THE EUROPEAN INSTITUTE FOR INNOVATION THROUGH HEALTH DATA

**Dipak Kalra, President of EuroRec
on behalf of the EHR4CR Consortium**

Follow us  @eHealthWeekEU #eHW15

Mission

- The European Institute for Innovation through Health Data (**i~HD**) is a newly formed independent not-for-profit organisation for guiding and catalysing the most effective, efficient and trustworthy uses of health data and interoperability, for enabling and optimising health and knowledge discovery.

The European Institute For
Innovation Th~ugh Health Data

Clinical Research needs

Healthcare needs

The European Institute For
Innovation Through Health Data

Harmonised health information and standards

Best practices in information governance

Solutions for better quality health data, and legitimate uses of data

Quality assessments, certification and audit

Intelligence derived from health data
e.g. research, outcomes

Value Assessment programmes

Building synergy and consensus

- The Institute will act as a focal point bringing stakeholders together to share experiences, agree common priorities and approaches, working towards convergence and cross-fertilisation between:

- ✦ Patient associations
- ✦ Citizen, family and carer associations
- ✦ Health professional associations
- ✦ Clinical and informatics academia
- ✦ Healthcare providers
- ✦ National decision makers
- ✦ Third party payers, commissioners
- ✦ EHR system and applications vendors
- ✦ Medical Device vendors
- ✦ Pharma, Bio-tech
- ✦ Regulators
- ✦ Standards development organisations (SDO)
- ✦ Multi-national decision makers
- ✦ Social care providers
- ✦ Electronic health (eHealth) competence centers

Governing the EHR4CR ecosystem

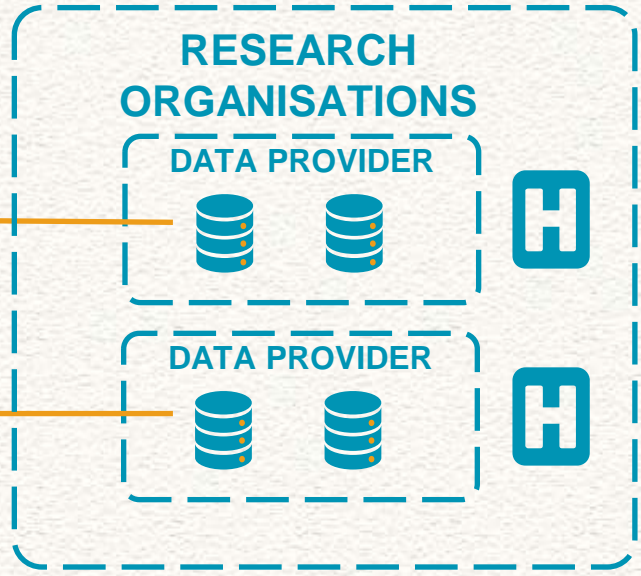

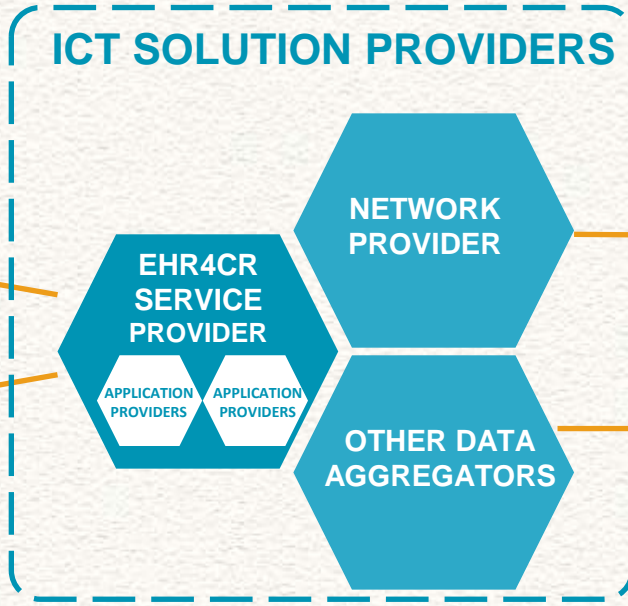

Educate and train research and ICT staff

Accredit staff and organizations

Certify service providers and EHR systems

Oversee and audit governance & security

Demonstrating value

Value to hospitals

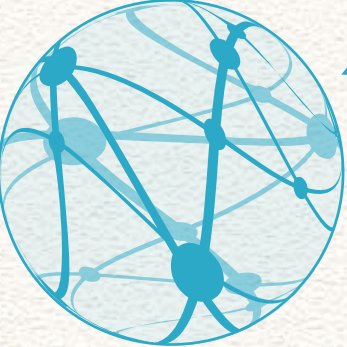

Public awareness of the benefits to society

Value to Pharma

Develop comprehensive value assessment programme, to demonstrate:

- faster and more efficient clinical trials
- better information for public health
- improved quality of EHR data
- good practice in privacy protection
- successful eHealth/eResearch ICT sector
- budget impact assessments for key stakeholders
- positive patient and societal acceptance

Grow a Network of Excellence

Promote globally
