

INSTRUCTIONS

This Excel file contains two pages: "InputData" and "PrintReport".

Do not make any changes to the PrintReport page. The PrintReport page is set up to automatically calculate results based on the information you add to the InputData page.

To Enter Data

Go to the InputData page.

Select your inputs from the dropdown list, where one is provided (for the columns "Comply", "Category," "Time Required").

Put an "x" or other mark in each "action required" column where your workgroup has determined that action of that type is required for that measure.

For example, if you determined that one or more legal/policy actions were required to comply with a measure, but no action required under any of the other categories (procedures, institutions, human resources/training, etc.), then insert an "x" in the Legal/Policy column for that measure, and leave the remaining "action required" columns blank.

To Print the Report

Print parameters are pre-set on both pages.

Go to the InputData page.

Select "Print".

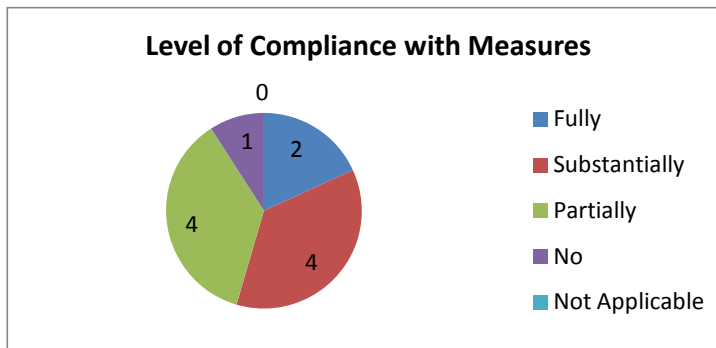

Go to the PrintReport page.

Select "Print".

The Draft Consolidated Negotiating Text contains +/- 40 different measures. This chart shows our overall implementation status with respect to the proposed measures.

Category	Number	Percent
A	3	7%
B	4	9%
C	4	9%

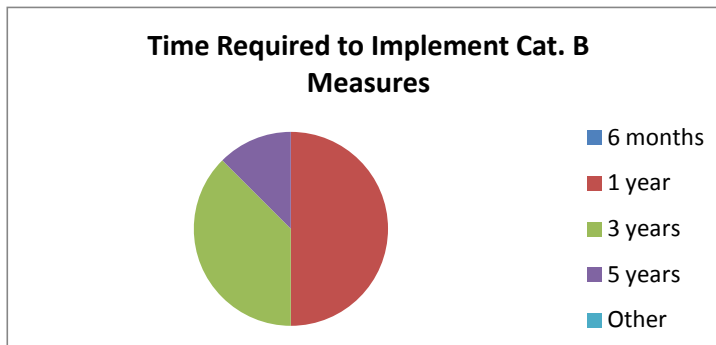

Status of special and differential categories:

Category A: measures we can implement at the time the WTO Trade Facilitation Agreement enters into force

Category B: measures for which we need additional time to implement

Category C: measures for which we need time and technical assistance

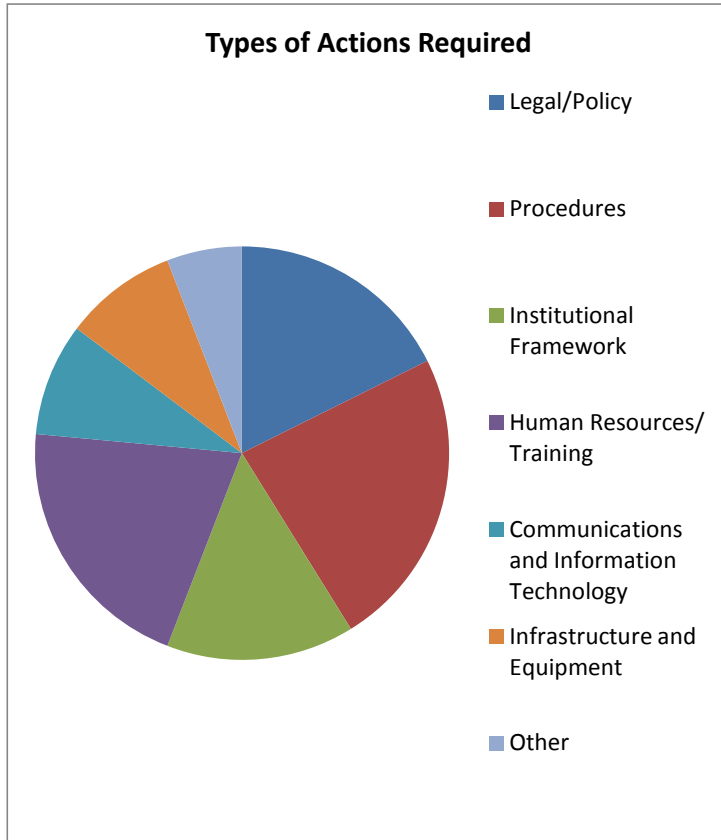

Time	Number	Percent
6 months	0	0%
1 year	4	50%
3 years	3	38%
5 years	1	13%
Other	0	0%

The time we require to implement those measures that we marked as Category B.

Trade Facilitation Needs Assessment - Summary
