EUROPEAN HEALTHCARE

Follow us  @eHealthWeekEU #eHW15

MAIN CONSIDERATIONS

1. How can digital technologies contribute to the demanding needs of reforms in the health/social sector?
2. How could we contribute by enabling and scaling-up this process?

MAIN GOALS

1. Support and promote the necessary reform policies in the health sector
2. Improve sustainability and efficiency of the healthcare system
3. Promote better health for all citizens and the country's development

KEY ISSUES

- Guide, support and act as pressure leverage to the central health reform policies
- Promote innovative solutions in all levels of health sector
- Improve collaborations among stakeholders
- Act as catalyst in effective partnerships

FOCUS ON

- Meeting current demands of healthcare system
- Building a better health future for the population

MAIN PRIORITIES

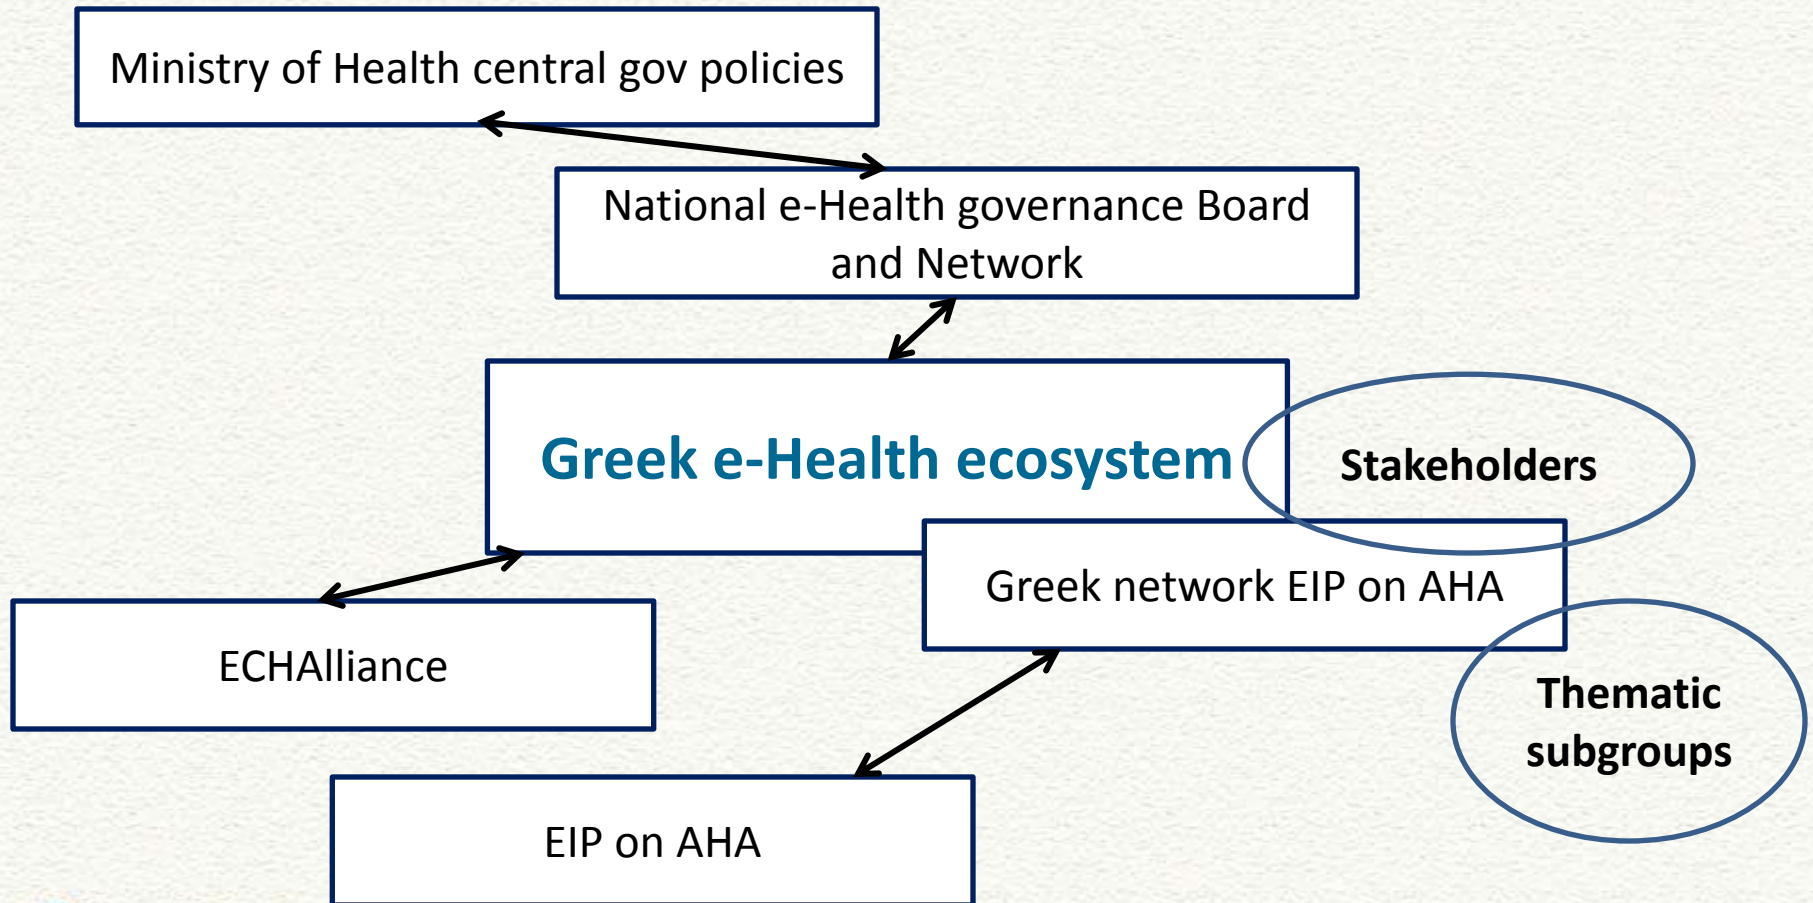

- Improve accessibility
- Empower prevention strategies
- Shift from hospital to primary care models
- Take care of vulnerable groups (children, elderly, chronic patients, etc...)
- Focus on healthcare system fast digital transformation
- Promote integrated and patient centric care models

MAIN INITIATIVES

- Establishment of a new scientific society as an independent legal entity –
Greek Network EIP on AHA [www.eiponaha.gr]
- Re-structuring and empowerment of the Greek e-ecosystem
