Building “Systems of Support” for People with I/DD:
Innovations in Behavioral Crisis Prevention, Intervention, and Stabilization
Service delivery system in Tennessee

- TennCare managed care demonstration began in 1994
- Operates under the authority of an 1115 demonstration
- *Entire* Medicaid population (1.4 million) in managed care since 1994 (including individuals with I/DD)
- Three health plans (MCOs) operating statewide
- Physical/behavioral health integrated beginning in 2007
- Managed LTSS began with the CHOICES program in 2010
  - Older adults and adults with physical disabilities *only*
  - LTSS (3 Section 1915(c) waivers and ICF/IID services) for individuals with I/DD have been carved out (people are carved in for physical and behavioral health services)
  - New MLTSS program for individuals with I/DD began July 1, 2016: *Employment and Community First CHOICES*
Opportunities to improve delivery of I/DD services

- Tennessee spends nearly 2x the national average per person for this population.
- 3% of TennCare members (includes 75% of people with I/DD receiving LTSS).
- Account for 50% of total program costs.

Cost

Tennessee spends nearly 2x the national average per person for this population.

Coordination and Quality

Little coordination between physical and behavioral health services and long term services and supports (LTSS).

Leveraged settlement agreement in longstanding litigation to improve the delivery system for people with I/DD.
Behavioral Health Crisis Prevention, Intervention and Stabilization Services

- Behavioral health services for individuals with I/DD and co-occurring mental health and/or behavior disorders delivered through TennCare MCOs, including:
  - Person-centered assessment and crisis prevention planning, including identification of the needs of the individual in order to avoid potential triggers and to provide positive behavior supports
    - Comprehensive face-to-face person-centered assessment
    - Discussions with caregivers (paid or unpaid), family members/conservators, etc., who may help inform the planning process
    - Includes comprehensive review of health care issues/needs including physical and mental health diagnoses and emotional concerns that could trigger need for behavior intervention
    - Identification of medications which could impact behaviors and/or prescribed to address behavioral needs
Behavioral Health Crisis Prevention, Intervention and Stabilization Services

• Development of individualized Crisis Prevention and Intervention Plan (CPIP)
  – Must be easily understood by those who provide supports, e.g., family members and direct support staff (person-centered and practical)
  – Individualized and speak specifically to known vulnerabilities and potential triggers and the most effective calming/de-escalation techniques, as well as actions the person’s system of support can take when needed—who they will call, what they will do
  – Updated on an ongoing basis, and as needed following any crisis requiring intervention and/or stabilization services
  – For individuals enrolled in an HCBS program (1915(c) or MLTSS), integrated into the person-centered support plan to ensure integration/coordination of behavior support needs across services and settings
• The provision of **training** by the SOS provider for paid and unpaid caregivers to equip them to:
  - Provide positive behavior supports to effectively manage day-to-day situations and environments in positive ways that do not result in behavioral health crises
  - Quickly identify and address potential behavioral health crisis situations, intervening immediately to de-escalate a potential behavioral health crisis situation whenever possible
Behavioral Health Crisis Prevention, Intervention and Stabilization Services

- Development of **community linkages and cross-system supports** based on the individualized needs of each member and in accordance with the member’s CPIP

- **24/7 crisis intervention and stabilization response**
  - Assist and support the person or agency who is primarily responsible for supporting an individual with I/DD who is experiencing a behavioral crisis that presents a threat to the individual’s health and safety or community living arrangement, or the health and safety of others
  - Goal is to work in partnership/collaboration with the provider or family caregiver to stabilize in place, divert from unnecessary/inappropriate inpatient, and support sustained integrated community living whenever possible/appropriate
  - Expectation is that over time, the SOS team gains ability to anticipate and prevent behavioral escalations, reducing the need for crisis intervention by the SOS provider
Behavioral Health Crisis Prevention, Intervention and Stabilization Services

- **24/7 crisis intervention and stabilization response**
  - Generally one hour; no more than two
  - Generally expected to be face-to-face in the home
  - Teleconsultation permitted on a case-by-case basis if actively engaged in the SOS, assessment completed, CPIP developed and implemented
  - Tele-consultation must be documented in the CPIS plan, including specific circumstances in which it can be provided
  - If tele-intervention not successful in stabilizing the crisis, SOS provider remains responsible for ensuring a face-to-face response within the prescribed timeframe

- Ongoing review and revision by the SOS provider as needed of the CPIP, including any time there is a crisis event resulting in the need for intervention and stabilization services or upon request of the paid or unpaid caregivers
Behavioral Health Crisis Prevention, Intervention and Stabilization Services

- Referral to therapeutic respite or inpatient services, when necessary
- Coordination with therapeutic respite or inpatient provider to plan and prepare for transition back to community living arrangement as soon as appropriate
  - Coordination with the residential provider, ISC, and family caregivers
  - Training for paid and unpaid caregivers on any adjustments to the CPIP prior to transition, and training updates on the System of Support as needed
  - Working with the PCP or Psychiatrist (or other prescribing practitioner) to reconcile psychotropic and other medications upon discharge
- Data collection, analysis, and reporting
Behavioral Health Crisis Prevention, Intervention and Stabilization Services

• More than behavioral health services

• A model of service delivery that is intended to build the capacity of the system to better support individuals with I/DD who experience challenging behavior—creating more effective Systems of Support

• Assist the person in achieving greater independence and improved quality of life, free of challenging behavior, and a higher degree of stability and community tenure

Mission Statement:

“Building integrated systems of support through innovative partnerships and collaboration to empower Tennesseans with I/DD to live the lives they want in their communities”
Behavioral Health Crisis Prevention, Intervention and Stabilization Services

• **Who is “the system”?**
  
  – *Everyone* who has a role in supporting the individual with I/DD
  – family members and unpaid caregivers
  – **HCBS providers (paid caregivers, ISCs, etc.)**
  – health care (including primary and acute care) providers
  – behavioral health providers
  – MCO
  – school/teachers
  – law enforcement
  – etc.
The SOS provider is expected to:

- Engage the member and those who provide support in developing and implementing a personalized, person-centered crisis prevention and intervention plan.
- Empower the person and those who provide support to effectively manage day-to-day situations and environments in positive ways that do not result in behavioral crises.
- Develop capacity and expertise within SOS Team Members who will continue to be engaged in planning and providing supports once the individual’s participation in the SOS has concluded.
Expected outcomes for System of Support include:

- Member and/or caregiver ability to coordinate service independently
- Member and/or caregiver ability to recognize symptoms and utilize appropriate preventive interventions
- Decreased member and/or caregiver dependence on high-intensity services (e.g., ER and inpatient care)
- Decreased use of psychotropic medications for the purpose of restraint
Behavioral Health Crisis Prevention, Intervention and Stabilization Services

- Reimbursement aligned to support improvement and independence
- Technology platform tracks outcome measures to establish a value-based purchasing component (incentive or shared savings) for reimbursement
  - Decrease crisis events
  - Decrease need for out-of-home placement to stabilize crises
  - Decrease ER visits and unnecessary/inappropriate inpatient psychiatric hospitalizations (utilization and cost)
  - Decrease inappropriate use of psychotropic medications (i.e., for behavior management)
  - Decrease intensity/cost of HCBS (more cost-effective services/more integrated settings)
  - Increase sustained community living
  - Improve quality of life

Project Transition

Project Transition Mission:
“To enable each person who has Serious Mental Illness, Co-Occurring Substance Use Disorder or I/DD and Behavioral Health conditions to live a life that is meaningful to him/her in the community on terms he/she defines.”
Who We Are

- Project Transition has over 35 years experience working exclusively with some of society’s most vulnerable Members - Adults who struggle with Serious Mental Illness, co-occurring Substance Use Disorder and/or a Dual Diagnosis of Intellectual/Developmental disABILITIES (IDD) and Behavioral Health challenges

- We are an outcomes-driven organization, committed to enabling each individual Member, to live a life that is meaningful to her or him, in the Community, on terms she or he defines

- We are in our 2nd generation, founded on the fundamental belief that our Members can and will thrive in the community if properly and energetically supported

- All of our services are delivered by coordinated teams of mental health, substance use disorder, and IDD professionals

- Demonstrated results partnering with payors and diverse stakeholders across multiple regions and markets, to create programmatic and financial solutions to address populations with complex needs

Alignment: What We Want

Some simple questions:

- PERSON-CENTERED?
- OUTCOMES-DRIVEN?
- EVIDENCE-BASED?
- APPROPRIATE SUPPORTS

We all agree, so what’s all the fuss about?
Alignment: What We Don’t Want
Alignment: The Team

We all know what we want, and we all know what we don’t want.

*Now let’s go do it.*

The SOS Team: Integrated, coordinated, operationalized

PROJECT TRANSITION

Hope and Healing Through Community
Core Tool: Member Lifeline

• Identify trends, anticipate challenging events, and celebrate good events

• Continues to develop throughout a Member’s Journey of Recovery

• Segmented into ten categories including:
  − Physical Health Events
  − Positive Life Events
  − Substance Use
  − Behavioral Health Events
  − Family Events
Core Tool: Member Lifeline

Lifeline-Data Entry

- Start Date of Event
- End Date of event if relevant
- Event title

Outcomes Demo
Crisis Outcomes

An overview of key crisis outcome measures showing how Project Transition manages, de-escalates, and prevents crisis.

**Definitions**

- **Crisis Plans in Development**
  - Number of crisis plans that are in development.

- **Crisis Plans Completed**
  - Number of crisis plans that are completed.

- **Average Time for Crisis Event**
  - Measures the average in minutes of how long it takes to de-escalate a crisis.

- **Crisis Outcomes with SOS Team Notified Before Emergency Involvement**
  - Measures the % of crisis events and their outcomes with SOS team notified during crisis.

- **Crisis Outcomes with SOS Team Notified After Emergency Involvement**
  - Measures the % of crisis events and their outcomes with SOS team notified after crisis.

- **Use of PRN for Behavior Management**
  - Measures the average # of BH PRN’s used.

- **Unique Members with PRN Usage for Behavior Management**
  - Measures the # of unique members using BH PRN’s.

**Crisis Outcomes with SOS Team Notified Before Emergency Involvement**

- De-escalated with SOS team support
- ER for Medical Treatment
- ER for Psychiatric Treatment
- ER Psych + Inpatient Admission
- Member was arrested
- Referred to Behavioral Respite

**Crisis Outcomes with SOS Team Notified After Emergency Involvement**

- De-escalated with SOS team support
- ER for Psychiatric Treatment
- ER Psych + Inpatient Admission
- Referred to Behavioral Respite

**Average Time for Crisis Event (Minutes)**

- L1: 0-3 mos
- L2: 4-5 mos

Pre-PT Data Coming Soon
Crisis Contacts & Responses

Crisis Contacts
Counts the raw number of crisis events per month.

Post Crisis Meetings
Counts the number of post crisis meetings per month.

Crisis Contacts by Level
Counts the raw number of crisis events by Member level.

Crisis by Unique Member
Counts the number of unique Members that made crisis calls by Member level.

In-Person Crisis Response
Measures the % of In Person responses vs telephonic responses.
