Sustainable Technology for Older People – Get Organised

STOPandGO Overview

STOP and GO is a PPI Pilot project funded by the ICT Policy Support Programme (ICT PSP) as part of the Competitiveness and Innovation Framework Programme of the European Union.

The project began in April 2014 and will run for 36 months.

The overarching strategy of STOPandGO is to pilot an innovative procurement process to improve the lives of older citizens. The project will produce and validate a standard “European Specification Template”, that will be enacted in a coordinated manner in 7 localities.

STOPandGO Services

- **STOPandGO services use innovative methodologies to enable greater mobility and independence of people living with Long Term Conditions**
- **The services therefore include both the health and social care activities provided by formal and informal carers, including the promotion of self-care and healthy lifestyles**

The Process

Objectives

Produce and validate a standard “**European Specification Template**” (EST) for tenders procuring health services for older people enabling innovative care models, as a support to the EU policies on Active and Healthy Ageing by piloting an **innovative procurement process** in a coordinated manner in 7 localities across Europe.
