

# Initial Assessment Competencies Experience in a DGH

## WHAT IS ALREADY KNOWN

IAC is a list of basic core competencies endorsed by RCoA for trainees joining the program such pre-operative assessment, airway management, haemodynamic impact of anaesthetic agents and theatre list management.

Dr Vikas Saxena  
ST 7 Paediatric East Midlands  
These competencies are essential for Paediatric Intensive care core training.

## HOW TO GET STARTED

PICM GRID trainees have a structured program for these core competencies.

Paediatric trainees aspiring for PICM will have to obtain Out of program for 6 -12 month

These post are at a Senior House officer level -Trust grade popularly known a Novice

## WHAT YOU GET OUT OF IT

Safe 1-1 support

+

Assessing and insertion of different airways for all age group

=

Confidence and competent in securing airway and comfortable with anaesthetic agents

## LEARNING AND SHARING

- Paediatric trainees with these skills are an asset to any Paediatric HDU. Trainees can maintain these skills via simulation scenarios.
- You are competent in manage sick children and at the same time become a leader.
