Harmonized System – Composite goods

Case studies

Facilitator: Izaak Wind

Case studies

Give the classification and the classification rationale of the following:

Dried peas (51 % by weight) and granulated sugar (49 % by weight) presented in a single container.

It has to be further processed before the product can be used in de food industry.

Case studies

Give the classification and the classification rationale of the following:

A ball point pen combined with a flash memory and USB-connector

Case studies

Give arguments pro or contra the following statement:

‘Poultry incubators are classified in heading 84.36 and not in heading 84.19, by application of GIR 3 (a).’

Poultry incubators consist of devices permitting eggs, placed in trays, to be automatically turned in an atmosphere where temperature, air flow and air humidity conditions can be exactly controlled.

Case studies

Give examples of composite goods classified by GIR 1 only.

Case studies

Headings 64.02 to 64.04 refer to specific materials of the upper and of the outer soles

Do you think there is still a need to apply GIRs 2 (b) and 3?

WORLD CUSTOMS ORGANIZATION
ORGANISATION MONDIALE DES DOUANES

THAT'S ALL !

(for this year)
