

Professor Peter Butala received the Dipl. Eng., MSc. and Dr. Sc. degrees in Mechanical Engineering from the University of Ljubljana, Slovenia. He had been active for several years in industry, in particular in the Litostroj Holding Company, Ljubljana, Slovenia, managing R&D. Currently, he is a full professor at the Department of Cybernetics, Mechatronics and Production Engineering, University of Ljubljana, Slovenia. He spent some time as a visiting professor at the Department of Mechanical Engineering Science, University of Johannesburg, South Africa and a s guest professor at the University of Minho in Guimaraes, Portugal. His

research interests include mechatronics, manufacturing, remanufacturing and assembly systems. Current research topics are related to distributed manufacturing, networked production, cyber-physical systems, Big Data, and application of engineering methods in medicine. He participated in several international and national research projects and published over two-hundred scientific papers and conference contributions. He received several national and international innovation awards and is a Fellow of The International Academy for Production Engineering CIRP.
