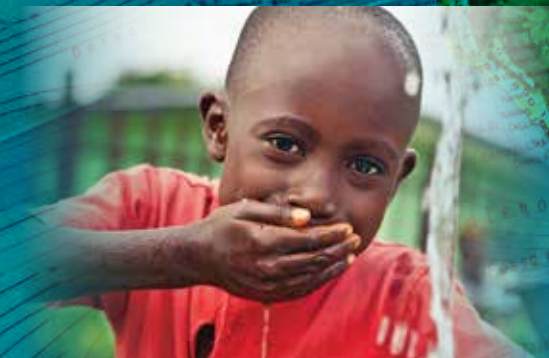

CUGH's SPEAKERS BUREAUS

The CUGH Speakers Bureau and Emerging Leader's Bureau is a members-only benefit. It contains a list of speaker's institutions may wish to contact if they are seeking subject matter experts to speak on a specific topic.

Speakers have been vetted by the CUGH Research Committee. CUGH does not offer honorariums or travel reimbursement for members of the Speakers Bureau. Institutions requesting a speaker must engage that speaker directly to make the appropriate arrangements.

If you are a member and wish to connect to a speaker please email us at Info@cugh.org

CUGH MENTORSHIP PROGRAM

CUGH's Global Health Program Advisory Service (GHPAS) led by Dr. Jon Ripp connects CUGH member program directors with experienced mentors who can provide guidance as they grow their programs. The mentorship lasts a year. The recommended commitment is a 30-minute telephone meeting every 1-2 months over the course of a year with additional e-mail correspondence as needed.

If you are interested in becoming a mentor or you are a CUGH member trying to start/expand your globalhealth program and would like to use this service, contact us at info@cugh.org

JOIN OUR GLOBAL NETWORK & CONNECT TO CUGH

Sign up for the CUGH Bulletin at <https://cugh.org/bulletin>

CUGH CAMPUS REPRESENTATIVES

STUDENTS, JOIN OUR CAMPUS NETWORK- CUGH has student campus reps in 38 universities. This network enables students to connect to our Trainee Advisory Committee and impact CUGH's work. It is also a way for us to share our advocacy and public education work with students who may be interested in participating in these efforts, and vice versa. If you are interested in becoming a campus representative or joining our growing student network, please fill out the following <http://goo.gl/forms/yMqYHCHyZ6>

CUGH COMMITTEES AND SUBCOMMITTEES

Advocacy and Communications Committee- Chaired by Dr. Keith Martin, CUGH, USA

Education Committee- Chaired by Dr. Quentin Eichbaum, Vanderbilt University, USA

Enabling Systems Committee- Co-Chaired by Dr. King Holmes, University of Washington & Ann Anderson, University of Washington, USA

Finance Committee Chaired by Dr. Margaret Bentley, University of North Carolina, Chapel Hill, USA

Membership Committee- Co-Chaired by Dr. Richard Deckelbaum, Columbia University, USA & Dr. Muhammad Zaman, Boston University, USA

Research Committee- Co-Chaired by Dr. Elizabeth Grant University of Edinburgh, UK & Dr. Jason Blackard, University of Cincinnati, USA

Subcommittees within the Education Committee: Education-Related Conference Planning Subcommittee, Educational Products Subcommittee, Global Health Capacity Building Subcommittee, Global Health Competency Subcommittee, Global Health Program Advisory Service Subcommittee, Global Health Undergraduate/Masters Education Subcommittee, Global Health Workforce Subcommittee, and Trainee Advisory Committee.

For information about CUGH's Committees and Education-related Subcommittees, please contact the committee chairs at cugh.org/committees

GENERAL INFORMATION

Conference Venue

Washington Hilton Hotel – DuPont Circle
1919 Connecticut Ave., NW
Washington, DC 20009
Phone: 202-483-3000

Registration and Information Booths

Registration and information booths are located in the Terrace Foyer in the Terrace Level.

Booth Hours are:

Thursday, April 6, 2017
4:00pm – 7:00pm

Friday, April 7, 2017
8:00am – 5:30pm

Saturday, April 8, 2017
8:00am – 5:30pm

Sunday, April 9, 2017
8:00am – 4:00pm

Registration Fees

High Income Countries (HIC)

Delegate (Member): \$600
Delegate (Non-Member): \$700
Student (Member): \$275
Student (Non-Member): \$325

Middle Income Countries (MIC)

Delegates & Students (Member): \$225
Delegates & Students (Non-Member): \$275

Low Income Countries (LIC)

Delegates & Students (Member): \$175
Delegates & Students (Non-Member): \$225

Welcome Reception

The Welcome Reception will be held on Friday, April 7, 2017, from 6:30pm to 8:00pm at the hotel's International Terrace.

Badges

Please wear name badges at all times to gain access to the program sessions and all conference activities.

Speaker Information

An LCD projector and laptop are provided in all session rooms. Speakers should drop off their PowerPoint presentations at least 1 hour before their presentation directly in the session room (it is not necessary to send the presentations in advance). A laptop will be provided in each session room. It will not be possible to use another laptop.

Oral Abstract Presentations

Titles for the 30 for oral abstract presentations are available in the Session Agenda section of this program. Full abstracts are available in the Abstract Booklet provided by The Lancet Global Health supplement.

Poster Presentations

Posters can be viewed all day Friday, April 7 and Saturday, April 8. Poster presenters will accompany their posters on their assigned days on Friday, April 7 from 1:00pm – 2:30pm and on Saturday, April 8 from 1:00pm to 2:30pm.

Finalists for the Lancet/CUGH Student Poster Competition are viewable on Friday April 7 and Saturday April 8. Awardees will be identified by the judging committee by 5:30pm Friday. Winners will be recognized at the awards ceremony, and presented \$500 and a certificate on Saturday, April 8, 1:30pm – 2:30pm.

Conference Evaluation

The conference evaluation form is available at conference time. Please complete the evaluation form to help us to improve our future conferences.

CME & CNE

Please complete the Evaluation and Claim for credit form for CME & CNE credits. See the Boston University CME pages and the Johns Hopkins University CNE pages for details.

Coffee Breaks And Lunch

Coffee and snacks are provided mid-mornings and mid-afternoons. Lunch is not provided. However, the Washington Hilton Hotel – DuPont Circle is conveniently located in a neighborhood with a large number of food options and the hotel has several food outlets.

Conference Mobile App And Media

An app for mobile devices with helpful conference-related information, such as the program agenda and speaker bio sketches, is available for use on iPhones, iPads and Android devices. The app features conference announcements and session updates as well as the ability to mark favorite sessions. Search for CUGH 2017 in the iTunes and Google Play stores. Login to the mobile app with the email address used for conference registration. **The mobile app password is: CUGH2017**

Visit CUGH's Facebook page and Twitter handle @CUGHnews and @CUGH_TAC for updates and follow along with conference sessions and commentary on Twitter using #CUGH2017.

Contact CUGH Staff

To contact a CUGH staff member please go to the CUGH booth at the Terrace Foyer in the Terrace Level.

Internet Access

Free wireless internet access is available in the conference area.

Network: HHonors-meeting

SCHOOL OF PUBLIC HEALTH

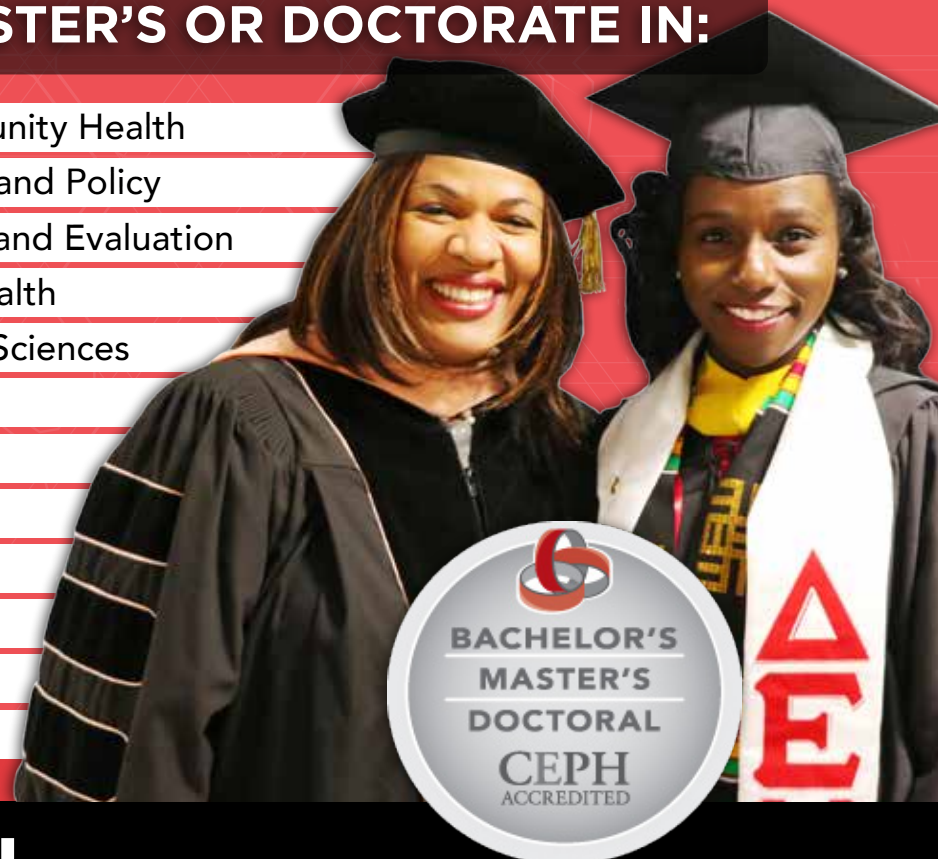

WORK FOR **HEALTH EQUITY** AND **SOCIAL JUSTICE**

EARN YOUR POST-BACCALAUREATE CERTIFICATE IN GLOBAL HEALTH

The Graduate Certificate in Global Health provides a grounding in global health delivery that enables individuals (many of whom do not have public health backgrounds) to work effectively in agencies and programs providing global health services.

EARN YOUR MASTER'S OR DOCTORATE IN:

- Behavioral and Community Health
- Public Health Practice and Policy
- Health Policy Analysis and Evaluation
- Maternal and Child Health
- Environmental Health Sciences
- Health Administration
- Kinesiology
- Physical Activity
- Family Science
- Epidemiology
- Health Equity

TOGETHER WE WILL

W DEPARTMENT OF GLOBAL HEALTH
UNIVERSITY of WASHINGTON

The University of Washington offers degree and certificate programs at all levels – from undergraduate to professional, including masters and doctoral degrees, undergraduate minors, and programs for medical students and residents.

INNOVATION → IMPACT

We develop evidence-based solutions to global health problems. We then deliver the solutions “on the ground,” using an implementation science approach and, whenever possible, scale-up for impact.

SOCIAL JUSTICE

We apply a social justice lens to everything we do, whether we are engaged in research, building capacity, or educating the next generation of global health leaders.

WASHINGTON

Seattle is a great place to live and our region is home to more than 168 non-profits, businesses, and other entities that work to improve global health.

CELEBRATING

BUSINESS MEETINGS, SATELLITES, INTEREST GROUPS

* ALL CONFERENCE ATTENDEES ARE WELCOME TO ATTEND THE FOLLOWING MEETINGS AND EVENTS. NO RSVPS REQUIRED.

MEETINGS & EVENTS

SATURDAY, APRIL 8, 2017

CUGH Awards Presentation

1:30pm – 2:30pm | International Ballroom Center

Presentations of:

- 2017 CUGH Leadership Awards
- 2017 CUGH – Velji Awards
- 2017 Lancet – CUGH Student Poster Awards
- 2017 CUGH Reflections Essay Contest Winners
- CUGH – JHU Global Health Now Award
- CUGH – Pulitzer 4th Annual Global Health Video Competition
- Global Health Science and Practice Manuscript Winners

SUNDAY, APRIL 9, 2017

CUGH Business & Membership Meeting

8:00am – 8:30am | International Ballroom Center

An opportunity to learn about CUGH's activities and plans for the future.

COMMITTEES & INTEREST GROUPS: MEETINGS & GATHERINGS

FRIDAY, APRIL 7, 2017

• Workforce Subcommittee Meeting (part of the CUGH Education Committee)

7:15am – 8:15am | Fairchild West

• Competencies Subcommittee Meeting (part of the CUGH Education Committee)

7:15am – 8:15am | Fairchild East

• Trainee Advisory Committee Meeting (part of the CUGH Education Committee)

7:15am – 8:15am | Holmead East

SATURDAY, APRIL 8, 2017

• CUGH Research Committee Meeting

7:00am – 8:00am | Embassy

• CUGH Education Committee Meeting

7:00am – 8:00am | Fairchild East

• Capacity Building Subcommittee Meeting (part of the CUGH Education Committee)

7:00am – 8:00am | Holmead West

• Global Oral Health | Interest Group Meeting

12:45pm – 2:15pm | Fairchild East

• Accurate Diagnosis: Roles for Surgery, Anesthesia, Pathology, Radiology, Accute Care and Others

1:30pm – 2:30pm | Holmead East

SUNDAY, APRIL 9, 2017

• CUGH Advocacy & Communications Committee Meeting

7:15am – 8:15am | Embassy

• Educational Products Meeting Subcommittee (part of the CUGH Education Committee)

7:15am – 8:15am | Fairchild West

• Undergraduate/Graduate Subcommittee Meeting (part of the CUGH Education Committee)

7:15am – 8:15am | Fairchild East

MIX & MINGLE, INFORMATION RESOURCES

FRIDAY, APRIL 7, 2017

• CUGH Membership Committee & Program Advisory Service

12:45pm – 1:45pm | Holmead West

An opportunity to meet new friends and learn about CUGH membership and mentorship programs for faculty heading new academic global health programs.

Snacks and refreshments will be served.

• Solutions for Tracking Overseas Funding Opportunities (host: DevelopmentAid)

12:45pm – 2:15pm | Embassy

For Universities & Organizations: Learn about online business intelligence tools and best practices in the identification of funding opportunities.

For Academic Institutions, Students and Alumni: Discover cutting-edge career search tools to secure a job in the international development field via the biggest development information platform.

Short presentation, Q&A.

SATELLITE SESSIONS APRIL 7-9, 2017

FRIDAY, APRIL 7, 2017

COMMUNITY HEALTH IN THE SDG ERA

1:30pm – 2:30pm | Gunston | host: Maternal and Child Survival Program

This session will set the stage for advancing community health policies and programs within the context of primary care systems as a foundation for driving community engagement in the new UN Global Strategy for Women, Children and Adolescents Health. Speakers will characterize the roles of communities as resources in systems to achieve the SDG goals in health and highlight how some countries are working towards sustaining and scaling up partnerships with communities.

Presentations and Q&A. Pre-registration is not required.

SATURDAY, APRIL 8, 2017

THE GHFP-II AND CUGH RECENT GRADUATE STUDY

12:45pm – 2:00pm | Cabinet | hosts: GHFP-II, CUGH

This session will discuss the results from the GHFP-II and CUGH Recent Graduates Study. The study aimed to better understand the experiences of recent graduates from master's level global health programs when seeking jobs and the fit of graduate program curricula and workplace demand. Attendees can expect to leave with clearer expectations for transitioning into the global health workforce and new tools and resources to gain in-demand skills.

Presentations and limited box lunches. Pre-registration required at: <http://bit.do/RecentGradStudy>

SUNDAY, APRIL 9, 2017

HOW TO TELL YOUR GLOBAL HEALTH STORY (SO PEOPLE HEAR IT)

4:30pm – 6:00pm | Monroe | hosts: Pulitzer Center on Crisis Reporting & Global Health Now

Immediately following this year's CUGH conference closing, please join the Pulitzer Center on Crisis Reporting, an international journalism organization, and Global Health NOW from the Johns Hopkins Bloomberg School of Public Health for our popular workshop on tips and tools for engaging the news media. Alongside global health journalists and communications specialists, participants will learn the skills needed to pitch a story, translate to a lay audience, and make both traditional and nontraditional media work for you.

Interactive session, experts Q&A. Pre-registration is not required.

SATELLITE SESSIONS PRE-CONFERENCE

Hosted by Georgetown University
- **Non-Communicable Diseases in LICs: A Neglected Global Catastrophe**
Hosted by Centers for Disease Control; Makerere University
- **Global Surgical Ecosystem: Strengthening Healthcare Worldwide**
Hosted by American College of Surgeons Operation Giving Back; The G4 Alliance; University of Utah; WHO
- **5th Annual Symposium on Global Cancer Research: Integrating Cancer Research for Improved Global Health**
Hosted by National Cancer Institute of the NIH (location: NIH Campus, Bethesda, Maryland)

2017 PULITZER-CUGH GLOBAL HEALTH FILM FESTIVAL

The Pulitzer Center for Crisis Reporting and CUGH are pleased to present a series of eight outstanding short documentaries by Pulitzer Center journalists on Saturday April 8 from 6:30pm to 8:30pm in International Ballroom East. Some of the documentary filmmakers will be present to discuss their work and how to use visual journalism to impact global health issues. There will also be an audience Q&A.

Moderator: Evey Wilson, Associate Producer, Pulitzer Center, USA

Mist and Mystery: Deforestation

Kent Wagner, Filmmaker, Pulitzer Center Student Fellow, USA

The ecological devastation of Malaysia and Indonesia involves illegal logging, slash and burn agriculture, mining, palm oil cultivation, habitat loss, and climate change. Palm oil production is at the center of Borneo's deforestation. In Indonesia alone oil palm plantations grow by about 300,000 hectares—or an area about half the size of Delaware each year. It is estimated that the country has lost 31 million hectares of forests since 1990. In his film, Kent Wagner details the issues of climate change and limiting natural resources as a direct result of this deforestation.

Film link: <http://pulitzercenter.org/reporting/mist-and-mystery-deforestation>

Pumped Dry: The Global Crisis of Vanishing Groundwater

Steve Elfers, Filmmaker, USA TODAY, USA

Much of the planet relies on groundwater. And in places around the world so much water is pumped from the ground that aquifers are being rapidly depleted and wells are going dry. As these critical water reserves are pumped beyond their limits, the threats are mounting for people who depend on aquifers to supply agriculture, sustain economies, and provide drinking water.

Even as satellite measurements have revealed the problem's severity on a global scale, many regions have failed to adequately address the problem. Aquifers largely remain unmanaged and unregulated, and water that seeped underground over tens of thousands of years is being gradually used up.

This video investigates the consequences of this emerging crisis in Kansas

Film Link: <http://pulitzercenter.org/reporting/pumped-beyond-limits-many-us-aquifers-decline>

A Widow's Torment

Amy Toensing, Producer and Videographer, USA
Kathryn Carlson, Producer, Videographer, and Editor, National Geographic, USA

In some parts of the world, a husband's death brings his widow not only personal grief but also a new life of extraordinary hardship, poverty, powerlessness, and abuse. In Uganda, widowed women can suffer a multitude of injustices: They can be forced out of their homes, robbed of everything they own, made to marry a brother-in-law, physically attacked or harmed—even their children can be taken away from them. These offenses stem from traditional Buganda culture, where women would never be able to own or inherit land. And while the Ugandan Constitution grants equal rights to men and women, people in rural areas continue to take advantage of these women with little fear of consequences.

This is the story of Betty Nanozi, who was widowed just three weeks after her son, John Paul, was born. Over the 11 years of her widowhood, she describes how her husband's children from a previous marriage (all adults) robbed her of everything twice, even threatening the life of her son (their half brother.) Now, with the help of attorneys, social workers, and criminal investigators from the International Justice Mission, Nanozi is fighting back.

Film Link: <http://pulitzercenter.org/reporting/ugandan-widows-relatives-stole-everything-now-shes-fighting-back>

The Next Frontier in Mining: Deep Sea Exploitation in the Pacific

Sarah Fahmy, Filmmaker, Pulitzer Center Student Fellow, USA

As the hunt for resources intensifies across the globe, international companies are now looking to the ocean for a new source of exploitation: deep-sea underwater mining. Minerals worth millions of dollars can be found thousands of meters underwater—subsequently, the world has begun staking claims of the seabed. However, the proposed mining process appears to be destructive and there are many effects of mining that we cannot anticipate. Sarah Fahmy explores the emerging industry of deep-sea mining and its potential impact on our oceans.

Film Link: <http://pulitzercenter.org/reporting/next-frontier-mining-deep-sea-exploitation-pacific>

Why the South Is the Epicenter of the AIDS Crisis in America

William Brangham, Correspondent, PBS NewsHour, USA

Jason Kane, Producer, PBS NewsHour, USA

“90-90-90”: These numbers were a major subject of discussion among participants at the 21st International AIDS Conference held during July, 2016 in Durban, South Africa. Participants asked how countries could meet the targets set forth by the Joint United Nations Programme on HIV/AIDS: 90 percent of people living with HIV will know their status; 90 percent of those with a diagnosed HIV infection will start on antiretroviral (ARV) drugs; and 90 percent of those receiving antiretroviral treatment will be virally suppressed.

The epicenter of the AIDS epidemic in America is Atlanta and the southeast, and among the hardest hit populations are gay and bisexual black men. According to the CDC, half of them will be diagnosed with HIV in their lifetimes if current trends continue. In order to reverse this trend, the Fulton County Task Force on HIV/AIDS is formalizing a plan to end AIDS in the region. Pulitzer Center grantees William Brangham, Jon Cohen, and Jason Kane report on this topic as part of their PBS NewsHour series “The End of AIDS?”

Film link: <http://pulitzercenter.org/reporting/why-south-epicenter-aids-crisis-america>

Aboard the Floating Hospital

Nikita Sampath, Filmmaker, Pulitzer Center Student Fellow, USA

In northern Bangladesh, fine silt from the river Bramhaputra accumulates into small floating islets that form and disintegrate every few years. These islets, known as chars, are fertile lands and are inhabited by farming families. Owing to the fleeting nature of these islets, the government finds it impossible to build permanent structures like schools and hospitals on them. In order to provide healthcare for the char people, the Friendship NGO has established floating hospitals. Patients are treated for cataracts and dental problems and can be screened for diseases such as cervical cancer aboard these medical boats.

Film link: <http://pulitzercenter.org/reporting/aboard-floating-hospital>

Using Morphine To Stay Alive

Atish Patel, Filmmaker, India

In India, as in much of the world, the death of a terminally-ill or elderly person is often approached as a medical failure, not a normal and inevitable course of life. And global health systems continue to promote costly treatments for often just a few extra days of low-quality life.

But medical professionals and citizens in Kerala, the southernmost tip of India, decided to put quality—not quantity—of life at the center of their health policy. For the past 20 years they have built this philosophy into an extensive palliative care program that ensures chronically ill and dying patients a more peaceful and painless end.

These policy reforms drastically impacted the life of 55-year-old Zubair who had a series of amputations to his right leg as treatment for a bone tumor. Continuing to live in agonizing pain even after being cured, he has been taking morphine for more than 20 years and claims “morphine restored me back to life.”

Film link: <http://pulitzercenter.org/reporting/using-morphine-stay-alive>

The Role of Visual Journalism in Global Health

Evey Wilson, Associate Producer, Pulitzer Center, USA

Pulitzer Center grantee David Rochkind discusses the role of visual journalism in the field of global health. He highlights how health professionals, researchers, and journalists can work together to disseminate information about important health topics to the public. Visual journalism can engage people by providing a face to an issue and create an entry for the general public to explore scientific research and data.

CUGH LEADERSHIP AWARDS
SATURDAY, APRIL 8, 1:30PM - 2:30PM, INTERNATIONAL BALLROOM EAST

CUGH DISTINGUISHED LEADERSHIP IN GLOBAL HEALTH AWARD

ERIC P. GOOSBY, MD

Professor of Medicine
Director, Center for Implementation Sciences
Global Health Sciences, University of California, San Francisco
MacArthur Foundation Chair in Global Health Sciences
UN Special Envoy on TB
U.S. Ambassador-at-Large (ret.)

Dr. Eric P. Goosby is an internationally recognized expert on infectious diseases. He currently holds a Distinguished Professorship at UCSF and the MacArthur Foundation Chair in Global Health Sciences. He began his career treating HIV/AIDS patients at San Francisco General Hospital as part of the early leadership responding to HIV in San Francisco and across the US. In 1991, he served as the U.S. Department of Health and Human Services (HHS) founding Director of the Ryan White CARE Act, a program that brought care and treatment services to 52 epicenter cities and all 50 states. This was the first action from the U.S. government providing resources to HIV impacted communities after a decade of locally resourced responses. He was later appointed as Director of the Office of HIV/AIDS Policy at HHS under Secretary Donna Shalala. He also served in the Clinton White House as Acting National AIDS Policy Director for two years and later as Deputy Director for Science. After working in the Clinton Administration, he returned to UCSF and founded the Pangaea Global AIDS Foundation in conjunction with the San Francisco AIDS Foundation, focused on creating HIV treatment services in developing world settings.

In 2009, Dr. Goosby was appointed by President Barack Obama to be Ambassador-at-Large in the U.S. State Department and the Global AIDS Coordinator, charged with the implementation of the U.S. President’s Emergency Plan for AIDS Relief (PEPFAR). Dr. Goosby also served as Founding Director of the State Department’s Office of Global Health Diplomacy, placing global health on the agenda of every U.S. Ambassador as a tool of soft power diplomacy.

In 2015, Dr. Goosby was asked by UN Secretary-General Ban Ki-moon to be the UN Special Envoy on Tuberculosis. In this role, he works to raise awareness of TB and help implement known solutions to address the critical problem of increasing deaths worldwide from this curable disease.

Dr. Goosby holds an M.D. from the University of California, San Francisco, where he attended Medical School and did his Internal Medicine internship, Residency and Fellowship. He completed a Fellowship in General Internal Medicine at UCSF focused on Faculty development and clinical Infectious Disease, sponsored by the Kaiser Family Foundation. He has extensive publications in clinical medicine, clinical guideline development, program implementation, and policy issues in both domestic and international arenas. He is an elected member of the National Academy of Medicine.

CUGH HALL-SEWANKAMBO MID-CAREER GLOBAL HEALTH AWARD

AMI S. BHATT, MD, PHD

Assistant Professor of Medicine and Genetics, Stanford University
Director of Global Oncology, Stanford Center for Innovation in Global Health
Co-founder & Vice Chair of the Board of Directors, Global Oncology, Inc.

Dr. Bhatt is a physician scientist and Assistant Professor of Medicine and Genetics at Stanford University. A 2014 ASH Scholar and 2016 Damon Runyon Clinical Investigator Award Winner, she currently leads a translational laboratory group (bhattlab.com) in the Departments of Medicine and Genetics at Stanford University. The goal of the Bhatt lab is to understand the relationship between the

human microbiome and the noncommunicable diseases such as cancer and cardiometabolic disorders.

In addition to her academic efforts, Dr. Bhatt is committed to improving cancer care, education and research in resource-limited settings. She is the Director of Global Oncology for the Stanford Center for Innovation in Global Health and has also served as a visiting lecturer at the University of Botswana and Tokyo Medical and Dental University. At Stanford, she has worked across disciplines to help support Stanford's first health hackathon (health++) and facilitate training opportunities for undergraduates, medical students, residents and fellows in Global cancer. She, along with Franklin Huang, is a co-founder of the non-profit organization Global Oncology (<http://globalonc.org>). GO spearheads creative, multi-disciplinary projects focused on improving cancer outcomes in impoverished settings. These projects range from online tools such as the "GO Map" (<http://gcpm.globalonc.org>) that improve connectivity among global cancer advocates, researchers and care providers to graphical cancer education materials geared toward low literacy communities.

CUGH HALL-SEWANKAMBO MID-CAREER GLOBAL HEALTH AWARD

JONNA MAZET, DVM, MPVM, PHD

Professor of Epidemiology and Disease Ecology
Executive Director, One Health Institute, UC Davis

Dr. Jonna Mazet earned her doctorate of veterinary medicine, masters of preventative medicine, and her PhD in epidemiology from UC Davis. In addition to her faculty appointment in the Department of Medicine and Epidemiology in the UC Davis School of Veterinary Medicine, she serves as the Executive Director of the UC Davis One Health Institute (OHI). Dr. Mazet specializes in emerging infectious diseases and wildlife epidemiology, and as director of OHI, focuses on global health problem solving.

In her role at UC Davis, she assists government agencies and the public with emerging health challenges, and is active in international One Health research programs such as tuberculosis in Africa, novel pathogen detection in less developed countries, and pathogen pollution of California coastal waters. Dr. Mazet founded California's Oiled Wildlife Care Network (OWCN), the premier model wildlife emergency management system worldwide, and remains a consulting expert on wildlife emergency preparedness and response, serving on multiple government and NGO advisory panels.

Dr. Mazet is the Principal Investigator and Global Director of the novel viral emergence early warning project, PREDICT, that has been developed with the US Agency for International Development's (USAID) Emerging Pandemic Threats Program. PREDICT is a \$175 million multi-institutional, transdisciplinary project in 31 developing countries that is contributing to global surveillance for emerging viral

pathogens using geospatial modeling, genomics, molecular virology, epidemiology, and targeted field studies. She leads a network of global NGOs and governmental agencies to build capacity within the PREDICT-engaged countries to develop surveillance systems and complete the necessary research to halt the next pandemic, like influenza, SARS, Ebola, and HIV that have preceded the program.

"Predicting where new diseases may emerge from wild animals, and detecting viruses and other pathogens before they spread among people gives us the best chance to prevent new pandemics," said Mazet. In 2013, she was elected to the National Academy of Medicine in recognition of her successful and innovative approach to emerging environmental and global health threats.

CUGH-WASSERHEIT YOUNG LEADER AWARD

CLAUDEL PÉTRIN-DESROSIERS

Medical Student
University of Montreal
IFMSA-Quebec President 2012-2014

Claudiel Pétrin-Desrosiers is a medical student at the University of Montreal. She is the past vice-president of the International Federation of Medical Students' Associations (IFMSA), the world's largest and oldest medical students group, where she has been the voice of 1,3 million students. She has worked for the World Health Organization on climate change and health-related issues, and has successfully advocated for the inclusion of health in the COP21 Paris Agreement.

She served two years as national president of IFMSA-Quebec, a student-run organization mobilizing and raising awareness among medical students around the social, cultural and global aspects of health. During her terms, she has built capacity in advocacy, policy making and strategic management; and has lead several delegations to international conferences. Additionally, has organized numerous training and workshops around the world on global health, sustainable development, climate change, and leadership.

Over the past few years, she developed an interest in how to best use communication to sustain dialogue across borders, positively share ideas and opinions, and feed social change. She is the spokeswoman for Stories for Humanity, a Montreal-based participatory media, leading twice a year, a public discussion around one major social issue, through online platforms, printed publications and meaningful events. Past issues were on education, refugees and health. Furthermore, she frequently writes about political, societal and youth issues through her permanent blog on the Huffington Post and others national media.

Recently, she worked with Indigenous Peoples on environmental health, with research projects based in Nunavik and Eeyou Istchee in Quebec's Nordic regions. She is interested in pursuing a career in public health, and in deepening her understanding of law, politics, and economics. She recently was elected as chair of a congress that will welcome 1,200 international medical students and residents in August 2018 to Montreal.

As a speaker for the WUSC International Forum and Amnesty International, she wants to ignite passion for change and health equity, and inspire others to pursue their passions. Claudel doesn't intend to simply become a doctor, she wants to understand, act sustainably, and prompt others to do likewise.

KIZITO SAMUEL

Epidemiologist, Makerere University College of Health Sciences

Kizito Samuel holds an M.B.Ch.B, Master’s degree in Clinical Epidemiology and Biostatistics both from Makerere University and a global health fellowship from Yale University. He is an epidemiologist with Uganda Tuberculosis Implementation Research Consortium (U-TIRC) at Makerere University College of Health Sciences. His research interest is in redcing the inequality with regards to neglect of pediatric Tuberculosis especially in resource-limited settings. He pursued his Global Health Equity Scholars fellowship at Makerere and Yale University through a NIH/Fogarty International Centre grant through Berkeley University. His study aimed to evaluate the quality of diagnosis of pediatric tuberculosis and adherence to the standard guidelines as barriers to quality TB evaluation in children in Kampala. He has done spear headed numerous advocacy projects including Hepatitis B vaccination for all medical students, blood donation schemes, and breast cancer screening at Makerere University.

He is currently working under a USAID funded pediatric TB project at UTBSP (PI, Dr. Achilles Katamba) that aims at identifying barriers against diagnosis of TB among children in Kampala, generating and later evaluating interventions towards these barriers. He completed a pediatric TB project where he assessed the impact of a standardized approach to diagnosis of pediatric TB on case notification, and delay in initiating TB treatment in Kampala city. He has received several awards including a scholarship from University of California San Francisco-University of California Berkeley and Makerere University (UCSF-UCB-MU) collaboration under Fogarty, through Pulmonary Complications of AIDS Research Training (PART) Program to pursue masters’ training. He won a distinguished student’s award as the most outstanding undergraduate medical student at Makerere University College of Health Sciences in 2009/2010. He was awarded a scholarship for under-graduate students’ exchange program to Yale University USA in 2011 for his outstanding academic performance. He won a NIH funded Medical Education for Equitable Services to all Ugandans- Medical Education Partnership Initiative (MESAU-MEPI) research grant as a sub-awardee. He was listed on the prestigious vice-chancellor’s list at the undergraduate and post-graduate level having attained first class degree at both levels. He won a national scholarship from the government of Uganda for outstanding academic performance at high school to pursue his university education.

Awardees and honorees will be recognized during the annual Awards Ceremony on April 8, 1:30pm to 2:30pm in the International Ballroom Center. All conference participants are welcome to attend.

VELJI/CUGH AWARDS FOR GLOBAL HEALTH

Honorees will each be presented with plaques recognizing their achievements and \$750 to support their ongoing work.

Awardees:

VELJI EMERGING LEADER IN GLOBAL HEALTH INNOVATION (STUDENT OR TRAINEE)

Laila Soudi, Global Mental Health Researcher, Stanford University

VELJI EMERGING LEADER IN GLOBAL HEALTH INNOVATION (FACULTY)

Inon Schenker, PhD, MPH, Faculty and Co-Director, Global Health Program. Ben-Gurion University of the Negev, Beer-Sheva, Israel

VELJI GLOBAL HEALTH EDUCATION AWARD

Cynthia Howard, MD, MPHTM, Associate Professor of Pediatrics, University of Minnesota

VELJI YOUNG AFRICAN LEADER AWARD

Tanya Orié Rogo, MD, MPH & TM, FAAP, Assistant Professor of Pediatrics, Brown University; Associate to Head of Department, Department of Pediatrics, University of Rwanda

REFLECTIONS ESSAYS

Writings of the three winners and five honorable mentions will be featured in Session CS12 Reflections in Global Health 2017 Essay Contest Reading and Discussion, April 7, 4:30pm to 6:00pm, in room Georgetown.

Winners:

A CHALLENGE IN GLOBAL HEALTH EDUCATION: DIVERSITY

by Anu Aryal, MPH-GH candidate at University of Washington, USA

JOURNEY TO THE CENTER OF MY HOMETOWN’S FACEBOOK GOSSIP PAGE

by Emily Jetmore, BA in Anthropology, Mount Holyoke College, USA

THE SIXTH SICK CHILD

by Paula Tavrow, Adjunct Associate Professor, Department of Community Health Sciences, UCLA Fielding School of Public Health, USA

Essay Contest Honorable Mentions:

THE FOUL LIQUIDS

by Sarah Bugg, MD candidate, University of Kentucky College of Medicine, USA

WHY ARE YOU DOING GLOBAL HEALTH?

By Jonathan Steer, Instructor, Boston University School of Medicine, Department of Obstetrics and Gynecology, USA

WHEN STORIES ARE ALL WE HAVE

by Pooja Parameshwar, BS in Psychobiology and French, UCLA Social Media Coordinator, Medicine for Humanity

Clinical Research Associate, Department of Surgery, Division of Urology, Cedars-Sinai Medical Center, USA

SHUT UP AND LET THE WOMEN SPEAK

by Mark Darby, Family Nurse Practitioner, University of Nebraska Medical Center College of Nursing, USA

OLUMWA: THE DANGERS OF COMPLACENCY IN GLOBAL HEALTH

by Janel Martir, MD candidate, The Robert Larner College of Medicine at the University of Vermont, USA

LANCET/CUGH STUDENT POSTER COMPETITION FINALISTS

Three abstracts from each of six tracks will compete in the competition based on their reviews by CUGH's scientific committee. These 18 posters are displayed together in the poster hall and will be reviewed by a panel of judges on Friday, April 7. A top poster in each category will be chosen. These six awardees will be recognized during the Awards Ceremony taking place on Saturday, April 8 from 1:30pm to 2:30pm and receive \$500 for continuing global health research from The Lancet. All 18 posters will be displayed on the poster floor for viewing on April 7 and April 8. The competition finalists are listed in the Poster Presentation section.

GLOBAL HEALTH SCIENCE AND PRACTICE

Global Health Science and Practice (GHSP), www.ghspjournal.org is an open access, peer reviewed online journal that focuses on advancing practical solutions to global health problems.

The journal partnered with CUGH to run a competition to identify manuscripts from top scoring conference abstract submissions that will be published in the journal in two categories: 1) PhD and post-doctoral researchers; 2) Undergraduate and Masters Students. One winner will be selected in each category, and announced during the Awards Ceremony on April 8.

CUGH-PULITZER 4TH ANNUAL VIDEO COMPETITION

Communicating clearly and with impact to a broad range of stakeholders is vitally important to attracting attention to problems and influencing changes in policy and human behavior. Prose is one way to do this but another powerful way is through visual means. In an effort to encourage researchers to express their work in a powerful visual medium, CUGH partnered with the Pulitzer Center for Crisis Reporting and developed an annual video competition. Competitors were tasked to convey their work in tight, under five minute, videos in two categories: Advocacy, and Innovation. In the Advocacy category, two winners and an honorable mention were selected; one winner and two honorable mentions are recognized in the Innovation category.

Global Health Advocacy

CO-WINNER: BEST FOOT FORWARD

Link: <https://vimeo.com/153389735>

Description: Podoconiosis (podo for short) is a devastating type of elephantiasis spread by long-term exposure to minerals found in highland volcanic soil in the tropics. Podo

causes progressive swelling of the lower legs and makes it difficult or impossible to walk. In addition to great physical pain, the economic consequences and stigmatization are severe. Podo is preventable by avoiding prolonged barefoot contact with irritant soil and treatable through good foot hygiene and wearing shoes. Podo has been reported in more than 15 countries across Africa, Southeast Asia and Latin America affecting an estimated six million people in poor rural communities worldwide - more than three million in Ethiopia alone. Eliminating podo is an achievable goal. The animated video, BEST FOOT FORWARD, depicts the source, treatment and prevention of podo and was produced this year in partnership with Ripple Effect Images, a group of National Geographic contributing photojournalists. Visit www.podo.org.

Video Credits: Charles Belt, Writer; Karelli Cabral, Producer; Nacho Corbella, Producer; Gail Davey, Content Supervisor; Annie Griffiths, Executive Producer; Al Kalman, Content Supervisor; Mauricio Rodríguez, Graphics & Animation; Wendy Santis, Content Supervisor; Ricardo Weibezahn, Storyboard

CO-WINNER: KIDS AGAINST MALARIA

Link: <https://www.youtube.com/watch?v=mVhs1nIhaBM&t=8s>

Description: In 2015, malaria caused approximately 438,000 deaths with 214 million new cases reported. Although progress to control and eradicate malaria has been made, 95 countries and territories still have ongoing transmission, leaving half the world's population at risk. The fight against malaria is at a critical juncture – with coordinated efforts, this deadly killer can be defeated. To increase awareness and educate people about prevention and treatment, students at the International Center of Art and Music (CIAMO) in Benin wrote a song about malaria. The passion and talent displayed by these young advocates caught the attention of documentarian Sarah duPont and musician/filmmaker Jon Fine, who lent their skills to produce a music video called “Kids Against Malaria.” The video features lyrics written and sung by CIAMO students, musical accompaniment by Beninese musicians, lead vocals by Grammy-award winner and UNESCO Goodwill Ambassador Angélique Kidjo, and is available in English/French.

Video Credits: Amazon Aid Foundation, Angélique Kidjo, Art and Abolition, The Batonga Foundation, Centers for Disease Control and Prevention, Harvard University's Defeating Malaria: From the Genes to the Globe Initiative, International Center of Art and Music at Ouidah (CIAMO) in Benin, Jon Fine Films, Partnerships for Change, The Peace Corps, UN Foundation Nothing But Nets Campaign, UNICEF, United States Department of State, United States Embassy in Benin, United States President's Malaria Initiative

HONORABLE MENTION: 10,000 HAPPY BIRTHDAYS

Link: <https://youtu.be/ssoJk8XjBvc>

Description: In most of the world, the day of birth is a day of celebration, but in the world's poorest countries, it is a very different situation. This is a short film about the 10,000 Happy Birthday project in Malawi and Zambia by the International Confederation of Midwives (ICM) and sponsored by Laerdal Global Health. The project aims to train 10 000 midwives and other MNCH health care providers in Helping Mothers Survive-Bleeding After Birth (HMS-BAB) and Helping Babies Breathe (HBB), facilitate institutionalisation of these skills-training into pre-service and in-service midwifery education in the two countries and build capacity of the midwives associations, AMAMI and MAZ, to conduct projects of a similar nature in the future.

Video Credits: Laerdal Global Health, International Confederation of Midwives

Innovations in Global Health

WINNER: THE STORY OF CHOLERA

Link: <https://www.youtube.com/watch?v=jG1VNSCsP5Q>

Description: This video saves lives. Creative, powerful, and clear, The Story of Cholera helps communities understand how cholera is spread and steps they can take to prevent it. By making the invisible cholera germs visible, this animated narrative brings to life the teaching points of cholera prevention. The film integrates many different issues to show the causal links between human behavior/actions and the onset of disease. These connections are made obvious to achieve an “aha!” effect that can change behavior. Originally developed to assist with education during the Haitian cholera epidemic in 2010, it is now used all over the world for cholera prevention and to teach sanitation and hygiene practices. Examples include: West Africa 2012, widely adopted by aid agencies; refugee camps, Lebanon (Solidarités International) and the Thai-Myanmar border (FilmAid); national TV, in Namibia and Tanzania (UNICEF); cholera treatment centers, Sierra Leone (MSF). The film is available in over 30 languages.

Video Credits: Director: Yoni Goodman. Producer: Deborah Van Dyke. Story: Deborah Van Dyke, Yoni Goodman. Design: Yoni Goodman. Animation: Yoni Goodman, Sefi Gayego. Music and sound effects: Uri Kalian. Special thanks: Mark Binder, Peter Cardellicchio, Ron Koss.

HONORABLE MENTION: POSTPARTUM HEMORRHAGE MANAGEMENT IN HOME DELIVERY SETTINGS IN CHITRAL, PAKISTAN

Link: <https://www.youtube.com/watch?v=uhIYAqU7N-M>

Description: Postpartum hemorrhage (PPH) is the largest cause of maternal mortality globally. The majority of these deaths occur in low resource settings, where infrastructure

and health staff are limited, rendering it imperative to consider PPH treatment options that do not require administration by a skilled provider or a cold chain. One such option is misoprostol, a prostaglandin E1 analog, that has shown to be effective in treating PPH. However, there is little data on the use of misoprostol for this indication at the community level, where it is likely to be most beneficial. A recent research project conducted in Chitral district in Khyber Pakhtunkhwa province, Pakistan, provided traditional birth attendants (TBAs) with misoprostol to prevent and treat PPH. The video highlights the use of misoprostol by TBAs in this challenging environment, and discusses the thoughts of health care providers on access to obstetric services in Chitral, as well as the potential benefits of this approach.

Video Credits: Gynuity Health Projects; Aga Khan Health Service, Pakistan; Sibtain Shabbir (Red Rabbit Productions)

HONORABLE MENTION: BAYLOR GLOBAL INITIATIVES SMART POD

Link: <https://youtu.be/q7CtRV54RRw>

Description: The Smart Pod is a low cost, innovative, and rapidly deployable clinical solution. It is a clinical facility that is setup in under 5 minutes with 4 people and can quickly scale up for emergencies (infectious disease outbreaks or natural disasters) when there is no healthcare facility, or to augment already existing facilities. The Pod is optimized for infection control. It's tablet-based education and training apps and robust patient tracking and communication systems within the unit improve patient care and protect providers working in the unit.

Video Credits: Baylor Global Initiatives, Baylor College of Medicine Office of Communications

THE 2017 UNTOLD GLOBAL HEALTH STORIES CONTEST

Sponsors: CUGH, NPR's Goats and Soda blog, and Global Health NOW of the Johns Hopkins Bloomberg School of Public Health.

The 2017 Untold Stories of Global Health contest is designed to give a platform to important but underreported global health stories. This year's contest drew over 180 submissions, and two ideas were selected as winners. Deafness in developing countries, proposed by Dr. Christy Batamula, and by Matthew Yau, will be featured by NPR's Goats and Soda, while Global Health NOW will send a journalist to Nepal to document the issue of unintentional burns, and idea submitted by Emaline Laney.

ISSUE SELECTION BY NPR

Submitted by Dr. Christy Batamula, Gallaudet University, USA

Deafness is a huge global health epidemic, particularly in Tanzania. In Dodoma, the capitol, there are many children and adults who are deaf. Many become deaf due to illness

and lack access to appropriate medical care. In the Dodoma Region, only about two percent of school aged children who are deaf are attending school. Therefore, many are left without any access to formal language or education, making them more susceptible to a life of poverty and dependence on hearing family or caretakers in their villages. There is a negative stigma associated with being deaf that results in higher levels of abuse. There is a high need for education and vocational training for the deaf in this region. This would empower more deaf to be self sufficient and no longer at the mercy of others to survive."

Also submitted by **Matthew Yau**, Student, McMaster University, Canada

"In developed nations, health care practitioners are fully equipped with surgical interventions, early screening techniques, and other resources for the deaf. In fact, some in the deaf community view their deafness as a difference that should be celebrated, rather than a disability to be ashamed of. This perspective and access to resources is not shared in developing countries. Studies have demonstrated that developing countries are unable to implement thorough screening processes and provide crucial coping techniques, like sign language. Many deaf citizens in developing countries are unable to attend school, are illiterate, and are unable to find work. Moreover, they are often shunned from civilization due to the lack of knowledge regarding deafness. Every challenge presented to the deaf in developed countries is magnified a thousandfold in developing nations. Sign language programs, information distribution, and widespread

screening needs to be implemented to help this hidden vulnerable population.

ISSUE SELECTION BY GLOBAL HEALTH NOW

Submitted by **Emaline Laney**, 2016 MSc Candidate, London School of Hygiene and Tropical Medicine, UK

"My journey to study cholera quickly shifted as I found myself in a Nepali O.R. with a team of plastic surgeons watching a burn-contracture-release of a child's arm. This is a story about burns – the forgotten global health issue. Despite preventability, serious burns affect 11 million people annually, causing 265,000 deaths just due to fire (WHO). Low-income countries are disproportionately affected, encompassing 95% of the global burden. Nepal alone suffers from over 2,000 annual deaths due to burns; that is more than those with HIV, TB, or Malaria. Burns are also the second leading causes of disability, resulting in economic and psychological ramifications at the individual and population level. One major factor is that nearly 2/3 of Nepal's population still relies on open fire. Inevitably, women and children are at high risk. Increasing burn prevention and acute first-aid burn education is key to avoid unnecessary suffering and loss of life."

Johns Hopkins Bloomberg School of Public Health
Health Systems Summer Institute

June 12 – 23, 2017

Short-term courses designed for early- to mid-career professionals looking to enhance their skills in a variety of health systems areas, including:

- Injury/trauma surveillance
- Health systems modeling
- Monitoring and evaluation
- Gender analysis
- Primary health care
- Qualitative methods

Courses

- Hospital-based injury/trauma surveillance
- Gender analysis within health systems research
- Designing transformative innovation for global health
- Managing district health systems
- Improving quality in public health practice
- Applying summary measures of population health to improve health systems
- Evaluation plans for primary health care projects
- Health systems modeling
- Household surveys for evaluation of primary health care programs
- Using qualitative methods for program planning and evaluation
- Monitoring and evaluation of health systems strengthening

All courses held at the Johns Hopkins Bloomberg School of Public Health in Baltimore, MD

Accreditation Statement

This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of Boston University School of Medicine (BUSM) and The Consortium of Universities for Global Health. BUSM is accredited by the ACCME to provide continuing medical education for physicians.

BUSM designates this live activity for a maximum of 18.75 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

The Royal College of Physicians and Surgeons of Canada - All live conferences or live courses held outside Canada can be reported as accredited group learning activities under Section 1 of the MOC Program if they are developed by a university, academy, college, academic institution or physician organization.

Target Audience

The target audience of this activity includes global health professional, teachers, students and other stakeholders representing a diverse array of disciplines and specialties with focus on global health service, education and research.

Educational Objectives

Upon completion of this activity, participants will be able to apply lessons learned in global health to:

- * Improve treatment and prevention for HIV/AIDS prevention
- * Reduce the burden of disease globally, and in particular understand the importance of NCDs
- * Improve access to, or lack of, health for underserved populations in resource-rich, and -poor, areas.
- * Address challenges of implementing sustainable behavioral changes, and how to address them in program design and execution.
- * Integrate social determinants of health into the understanding of colleagues, organizations, or trainees
- * Apply new paradigms to the health system.
- * Raise patient awareness of the interplay between environment and health, impact of climate change, interplay of animal health, plant health and human health
- * Understand the interplay between the environment, human health and emerging infectious diseases.
- * Apply prevention, diagnostics and treatment protocols effective in low resource settings against NCDs and IDs.

Needs Addressed Statement

There is considerable interest in global health among the health professional schools, students and practitioners. Much of this is driven by the desire to address disparities in health care in low and middle income countries. All too often, the knowledge base underpinning practice and implementation of programs is limited. By making research in global health topics a principal goal of the meeting we will help to identify where knowledge gaps exist and the opportunities to generate better evidence based policies and programs.

Disclosure Policy

Boston University School of Medicine asks all individuals involved in the development and presentation of Continuing Medical Education (CME) activities to disclose all relationships with commercial interests. This information is disclosed to CME activity participants. Boston University School of Medicine has procedures to resolve any apparent conflicts of interest. In addition, faculty members are asked to disclose when any unapproved use of pharmaceuticals and devices is being discussed.

CME COURSE ADVISOR

Muhammad Zaman, PhD, Associate Chair for Undergraduate Studies, Biomedical Engineering, Professor, Biomedical Engineering

The Planning Committee for this activity included Naomi Moeller, Boston University School of Medicine Office of CME, and Karen Lam of Consortium of Universities for Global Health.

The Course Director and members of the Planning Committee have no relevant financial relationships with ACCME-defined commercial interests.

The faculty members listed below provided the following disclosure information and indication where they plan on discussing unlabeled uses of a commercial product:

Pamela Collins, MD, MPH

Spouse is an employee of Lentigen Technology, Inc., a Miltenyi Biotec Company

Ezekiel Emmanuel, MD, PhD

Faculty member is an investment partner in Oak HC/FT and a stockholder in Nuna

Edward Rubin, MD, PhD

Faculty is an employee/stockholder in Metabiota

Kamran Siddiqi, MBBS, MPH, MRCP, FFPH, PhD

Faculty member has received grant/research support from Pfizer

All other faculty members participating in the accredited component of this program have no relevant financial relationships with ACCME-defined commercial interests and do not plan on discussing unlabeled uses of a commercial product.

A full list of faculty can be found in the conference guide.

All other faculty members participating in the accredited component of this program have no relevant financial relationships with ACCME-defined commercial interests and do not plan on discussing unlabeled uses of a commercial product. A full list of faculty can be found in the conference guide.

CME Certificates

All plenary and breakout sessions with the exception of oral abstract presentation sessions and satellite sessions are accredited.

To claim credit:

Go to <http://bucme.org/getcredit> (Note that you cannot claim credit until the program has finished.)

1. Please type in MLN17059 into the search field and press enter
2. Click on “Proceed to credit”
3. Create an account or log in with your user name and password if you already have one.
4. At the next screen, click continue using get credit
5. Follow the online instructions to complete your evaluation, claim your hours and print and/or save your certificate.

For further assistance, please contact the Boston University School of Medicine Office of Continuing Medical Education at cme@bu.edu or (617) 638-4605.

For Physician Assistants:

AAPA accepts category 1 credit from AOACCME, Prescribed credit from AAFP, and AMA PRA Category 1 Credit™ from organizations accredited by the ACCME.

For Nurses:

For the purpose of recertification, the American Nurses Credentialing Center accepts AMA PRA Category 1 Credit™ issued by organizations accredited by the ACCME.

Other Health Care Professionals:

A record of attendance (certificate) will be provided to all other health care professionals for requesting credits in accordance with state boards, specialty societies, or other professional associations.

CNE - INSTRUCTIONS FOR PARTICIPANTS IN 2017 CUGH CONFERENCE

This Activity is offered jointly with the Institute for Johns Hopkins Nursing, the Consortium of Universities for Global Health, and Boston University School of Medicine. The Institute for Johns Hopkins Nursing is accredited as a provider of continuing nursing education by the American Nurses Credentialing Center’s Commission on Accreditation.

Cell Phones/Pagers

As a courtesy to our speakers and those around you, turn off your cell phones and pagers or put them on silence or vibrate while the lectures are in progress.

Evaluations

Session and conference evaluations will be sent to you by email after the conference and must be completed in a timely manner. You must complete these evaluations in order to receive contact hours. The evaluations are helpful to us in planning future programs, and we appreciate your comments and suggestions.

How to Receive Contact Hours

To receive contact hours, you must sign in to verify your attendance at the Continuing Nursing Education table before the end of the conference. Session and conference evaluations will be sent to you by email after the conference and must be completed in order to receive contact hours. After the evaluations are complete, you will be sent a

certificate stating the total contact hours you received while attending this program.

Statement of Contact Hours

This 2017 Consortium of Universities for Global Health Conference contact hour Educational Activity is provided by The Institute for Johns Hopkins Nursing.

Conflict of Interest

It is the policy of The Institute for Johns Hopkins Nursing to require our continuing nursing education program faculty and planning committee members to disclose any financial relationships with companies providing program funding or manufacturers of any commercial products discussed in the program.

The following members of the planning committee and program faculty report financial relationships with companies providing program funding and/or manufacturers of commercial products they discuss in the program:

NAME	COMPANY	TYPE OF RELATIONSHIP
Benjamin Anderson	Pfizer & Roche Pfizer	Unrestricted Educational Grants One Time Consultant
Rich Beigi	Novavax	Research Grant
John Clark	Pfizer Pharmaceuticals	Salaried Employee
Pamela Collins	Lentigen Technology, Inc.	Spouse is Salaried Employee
Ezekiel Emanuel	Leigh Bureau Nuna Univ. of Pennsylvania, Oak HC/FT	Member of Speakers Bureau Stock Shareholder Salaried Employee
Eric Goosby	Gilead Global Health Policy Board	Board Member
Doug Lowy	Merck, GlaxoSmithKline, & Indian Immunologicals Ltd	Stock Shareholder
Oluwabunmi Olapade-Olaopa	AXA Mansard Health PLC, Nigeria AXA Mansard Insurance PLC	Consultant Grant/Research Support
Edward Rubin	Metabiota	Salaried Employee; Stock Shareholder
Kamran Siddiqi	Pfizer Pharmaceuticals	Research Grant
Bill Steiger	Pink Ribbon Red Ribbon partners	Provides Research Support to Partners

Commercial Support

This educational activity has not received any form of commercial support.

Off-Label Use

The program faculty has indicated that they do not intend to discuss off-label use of products in this activity.

Responsibility Statement

The Institute for Johns Hopkins Nursing takes responsibility for the content, quality, and scientific integrity of this CNE activity.

The Institute for Johns Hopkins Nursing Mission Statement

The mission of The Institute for Johns Hopkins Nursing is to share the innovations of Johns Hopkins Nursing in practice, education, and research – locally, nationally, and globally.

Our goal in continuing nursing education is to bring you programs that reflect the expertise and creativity of Johns Hopkins Nursing. Our service values are quality, integrity, flexibility, and personal attentiveness. We appreciate your thoughts and welcome your concerns – please feel free to speak with any IJHN staff member or email us: IJHN@jhmi.edu.

CONFERENCE AGENDA 2017 CUGH

FRIDAY, APRIL 7, 2017

8:30 am – 9:00 am
Room: International Ballroom Center
Welcome
Speakers:
Pierre Buekens, CUGH Board Chair
Patricia Davidson, Conference Chair; CUGH Board
Nelson Sewankambo, Conference Chair; CUGH Board
Keith Martin, Executive Director, CUGH

9:00 am – 10:30 am
Room: International Ballroom Center
PS01: PLENARY SESSION
Megatrends in Global Health

The Sustainable Development Goals have superseded the Millennium Develop Goals. However, old threats persist and new ones, from non-communicable diseases to massive environmental degradation and climate change are upon us. Enormous political changes are creating a great deal of uncertainty in the global health community. Yet, in this environment, opportunities exist. This panel of renowned global health leaders will discuss megatrends in global health and opportunities global health practitioners have to impact challenges the world faces.

Moderator: Keith Martin, Executive Director, CUGH, USA
Speakers: Mark Dybul, Executive Director, Global Fund for AIDS, Tuberculosis and Malaria, Switzerland
Patricia Davidson, Dean, School of Nursing, Johns Hopkins University, USA
Victor Dzau, President, National Academy of Medicine, USA
Hester Kloppe, Vice Rector, Stellenbosch University, South Africa

10:30 am – 11:00 am
Rooms: Columbia Foyer & Concourse Foyer
Health Break
Exhibits & Network

11:00 am – 12:30 pm
Room: International Ballroom East
CS01: CONCURRENT SESSION
Measuring the World’s Health: Findings and Lessons from the Global Burden of Disease Collaboration

The annual Global Burden of Disease study quantifies health loss from all major diseases, injuries, and risk factors by age, sex, and population. With more than 2,000 collaborators in nearly 130 nations, the GBD examines

300-plus diseases and injuries and about 80 risk factors in every country studied, as well as subnational assessments. Richard Horton has called the GBD “a very powerful instrument...for transformation socially, economically, and indeed politically.” Join us for an interactive discussion on the GBD, including key results from the latest cycle, policy applications of the study, and the success and reach of this collaborative network.

Moderator: Richard Horton, Editor-in-Chief, The Lancet, UK
Speakers: Christopher J. L. Murray, Director, Institute for Health Metrics and Evaluation, University of Washington, USA
Awoke Misganaw, Clinical Assistant Professor, Institute for Health Metrics and Evaluation, University of Washington, USA
John Newton, Chief Knowledge Officer, Public Health England, UK
Nafsiah Mboi, Envoy of the Asia Pacific Leaders Malaria Alliance, Indonesia

11:00 am – 12:30 pm
Room: International Ballroom West
CS02: CONCURRENT SESSION
Implementation Science: The Signature Science of Global Health

Implementation science is of critical importance to global health. It allows us to address hard questions such as how best to translate new findings into practice in different settings and how and why health interventions lose efficacy over time or sometimes display unintended effects. Extending the reach of implementation science and ensuring its success relies on finding innovative ways to build research capacity enhanced communication between implementation scientists, decision makers and program implementers. These collaborations will be critical to speed the translation of effective interventions into programs and policies and to understanding important questions for implementation science.

Moderator: Nalini Anand, Director, Center for Global Health Studies, Fogarty International Center, NIH, USA
Speakers: Judith N. Wasserheit, Chair, Dept. of Global Health, University of Washington, USA
Peter Cherutich, Deputy Director of Medical Services, Ministry of Health, Kenya
Laura Guay, Professor, Milken Institute School of Public Health, George Washington University, USA
Echezona Ezeanolue, Vice-Chair, Pediatrics Research, University of Nevada School of Medicine, USA
Kathryn Whetten, Director, Center for Health Policy and Inequalities Research, Duke University, USA

11:00 am – 12:30 pm
Room: Lincoln
CS03: CONCURRENT SESSION
Healthy and Sustainable Food Systems for 9 Billion People

How can we ensure that 9 billion people can eat in a healthy, affordable, and sustainable way? The panellists will introduce key challenges that food systems face today

and will discuss potential solutions for nourishing over 9 billion people in 2050. They will touch on environmental sustainability and the role of One Health. Key priorities for policy interventions will be shared.

Moderators: Pauline Scheelbeek, Research Fellow, London School of Hygiene and Tropical Medicine, UK
Jessica Fanzo, Associate Professor of Ethics and Global Food & Agriculture, Johns Hopkins Berman Institute of Bioethics, Johns Hopkins University, USA
Speakers: Francesca Harris, Research Assistant, Nutrition and Sustainability, London School of Hygiene & Tropical Medicine, UK
Juan Lubroth, Chief Veterinary Officer, Food and Agriculture Organization of the United Nations, Italy
Bruce Friedrich, Executive Director, The Good Food Institute, USA

11:00 am – 12:30 pm
Room: Georgetown
CS04: CONCURRENT SESSION
Pedagogical Paradigms in Global Health: An Overview of Theory, Tools, and Innovations

Demand for global health education programs and international field experiences is growing exponentially and global health educators must employ tools beyond traditional didactics to facilitate the transformative learning necessary for their students. In this symposium, members from the CUGH Education Sub-Committees and other academic program directors will describe these specific pedagogical techniques and theories, their successful implementation and will present data on student outcomes. After reviewing these resources, the moderators will discuss the importance of these educational methods in terms of key outcomes and discuss ways they can be incorporated into curriculum design at various levels of learning.

Moderator: Ashti Doobay-Persaud, Assistant Professor of Medicine, Northwestern University, USA
Speakers: Jessica Evert, Executive Director, Child Family Health International, USA
Phuoc Le, Associate Professor, University of California, San Francisco School of Medicine, USA
Kearsley Stewart, Associate Professor, Duke Global Health Institute, Duke University, USA
Anvar Velji, Associate Dean of Global Health, California University of Science and Medicine, USA
Janis P. Tupesis, Graduate Medical Education Liaison, Global Health Institute, University of Wisconsin Madison, USA

11:00 am – 12:30 pm
Room: Monroe
CS05: CONCURRENT SESSION
Oral Abstract Presentations | NCDs & Social Determinants of Health

Moderator: Jeremy Schwartz, Assistant Professor, Yale School of Medicine, USA

- Are the WHO ‘Best Buys’ for NCDs Effective in Low- and Lower-Middle-Income Countries?

Luke Allen, University of Oxford, UK

- Measuring Health Literacy to Advance Global Health Research: A Study in 14 Countries in Sub-Saharan Africa
Douglas Wiebe, University of Pennsylvania, USA
- Home Hospice Program in Nepal: A Low Cost Service in a Low Income Country Through Non-Profit Collaboration
Binay Shah, University of Washington, USA
- Estimating the Potential Effects of Increasing the Tax on Tobacco in Armenia: Results from an Extended Cost Effectiveness Analysis
Iryna Postolovska, Harvard T. Chan School of Public Health, USA

- Implementation of an Integrated Multi-Specialty Poison Control Center in India
Timothy Erickson, Harvard medical School, USA

11:00 am – 12:30 pm
Room: Cabinet
CS06: CONCURRENT SESSION
Oral Abstract Presentations | Governance & Political Decision Making

Moderator: Mireille Aramati, Assistant Professor of Global Health, Tufts University School of Medicine, USA

- Accountability in Malaria Prevention and Treatment Financing Programs: Addressing Current Challenges
Georges Danhouno, York University, Canada

- Post-partum Detention of Insolvent Women and Their Newborns, Lubumbashi, Democratic Republic of Congo, 2016
Abel Ntambue, University of Lubumbashi, Democratic Republic of the Congo
- Decision Makers’ Perspectives on Implementation of Governance Attributes in the Department of Health, Uasin Gishu County, Kenya
Jackline Sitienei, Wits and Moi University, Kenya

- Can a Multi-Stakeholder Initiative Improve Transparency and Accountability in the Pharmaceutical Sector? Evidence from the Medicines Transparency Alliance
Jillian Kohler, University of Toronto, Canada

- Politics and Leadership in Global Health Delivery: Lessons from South Africa’s National HIV and Health Insurance Initiatives
Keri Wachter, Harvard University, USA

11:00 am – 12:30 pm

Room: Columbia 3/4/6

CS07: CONCURRENT SESSION

Health Workers in Conflict Zones: The Nature of the Crisis and What Can be Done

Attacks on health workers and facilities have become alarmingly common in conflicts throughout the world. In 2015, the Safeguarding Health in Conflict Coalition and the World Health Organization showed that such attacks took place in at least 16 countries. In Syria, over the course of the war, 400 attacks on more than 275 health facilities have taken place, and more than 750 health workers have been killed. This session will address the patterns of these attacks, the relationships to civilian casualties generally, the consequences of attacks to both individuals and health systems, and steps the international community has taken and must take to prevent attacks and end impunity for those who commit them.

Moderator: Leonard Rubenstein, Senior Scientist, Johns Hopkins University Center for Public & Human Rights, USA

Speakers: Christine Monaghan, Research Officer, Watchlist on Children and Armed Conflict, USA

Zaher Sahloul, Founder, American Relief Coalition for Syria, USA

Rohini Haar, Adjunct Professor, Research Fellow, Human Rights Center University of California, Berkeley, USA

Leonard Rubenstein, Senior Scientist, Johns Hopkins University Center for Public & Human Rights, USA

11:00 am – 12:30 pm

Room: Columbia 8/11/12

CS08: CONCURRENT SESSION

Confronting Pregnancy in Infectious Disease Epidemics: HIV/AIDS, the Zika Virus, and Beyond

Zika has highlighted the profound devastation that can result from infectious disease occurring in pregnancy. One critical challenge is the lack of quality evidence needed to guide clinicians’ and public health ministries’ decisions on the prevention and treatment of these diseases during pregnancy. Pregnant women are routinely excluded from research trials, for instance on dosing, safety, and efficacy of microbicides, vaccines, and second-generation treatments. This panel of three experts will share ethical pathways to critically needed research in this population. With examples from HIV prevention research and Zika vaccine trials, the discussion will outline ethical approaches and creative trial designs.

Moderator: Carleigh Krubiner, Project Director, Berman Institute of Ethics, Johns Hopkins University, USA

Speakers: Maggie Little, Director, Kennedy Institute of Ethics, Georgetown University, USA

Rich Beigi, Associate Professor, Magee-Womens Hospital, University of Pittsburgh Medical Center, USA

Anne Lyerly, Associate Director, Center for Bioethics, University of North Carolina, Chapel Hill, USA

12:30 pm – 2:30 pm

LUNCH BREAK

Community Health in the SDG Era

This session will set the stage for advancing community health policies and programs within the context of primary care systems as a foundation for driving community engagement in the new UN Global Strategy for Women’s Children’s and Adolescents’ Health. Speakers will characterize the roles of communities as resources in systems to achieve the SDG goals in health and highlight how some countries are working towards sustaining and scaling up partnerships with communities.

2:30 pm – 4:00 pm

Room: International Ballroom Center

PS02: PLENARY SESSION

Where Does Global Health Fit in U.S. Foreign Policy and Security Issues?

High-level US engagement and leadership in global health has steadily become more visible elements of US foreign policy and security interests. These investments are increasingly seen as fundamental to advancing U.S. values and its reputation and influence. However, security is an

uncomfortable bedfellow with humanitarian interests. High-level leadership and oversight within the executive branch can be weak or inconsistent. Threats can come and go, and attention to global health at high levels can vacillate accordingly. Sustained, long-term progress rests on predictable, multi-year budgets and a durable bipartisan consensus in Congress. This panel of senior U.S. government officers will discuss this important topic.

Moderator: Stephen Morrison, Senior Vice President and Director, Global Health Policy Center, Center for Strategic and International Studies, USA
Speakers: William Steiger, Former Director, Office of Global Helath Affairs, U.S.

Amy Pope, Former Deputy Homeland Security Advisor, USA

Eric Goosby, UN Special Envoy for TB, Former Director, PEPFAR, USA

2:30 pm – 4:00 pm

Room: International Ballroom East

PS03: PLENARY SESSION

The Ripple Effect: Promoting Female Leadership in Academic Global Health

Gender equity is severely lacking in global health leadership. Among the 194 World Health Organization member states only 54 (28%) of top health officials are women. The underrepresentation of women in global health leadership is a threat to gender equality and impedes the improvement of women’s health outcomes globally. This panel will discuss how to retain and promote women in global health leadership positions in order to achieve improvement in global health outcomes. Panelists will discuss gender-based barriers that women face along their global health career path. They will discuss their personal experiences in overcoming these barriers, how they have mentored trainees, and ways to make targeted changes to retain and promote female leaders in global health.

Moderator: Amita Gupta, Associate Professor of Medicine, Johns Hopkins University, USA

Speakers: Amita Gupta, Associate Professor of Medicine, Johns Hopkins University, USA

Michele Barry, Director, Stanford University Center for Innovation in Global Health, USA

Yukari Manabe, Professor, Johns Hopkins Bloomberg School of Public Health, USA

Ingrid Katz, Assistant Professor, Harvard University, USA

Jyoti Mathad, Assistant Professor of Medicine, Center for Global Health at Weill Cornell Medicine, USA

4:00 Pm – 4:30 Pm

Exhibits & Network

4:30 pm – 6:00 pm

Room: International Ballroom East

CS09: CONCURRENT SESSION

Building Ethical and Effective Partnerships Between Institutions in Low- and Middle-Income Countries (LMICs) and those in High-Income Countries (HICs)

In the last two decades, the world has witnessed a rapidly changing landscape in global health, characterized by a rapid increase in the development or expansion of educational, research and service partnerships between institutions in HICs and those in the LMICs. These developments have brought unprecedented new opportunities and challenges. Many questions have emerged around responsible and ethical engagement between these institutions; who is benefitting and who is losing out; what ethical concerns need to be addressed; what needs to change in the working relationships in the new era of the Sustainable Development Goals and how should these partnerships be evaluated? This panel will examine how these partnerships can be improved.

Moderator: Nelson Sewankambo, Professor of Medicine, Makerere University College of Health Sciences, Uganda

Speakers: E. Oluwabunmi Olapade-Olaopa, Professor of Surgery, University of Ibadan; Executive Secretary, Association of Medical Schools of Africa, Nigeria

Paul Ndebele, Executive Director, Medical Research Council, Zimbabwe

Sharon Rudy, Program Director, Public Health Institute, USA

Majid Sadigh, Director, Global Health, University of Vermont College of Medicine, USA

Francis Omaswa, Executive Director, ACHEST, Uganda; Chancellor, Busiema University, Uganda

CS10: CONCURRENT SESSION

NIH Fogarty Global Health Program for Fellows and Scholars: Building Research and Leadership Capacity in Global Health

To foster development of the next generation of global health researchers and leaders, the Fogarty International Center and its partners at the NIH funded five consortia of U.S. academic institutions to provide 11-month mentored research training opportunities at international partner institutions in developing countries. Each consortium has developed a unique global health research training program in global health, including HIV/AIDS, tuberculosis, malaria, maternal and child health, and non-communicable diseases. The program is open to U.S. and LMIC pre- and postdoctoral trainees in medicine, public health, dentistry, nursing, veterinary medicine, and other health-related disciplines. For this panel, alumni from the five consortia will discuss their research and training experiences.

Moderators: Douglas Heimburger, Associate Director, Institute for Global Health, Vanderbilt University, USA

Lee Riley, Head of Division of Infectious Disease and Vaccinology, University of California at Berkeley, USA

*Speakers: Eric Eisenman, Founder & CEO, International Veterans Outreach
Hod Tamir, Developmental Psychologist and Post-Doctoral Research Fellow, ICAP-Columbia University, USA

4:30 pm – 6:00 pm
Room: Lincoln

CS11: CONCURRENT SESSION

Translating Research into Action: Reducing Health Risk and Ending Violence Against Girls and Young Women in Sub-Saharan Africa

Violence against women is both a violation of human rights and a major public health concern worldwide. It is one of the potential pathways to increased risk for acquiring HIV and other sexually-transmitted diseases. It was not until recently that the systematic study of violence against girls and young women ages eight to 24 years old, has yielded strong quantitative evidence of the extent to which the phenomenon occurs and its impact on the lives of young women and their health. Policy makers and implementers could close the ‘gap’ between policy and practice by promoting targeted interventions where they will be most effective. Swill be used as a case study to illustrate how research is being translated into action at the level of national policy and response.

*Moderator: Francis Barchi, Assistant Professor, Rutgers, The State University of New Jersey, USA
Speakers: Richard G. Marlink, Director, Rutgers Global Health Institute, The State University of New Jersey, USA
Daniela Ligiero, Director, Together for Girls, Inc., USA
Hlobisile Dlamini, Programme Manager, Swaziland Action Group Against Abuse, Swaziland*

Climate Change and the Health Benefits of the Sustainable Development Goals: Challenges & Opportunities

The Sustainable Development Goals and associated targets, launched in 2015 with a 2030 endpoint, is a global plan of action for people, the planet and prosperity. Most of the 17 Goals have direct or indirect health benefits. Many are also susceptible to climate related risks. Goal 13 focuses efforts to take “urgent action to combat climate change and its impacts”. The interlinkages and integrated nature of the Sustainable Development Goals are of crucial importance in ensuring that the goals are achieved. In this session we focus on the identification of new research questions that are at the intersection of the health benefits of the SDGs, climate variability and change.

*Moderator: Madeleine Thomson, Senior Research Scientist, International Research Institute for Climate and Society, Columbia University, USA
Speakers: Madeleine Thomson, Senior Research Scientist, International Research Institute for Climate and Society, Columbia University, USA

The United States and the Future of Global Health: Report from the National Academies

The National Academies of Sciences, Engineering and Medicine produced two reports, in 1997 and 2009, on the United States’ interest in and commitment to improving human health globally. These reports advised the nation to assume a global health leadership role and highlighted health as a pillar of US foreign policy. As increasing globalization, urbanization, and international travel and trade, along with advancing technology and health systems have occurred, The National Academies convened a committee to reassess and update the public and private sector roles in contributing to and deriving benefit from improved global health from the perspective of the new Administration. This panel of committee members will discuss the complexity of prioritizing and maintaining effective investments in global health initiatives in a rapidly changing world.

*Moderator: Megan Reeve Snair, Study Director, US and the Future of Global Health, Board on Global Health, Health and Medicine Division, The National Academies of Sciences, Engineering, and Medicine, USA

Canada Gairdner Global Health Awardee Lecture

The Canada Gairdner Global Health Award is given annually to an individual who has made seminal discoveries or major scientific advances in any one of four areas of basic science, clinical science, population health or environmental health. These discoveries have made, or have the potential to make, a significant impact on health outcomes in the developing world.

Recent Awardees:

2016 – Anthony Fauci, Director, National Institute of Allergy and Infectious Diseases, National Institutes of Health, USA

2015 – Peter Piot, Director, London School of Hygiene & Tropical Medicine, UK

2014 – Satoshi Omura, 2015 Nobel Prize Winner for Medicine, Japan

2013 – King Holmes, Director of Research, Global Health, University of Washington, USA

Introduction: Janet Rossant, President and Scientific Director, Gairdner Foundation, Canada
Speaker: Cesar Victora, Emeritus Professor, Federal University of Pelotas, Brazil

Translating Research to Policy: Creating and
Implementing Evidence-Based Policies for the
Prevention and Early Detection of Women’s Cancers

More than 88% of cervical cancer deaths and 50% of breast cancer deaths occur in LMICs. Mortality rates for breast and cervical cancer are significantly higher for women in less-developed regions due to limited access to prevention, early detection, and diagnostic capacity. Substantial improvements in quality of life and survival could be achieved in low-resource settings. A combination of traditional and recent innovative solutions has enormous potential to save women’s lives around the world. This panel will address the importance of translating advances in cervical and breast cancer prevention, detection, and diagnosis into effective policies and practice in LMICs. This can drive evidence-based policy decisions to improve health outcomes for women worldwide.

Moderator: Edward Trimble, Director, Center for Global Health, National Cancer Institute of the NIH, USA
Speakers: Benjamin Anderson, Director, Breast Health Clinic at the Seattle Cancer Care Alliance (SCCA), USA
Michele Bloch, Chief, Tobacco Control Research Branch, National Cancer Institute of the NIH, USA
Mauricio Maza, Chief Medical Officer, Basic Health International, USA

The Insufficiently Appreciated Impact of Pollution
on Global Health

Pollution related disease (PRD) is a massive and growing global problem. Diseases caused by pollution are responsible for 9 million premature deaths each year. More than 90% of deaths due to PRD occur in low- and middle-income countries. The nature of pollution is changing. In developing countries, levels of ambient air pollution, toxic chemical pollution and soil pollution are increasing as a consequence of urbanization, increasing motor vehicle use and the proliferation of toxic chemicals, pesticides and polluting industries. This panel will share cost effective pollution control strategies that have been developed and successfully deployed. It will also share information about the Global Commission on Pollution & Health. The Commission’s report, supported by The Lancet, and the Global Alliance on Health and Pollution, will be published in early 2017.

Moderator: Philip J. Landrigan, Dean for Global Health, Arnhold Global Health Institute at Mount Sinai, USA
Speakers: Maureen Cropper, Distinguished University Professor of Economics, University of Maryland, USA
Philip J. Landrigan, Dean for Global Health, Arnhold Global Health Institute at Mount Sinai, USA
Christa Hasenkopf, Executive Director, OpenAQ, USA

11:00 am – 12:30 pm
Room: Georgetown

Make Your Mark: Conquering Challenges to
Establish a Career in Global Health

This session will present students and trainees with a range of perspectives on creating a career in global health. A panel of professionals will share their personal experience in achieving their current positions in the field and the challenges that they faced along the way. Specifically, they will speak to conquering student debt, navigating institutional and international bureaucracy, and identifying a niche in the ever-expanding world of global health. This panel discussion will provide attendees with realistic advice on networking and engaging in the professional environment at home and abroad. The brief discussion will be followed by an extended Q&A, during which attendees will have the unique opportunity to submit questions to the speakers.

Moderator: Mary Kate LoPiccolo, Medical Student (M53), University of Vermont, USA
Speakers: Loyce Pace, President & Executive Director, Global Health Council, USA
Sharon Rudy, Director, Global Health Fellows Program, Public Health Institute, USA
Kate Warren, Senior Director and Editor, Careers and Recruiting, Devex, USA

The Gairdner Foundation is proud to announce
the 2017 John Dirks Canada Gairdner
Global Health Award Laureate:

Dr. Cesar Victora,
Emeritus Professor, Federal University of Pelotas, Brazil
**Awarded “For outstanding contributions to maternal
and child health and nutrition in low and middle income
countries, with particular focus on the impact of
exclusive breastfeeding on infant mortality.”**

DON’T MISS Dr. Victora’s lecture at CUGH
on Saturday, April 8, 2017 at 9:45 a.m. - 10:30 a.m.
International Ballroom Center, Washington Hilton Hotel
Introduction by Dr. Janet Rossant,
President & Scientific Director, Gairdner Foundation

NOMINATE the next Gairdner Global Health Awardee.
Visit gairdner.org to learn more about past laureates
and our nomination process.
Deadline: October 1, 2017

Export Controls and Global Health Programs

This session will explore various topics related to U.S. trade compliance in the global health arena. The speakers will discuss how their institutions support the import and export of materials as well as compliance with U.S. laws related to working with foreign nationals. Some topics that will be addressed include: Import and export licenses required for the shipment of certain biological goods and clinical care equipment; The rare instances where a license may be required in global health to share technical data with a foreign national; Dealing with institutions and citizens from sanctioned countries, in particular, Cuba, Iran, North Korea, Sudan, and Syria; Understanding the Foreign Corrupt Practices Act. Recommendations on how to establish a support system in academia for global health trade compliance will be discussed as well as resources that could be used in the absence of such support structures.

Moderator: Mark Stomski, Assistant Vice Provost for Export control, University of Washington, USA
Speakers: Kelly Hochstetler, Director in the Office of Export Controls, University of Virginia, USA
Janet Simons, Director, Research Policy, University of Maryland, Baltimore, USA
Mark Stomski, Assistant Vice Provost for Export control, University of Washington, USA

Perspectives on Monitoring Progress toward Ending Preventable Maternal Mortality: What Measures Matter?

Over the course of the past year, a diverse group of stakeholders has been developing a monitoring framework to accompany the 2015 WHO report “Strategies toward ending preventable maternal mortality (EPMM).” The process has focused on identifying indicators to address both the proximal and distal causes of maternal morbidity and mortality as outlined by the 11 “key themes” in the EPMM Strategies report. This panel will examine the EPMM Strategies and its monitoring framework in light of country implementation and monitoring needs and its role within both the larger maternal health agenda (guided by the Global Strategy and SDGs) and other efforts in global health monitoring (e.g. human rights).

Moderator: Amy Boldosser-Boesch, Senior Director, Management Sciences for Health, USA

The Global Health Security Agenda

The Global Health Security Agenda (GHSA) was launched in February 2014 and is a growing partnership of over 50 nations, international organizations, and non-governmental stakeholders to help build countries’ capacity to help create a world secure from infectious disease threats. GHSA acknowledges the essential need for a multilateral and multi-sectoral approach to strengthen both the global capacity and nations’ capacity to prevent, detect, and respond to infectious diseases threats. This session will review the successes and limitations of GHSA in its efforts to strengthen both the global capacity and nations’ capacity to prevent, detect, and respond to human and animal infectious diseases threats whether naturally occurring or accidentally or deliberately spread.

Moderator: Thomas Quinn, Director, Center for Global Health, Johns Hopkins University, USA
Speakers: Ambassador Bonnie Jenkins, Former U.S. Dept. of State Coordinator, Threat Reduction Programs, Bureau of International Security and Nonproliferation, USA
Jonathan Quick, Former President and CEO, Management Sciences for Health, USA
Jonna A.K. Mazet, Professor and Executive Director, One Health Institute, University of California, Davis, USA

GHFP-II and CUGH Recent Graduates Study

The Global Health Fellows Program (GHFP) II and the Consortium of Universities for Global Health are co-hosting a lunch-time satellite session that will discuss the results from their recent Global Health Graduates Study. The study aimed to better understand the experiences of graduates from master’s level global health programs when seeking jobs, and to understand the fit of graduate program curricula with workplace demand. Attendees can expect to leave with clearer expectations for transitioning into the global health workforce and new tools and resources to gain in-demand skills. Lunch will be provided on a first-come, first-served basis for session attendees.

Toward a Breathable Future: Managing Threats to Respiratory Health in Urban Slums

More than half the world’s population lives in urban areas, and this number is expected to increase to 5.1 billion by 2050. An estimated 863 million people currently live in urban slum conditions. This symposium will discuss community-based research in the epidemiology of chronic respiratory diseases in urban and rural regions of Latin America, Africa, and Asia. It will focus on potential strategies for the implementation of interventions to improve health outcomes and the quality of life for people living with chronic respiratory diseases in each country. The discussion will be grounded in an appreciation for the context-specific barriers and facilitators to effective implementation of these intervention strategies.

Moderator: William Checkley, Associate Professor, Johns Hopkins University, USA
Speakers: Suzanne Pollard, Postdoctoral Research Fellow, Johns Hopkins University, USA
Trishul Siddharthan, Fellow, Johns Hopkins University, USA

Global Burden of Road Traffic Injury: Opportunities and Strategies for Prevention and Control, Roles of Civil Society

The United Nations has declared 2012-2020 as the “Decade of Action for Road Safety” to achieve global progress. With nearly 1.2 million deaths each year and estimates of 20-50 million non-fatal injuries, road traffic injury (RTI) is an important but often neglected global public health burden. Reducing the RTI problem requires partnerships and collaborations across all sectors of civil society. The Global Burden of Disease Report (Lancet, Dec 2015) and more recent CDC MMWR report outline how RTI rates are increasing in varied settings, with the major burden occurring in low and middle income locations. This panel will inform conference participants about the global public health burden of RTI and approaches to injury prevention and control.

Moderator: *Stephen Hargarten*, Assoc. Dean for Global Health, Medical College of Wisconsin, USA
Speakers: *Adriana Blanco*, Regional Advisor on Tobacco, PAHO/WHO, USA/Switzerland
T. Bella Dinh-Zarr, Vice Chairman, National Transportation Safety Board, USA

Understanding and Managing Health Risks in the Anthropocene

Changing weather and climate patterns, biodiversity loss, land use change, and other global ecosystem changes will characterize the Anthropocene. These changes are exacerbating existing and creating new risks to human and animal health, and to sustainability, particularly in low- and middle-income countries. Policy- and decision-makers need evidence of current impacts and projections of future risks and on options for preparing for and managing risks. Panelists will illustrate not just the challenges, but also the opportunities to improve evidence-based risk management and policy development to achieve the Sustainable Development Goals by collaborating across sectors; increasing the use of environmental information; identifying thresholds for action; and explicitly considering the social, cultural, and political contexts within which responses will be implemented.

Moderator: *David Lopez-Carr*, Co-Director, University of California Global Health Institute Planetary Health Center of Expertise; Professor of Geography, University of California, Santa Barbara, USA
Speakers: *Roger-Mark DeSouza*, Director of Population, Environmental Security, and Resilience, Woodrow Wilson Center, USA

Fake Medicines: An Unseen Threat to Global Health

What do medicines, criminals, global health and the internet have in common? With an estimated multi-billion dollar market, falsified medicines are a silent and urgent threat in health facilities, pharmacies, grocery stores, online stores, and homes worldwide. Falsified medicines expose patients, health systems, and governments to increases in morbidity,

mortality, economic losses, and drug resistance. No single solution exists for securing the global medicines supply chain; rather a multi-sector “collective impact” approach is urgently required. This symposium provides perspectives from the front-line - including regulators, industry, academia, and implementers - on protecting medicines from falsification.

Moderator: *Jim Herrington*, Executive Director, Gillings Global Gateway, University of North Carolina, Chapel Hill, USA

Addressing Data and Research Gaps to Advance the Health of Adolescent Girls and Young Women

This panel will focus on the research agenda needed to improve health outcomes for adolescent girls and young women. There is much we don’t know about this vulnerable population globally. Major gaps in data, including demographics, dis-aggregations, and output indicators, complicate efforts to reach adolescent girls with health programs tailored to meet their needs. There also is a stark need for R&D to discover new products and innovations. Nutrition, in particular, represents an area where much more research is needed to understand the range of issues adolescent girls face, and how programs can be built to complement other critical health interventions.

Making the Global to Local Link in Academia: Concepts and Models

Global/local initiatives reflect an effort to link the siloed fields of global health and (domestic) community engagement to help faculty and students recognize the value of bi-directional learning and the importance of providing care and conducting research in a way that supports vulnerable members of society wherever they may be. The concepts underlying global/local education are undertheorized and universities struggle to make the global/local link in the absence of a conceptual framework or guiding models. This panel will provide both: an understanding of the conceptual scholarship in this area to help faculty give voice to this critical movement within their own institutions and concrete models they can adapt and apply.

Moderator: *Virginia Rowthorn*, Managing Director, Law & Health Care Program; Director, University of Maryland, Baltimore Center for Global Education Initiatives, University of Maryland, Baltimore, USA
Speakers: *Jessica Evert*, Executive Director, Child Family Health International; Clinical Faculty, Department of Family and Community Medicine, University of California, San Francisco

Violence Against Women: Looking Back and Moving Forward

Promoting gender equity is an important factor in promoting global health and economic prosperity. Violence against women is a global and pervasive problem that not only results in physical, sexual, or psychological harm for women but impacts adversely on their families and society. The antecedent and moderating factors for violence against women are strongly influenced by social, cultural, political and economic factors. In many nations, gender discrimination is still woven through legal and social norms challenging tackling this complex global health challenge. This interdisciplinary panel will focus on issues impacting on violence against women from a historical perspective as well as examining promising interventions for empowering women through intersectoral approaches to reduce gender inequities in health.

Moderator: *Nancy Glass*, Associate Dean for Research, and Associate Director, Johns Hopkins University, USA

Future of Infectious Disease Pandemics: From Ebola to Zika, and Beyond

Infectious diseases remain responsible for significant global morbidity and mortality, and diseases emerge and re-emerge in unpredictable locations and at unpredictable times. Despite extraordinary advances in development of countermeasures (diagnostics, therapeutics, and vaccines), the ease of world travel and increased global interdependence have added layers of complexity to containing these infectious diseases. HIV/AIDS, severe acute respiratory syndrome (SARS), pandemic H1N1 influenza, Ebola, Dengue, Middle East Respiratory Syndrome (MERS) and Zika are only a few of many examples of emerging infectious diseases in the modern world; each of these diseases has caused global societal and economic impact related to unexpected illnesses and deaths, as well as interference with travel, business, and many normal life activities. Other emerging infections are less catastrophic than these examples; however, they nonetheless may take a significant human toll as well as cause public fear, economic loss, and other adverse outcomes. Although much is known about how to detect and respond to existing infections, more research is needed to predict the likelihood of their emergence and spread, and to improve the precision and timeliness of public health responsiveness. Beyond human public health, appreciating how animals and the environment affect disease emergence presents us with a

new challenge: to develop truly interdisciplinary research that encompasses all aspects of pathogen surveillance and response.

The Global Virome Project: A First Step Toward Ending the Pandemic Era

The frequency of pandemics is increasing, driven by surging populations, environmental change and globalized trade and

travel. Disease outbreaks illustrate that we are ill-prepared to mitigate the impact of a novel virus or prevent its emergence. Only a small proportion of viral threats have been identified. Over the coming century we will witness spillover from a pool of more than 1,000,000 “unknown” viruses into human populations. A global initiative to identify and characterize every significant viral threat circulating in the world is achievable over the next ten years – a critical and essential step towards ending the pandemic era.

Moderator: *Jonna A. K. Mazet*, Professor and Executive Director, One Health Institute, University of California, USA

Advancing Health & Global Justice, The Power of Law: The Lancet – O’Neill Institute, Georgetown University on Global Health and the Law

This panel will present the impending key themes from The Lancet – O’Neill Institute, Georgetown University Commission Report on Global Health and the Law about the relationship between global health and the law. Speakers will discuss key themes from our Report, including the relevance and power of law to global health as both a guiding principle and a pragmatic tool to advance justice. Speakers will examine the role of law in infectious disease and pandemic preparedness, non-communicable diseases, health and human rights, and the future of law in global health.

Moderators: *Lawrence O. Gostin, Faculty Director, O’Neill Institute for National and Global Health Law, Georgetown University, USA*
John Monahan, Senior Advisor on Global Health, Georgetown University, USA
Speakers: *Richard Horton, Editor-in-Chief, The Lancet, UK*
Alicia Ely Yamin, Visiting Professor of Law, Georgetown University; Adjunct Lecturer on Law and Global Health, Harvard University, USA
Tim Evans, Senior Director of Health, Nutrition and Population, World Bank, USA

4:00 pm – 4:15 pm
Room: International Ballroom Center
Closing & Thank You

4:30 pm – 6:00 pm
Room: Monroe

SS03: POST-CONFERENCE SATELLITE SESSION / PULITZER CENTER COMMUNICATIONS WORKSHOP

How to Tell Your Global Health Story (So People Hear It)

Excited about your research results but don’t know how to share them? Tired of public health headlines that over-promise and under-explain? Wondering what happened to global health coverage altogether?

As health professionals and researchers, your experience and expertise have the potential to change behavior, policy and human lives - if they reach an audience ripe for their consumption. Better public information can lead to better public health. Let’s tap into their intersection.

Please join the Pulitzer Center on Crisis Reporting, an international journalism organization, and Global Health NOW from the Johns Hopkins Bloomberg School of Public Health for a workshop on tips and tools for engaging the news media. Alongside global health journalists and communications specialists, participants will learn the skills needed to pitch a story, translate to a lay audience, and make both traditional and nontraditional media work for you.

Colton, CA
Assistant/Associate Dean of Global Health
California University of Science and Medicine

California University of Science and Medicine-School of Medicine is a Socially Accountable Medical School serving the populations of Riverside and San Bernardino (Inland Empire). The position of Assist. /Assoc. Dean for Global Health at CalMed-SOM will provide leadership in the school’s vision on Global Health where the candidate will lead the school’s education, research, teaching, service, curriculum development and developing collaborations with national international partners globally and locally. The candidate should demonstrate excellent managerial skills and commitment to CalMed’s cultural diversity and multidisciplinary activities.

The Assistant/ Associate Dean for Global Health will hold a faculty position in the medical school and will contribute to teaching and other service duties. The percent effort for the duties associated with the position will be 100%. The candidate must be academically eligible to be appointed as an Associate or full Professor. The candidate will also direct the College Colloquium a two year-longitudinal course, provide scientific and academic research leadership in global health and establish the Center for Global Health Research.

Minimum Qualifications: MD, MD/MPH, MD/DPH, MD/PhD, PhD.

Major Responsibilities: Leading and promoting Global Health related activities at CalMed-SOM. Identifying research priorities and collaborative opportunities. Developing an educational program for MD and other graduate programs. Ensuring the program attracts sufficient funding for research, training and education in Global Health and related disciplines. Providing budgetary and financial expertise and management. Chair Global Health related committees and provide necessary expert advice. Generate close working relationships with Deans, other administrative staff and the faculty at CalMed. Demonstrate strong commitment to diversity and inclusion. Ensure a strong commitment to academic excellence in keeping with the mission and vision of CalMed-SOM.

Required Applicant Documents: Applicants may interview with either Dr. Suskind or Dr. Velji at the CUGH meeting (see below) or should submit a letter of interest including a personal statement, curriculum vitae, history of research funding, statement of current and future research plans and four references along with contact information (address, e-mail and phone). The personal statement should indicate how this opportunity aligns with both current research interests and career aspirations.

Send paperwork to: Dean Robert Suskind, E-mail rsuskind@calmedu.org. Cell No. 915.345.5911, or Dr. Anvar Velji, E-mail anvarvelji@gmail.com Cell No. 916.759.5561

POSTER PRESENTATIONS OVERVIEW

POSTER PRESENTATIONS I	POSTER PRESENTATIONS II
FRIDAY, APRIL 7, 2017	SATURDAY, APRIL 8, 2017
1:00 pm – 2:30 pm COLUMBIA FOYER / TERRACE LEVEL	1:00 pm – 2:30 pm COLUMBIA FOYER / TERRACE LEVEL
LANCET-CUGH BEST STUDENT POSTER FINALISTS Finalists’ posters displayed on Day 1 & Day 2 3 finalists per track, 6 tracks Abstract# LAN.001 - LAN.018	
Governance & Political Decision Making Abstract#: 1.001_GOV - 1.014_GOV	Governance & Political Decision Making Abstract#: 2.001_GOV - 2.016_GOV

On April 7, three abstracts from each of six tracks will compete for six Lancet-CUGH Best Student Poster awards. Selection of finalists is based on their reviews by CUGH’s scientific committee. These 18 posters are displayed together in the poster hall and will be reviewed by a panel of judges on Friday, April 7. A top poster in each category will be chosen. These 6 awardees will be recognized during the CUGH Awards Ceremony taking place on Saturday, April 8 from 1:30 pm to 2:30pm, and each will each receive \$500 for continuing global health research from The Lancet. All 18 posters will be displayed on the poster floor for viewing on April 7 and April 8, 2017.

** Skips in the poster number sequences of the following pages are the result of canceled poster presentations.

CUGH 2017 POSTER PRESENTATIONS

LANCET POSTER COMPETITION	
FRIDAY, APRIL 7, 2017 & SATURDAY, APRIL 8, 2017	
1:00pm – 02:30pm	
LAN.001	International Human Research and Ethics Standards: A Compilation of Legal Protections in Countries <i>S. Ly, W. P. Magee 3rd</i> Los Angeles (USA)
LAN.002	Competing Solutions to Arsenic Contamination of Groundwater in Arai hazar, Bangladesh: A Cost-Benefit Analysis <i>M. Lopez Mendez¹, A. Juárez Armenta²</i> ¹ Chicago, Illinois (USA), ² CHICAGO, ILLINOIS (USA)
LAN.003	Collaborative Governance in Primary Health Care Facilities, Western Kenya: What is the Influence from the Community? <i>J. C. Sitienei¹, M. Nangami², L. Manderson²</i> ¹ Eldoret (Kenya), ² Victoria (Australia)
LAN.004	TEAM Malawi: Low Cost Digital Microscopy for Automated Lab Testing <i>D. De La Torre Campos¹, J. Achempong¹, A. Atta¹, S. Claybon¹, D. DeVincentis¹, A. Edrees¹, D. L. Jones¹, S. Mackey¹, R. Schliemann¹, S. Tahir¹, J. Bird¹, A. A. Muelenaer², P. Muelenaer²</i> ¹ Blacksburg (USA), ² Roanoke (USA), ³ Roanoke, Virginia (USA)
LAN.005	Development and Testing of a Low Cost Videolaryngoscope in a Resource Limited Setting <i>A. V. John¹, S. C. John², C. Lambert³</i> ¹ Ann Arbor, Michigan (USA), ² Ann Arbor, MI (USA), ³ London (United Kingdom)
LAN.006	Getting High Quality Data to Drive Programs: How is the Quality of the Data Collection System Associated with the Quality of Routine Health Data in Malawi? <i>R. O’Hagan¹, M. Marx², K. Finnegan¹, P. Naphin³, K. Ng’ambi³, K. Laija⁴, E. Wilson², L. Park², S. Wachepa⁴, J. Smith⁴, L. Gombwa⁴, A. Misomali³, T. Mleme⁴, S. Yosefe³</i> ¹ Baltimore, Maryland (USA), ² Baltimore (USA), ³ Lilongwe (Malawi), ⁴ Zomba (Malawi)
LAN.007	Bottlenecks and Red Tape Reduce Access to Government Support Programs by Botswana’s Most Vulnerable Young Women <i>R. van der Wal¹, A. Cockcroft², B. Maswabi², N. Andersson³</i> ¹ Montreal, Québec (Canada), ² Gaborone (Botswana), ³ Montreal (Canada)

LAN.008	Crowdsourcing to Promote HIV Testing among MSM in China: A Pragmatic Stepped Wedge Randomized Controlled Trial of a Crowdsourced Intervention <i>T. Zhang¹, W. Tang², T. SESH study group², J. Tucker³</i> ¹ Forest Park, IL (USA), ² Guangzhou (China), ³ Chapel Hill, NC (USA)
LAN.009	HIV Therapy without HBV Co-management in Ethiopia Fosters Emergence of Unintended HBV Drug Resistance and Vaccine Evasive Variants <i>Y. B. Akai¹, M. Maier², U. G. Liebert²</i> ¹ Gondar, Amhara Regional state (Ethiopia), ² Leipzig (Germany)
LAN.010	Serum Folate Concentrations, Asthma, Atopy, and Asthma Control in Peruvian Children and Adolescents <i>A. Nicholson¹, S. Pollard², J. Lima³, K. Romero², C. Tarazona-Meza⁴, G. Malpartida-Guzmán⁴, E. Mougey², N. Hanse¹, W. Checkley²</i> ¹ Baltimore (USA), ² Baltimore, MD (USA), ³ Jacksonville (USA), ⁴ Lima (Peru)
LAN.011	Evaluation of Self-medication with Antibiotics among Adults in Kosovo <i>Z. Shaban¹, K. Redican²</i> ¹ Pristina (Kosovo, Republic of (under UNSCR 1244/1999)), ² Blacksburg (USA)
LAN.012	Impact of Integrating FOMENT within a Community-Based Gestational Diabetes Mellitus Health Program in Bangladesh <i>M. Parvin¹, S. Sharaf², M. Haider², M. Parvin¹</i> ¹ Dhaka (Bangladesh), ² Washington, DC (USA)
LAN.013	Dietary Exposure of Pregnant Women in Suriname to Pesticides in Produce <i>F. Z. Abdoel Wahid¹, J. Wickliffe¹, M. Wilson¹, W. B. Hawkins¹, A. M. van Sauers², M. Y. Lichtveld¹</i> ¹ New Orleans (USA), ² Paramaribo (Suriname)
LAN.014	Fumonisin Exposure in Guatemalan Women of Child-Bearing Age: A Potential Link to the Observed High Incidence of Frontoethmoidal Encephalocele <i>A.-L. Marshall¹, D. J. Venuti², D. J. Eastman³</i> ¹ BEVERLY HILLS, Michigan (USA), ² Rochester Hills (USA), ³ Royal Oak (USA)
LAN.015	Distributed Thermistor for Continuous Temperature Monitoring of Malnourished Infants at Risk for Hypothermia <i>M. David¹, A. A. Muelenaer², P. Muelenaer², J. Bird⁴, S. Vespa⁴, A. Yarrabothula⁴, L. Cashman⁴</i> ¹ Blacksburg, VA (USA), ² Roanoke, Virginia (USA), ³ Roanoke (USA), ⁴ Blacksburg (USA)
LAN.016	Knowledge, Attitudes, and Practices of Exclusive Breastfeeding at Dhulikhel Hospital, Nepal <i>B. D. Ghaffari¹, A. Strauss², K. Blaisdel², C. Ruple², G. Fauchet², J. W. Bellows¹</i> ¹ Denver, CO (USA), ² Denver (USA)

LAN.017	Healthcare-Seeking Behaviors of Females Presenting to St Paul’s Hospital Millennium Medical College & its Associated Community Clinics, Addis Ababa, Ethiopia <i>D. Y. Wang¹, M. Cadena², R. Mullings², B. Nigatu, M.D.³, J. Bell, M.D., M.P.H.²</i> ¹ Detroit, Michigan (USA), ² Ann Arbor, MI (USA), ³ Addis Ababa (Ethiopia)
LAN.018	High Parity Predicts Use of Long Acting Reversible Contraceptives among Women in the Extended Postpartum Period in Uganda <i>R. Anguzu, H. Sempeera, J. Sekandi</i> Kampala (Uganda)

POSTER PRESENTATIONS

FRIDAY, APRIL 7, 2017

1:00pm – 02:30pm • Columbia Foyer/Terrace Level

GOVERNANCE AND POLITICAL DECISION MAKING

CONSORTIUM OF UNIVERSITIES FOR GLOBAL HEALTH

92

Dr. Peter Singer
University of Toronto

"Fogarty's unique, sustained focus on supporting people in their own countries to solve their own problems has been a critical piece of the architecture and development of global health."

Dr. Ruth Nduati
University of Nairobi

"Fogarty training has given us Africans the skills we need to conduct research, document illness and look at possible interventions that work in Africa...Fogarty has changed the face of HIV medicine."

**We congratulate the
Fogarty International Center
on 50 years of
advancing science
for global health!**

Dr. Amy E. Sims
Baylor College of Medicine

"My Fogarty Fellowship reassured me that what I want to do with my life could be possible, to be involved in global health clinical care and research."

Dr. Bill Pape
GHESKIO

"I can say that for us in Haiti, Fogarty has been the cornerstone of the entire program. Fogarty support has allowed us to train the leaders in our field, who themselves have trained thousands of others."

@Fogarty_NIH

www.fic.nih.gov

Dr. Marcos Espinal
PAHO

"My Fogarty training was a defining experience in my career... It opened up my world completely, gave me another view and I fell in love with public health and research."
