IMSA CERTIFICATION

With the ever-changing demands of technology today, it is more important than ever that properly trained and skilled technicians are available. IMSA Certifications indicate individuals have met prerequisite qualifications and passed an examination -- from an impartial, nationally-recognized association -- to determine they are qualified to perform specific technical tasks. IMSA has been globally recognized as the leader in public safety certifications since 1982 with over 100,000 certifications issued.

This year, along with the traditional suite of certification programs we are pleased to offer a new 3-day Certified Fiber Optic Technician program which combines both theory and hands-on skills into one certification. Other notable offerings include Transportation Center System Specialist, Traffic Inspector for Advanced Technologies and updated Interior Fire Alarm Technician programs.

ANNUAL RECEPTION & BANQUET

Tuesday, July 31
 Gather with other attendees at a complimentary cocktail reception as we close the Forum & Expo. The banquet will consist of dinner, officer installation and entertainment. This event is included with All Access General and Companion registrations and tickets can be purchased individually.

COMPANION REGISTRATION

Registrants may choose to add an Education, Networking or All Access Companion registration, depending on which activities you plan to attend. Companion registrations also include breakfast on Monday and Tuesday.

There are also many activities offered daily at the resort for families and children. Visit our web site for more information.

DESTINATION: SPACE An Evening at the Kennedy Space Center

Sponsored by FLIR & Control Technologies

Monday, July 30
 Spend a fun, relaxing evening at the renowned, unique Kennedy Space Center where you will get a close-up view of Atlantis, the only space shuttle displayed in flight, with more than 60 interactive exhibits celebrating the history, technology and impact of NASA's Space Shuttle Program.

Then you will go, by bus, to the Apollo/Saturn V Complex (ASVC) inside the Space Center grounds. You will pass by the space shuttle assembly building and other landmarks of the space program. At the ASVC, enjoy a private experience with full access to the complex including multiple displays and interactive exhibits. This monumental 363-foot rocket launched America's brave astronauts, who traveled to the moon and back, fulfilling the dreams and imagination of people around the world. Stroll the length of this amazing machine -- marveling at the stages of the rocket and the sheer, awe-inspiring scale. A full buffet dinner will be served, and afterwards you will view the Lunar Theatre Show.

Plus, meet Atlantis Astronaut Bob Springer. He will be available to share stories and information as well as sign autographs and participate in photo opportunities.

This event is included with Networking and All Access General and Companion registrations, and tickets can be purchased individually.
