EXPERIENCE FROM SWEDEN DURING THE SUSTAINS PROJECT

Follow us  @eHealthWeekEU #eHW15

Results in Sweden after a three year project

- Decisions on highest levels in different regions
- Over 200.000 users totally and steadily increasing
- Rolled out in additional three Counties and the rest before 2016
- Both “Big bang” and “Incremental change”
- Still reluctance among doctors in new regions
- Most well known project in Health Care in Sweden

The invention – The set of Rules

- Only for users 18 years or older
- Parents access to children up to 12 years
- Possibility to seal the “account”
- Patient can choose delayed or not delayed information
- Possibility to assign a proxy
- Possibility to link a patient note to the doctors notes

Patients vs HCP (at start)

- Patients like to access
 - Info without delay
 - Even unsigned notes
 - Information before HCP
 - “All” information
 - Also older Medical Records
- Doctors don't like patient to access:
 - Info without delay
 - Even unsigned notes
 - Information before HCP
 - “All” information
 - Also older Medical Records

Next phase

- Patients input structured data direct into EHR
- Patients input remote monitored data direct into EHR
- Patient express statement about organ donation etc
- Patient control access in different ways:
 - Exclude neighbour who work as HCP
 - Mask part where EHR is a threat for privacy
 - Take over more of unauthorised access checking

THANK YOU
