2018 UFSAR Best Practices Workshop

Sheraton Sand Key Resort
Clearwater Beach, Florida
June 26-27, 2018

**Sponsored by
Curtiss-Wright**

UFSAR and document control specialists around the US have gathered for the past ten years at Scientech's UFSAR Best Practices Workshop, to discuss their success and their failures. Workshop material is based on utility experience with presentations by industry and seasoned professionals. Seminar presentations and open discussions will allow attendees to share experiences and lessons-learned.

Call for Papers

All topics related UFSAR and 50.59 issues are welcome and will be considered. Industry personnel interested in contributing should contact Jairo Pinzon at 727.669.3022 or jpinzon@curtisswright.com. Presentations will be selected based on the subject matter and pertinence to the UFSAR topics.

The desire is to discuss strategies and lessons learned in areas such as:

Best Practices

- Impacts of Fukushima Response on UFSAR
- UFSAR (Maintaining your UFSAR, Cost Savings, Living UFSAR, Electronic Conversion, Processing Design Changes, Influences of MajorUpgrades)
- Processing changes to the UFSAR
- Handling of change notices
- Tracking of Modification Packages and Incorporation into UFSAR
- Living UFSAR
- Benchmarking/Performance metrics for your UFSAR process
- Commitment Management and the UFSAR

Electronic UFSARs

- Software used in creating and maintaining your plant's electronic UFSAR (Framemaker, Adobe, etc.)
- Issues with Submitting my UFSAR to the NRC – Lessons Learned
- Still submitting Hardcopy of UFSAR - Why hasn't my plant converted to electronic UFSAR

50.59 and the UFSAR

- UFSAR/50.59 Current Problems/Issues
- What works well
- Licensing/Design Basis issues

“Round Table Discussion Panel”

- Discuss issues that you are encountering in your process
- UFSAR User Group formation
