

Exhibits

1. DCI/IOWN Photonic Disaggregated Computing
2. Fostering Human Connection Through Vibrotactile Transmission
3. Underground Void Detection Using Optical Fiber Sensing
4. Subsurface Structure Inspection Technology Using SAR Satellites
5. The Future Created by Optical Quantum Computing
6. PFAS-Free Super Hydrophobic Coating "HIREC"
7. 6G: The AI-Native Infrastructure for a Resilient and Sustainable Future
8. Remote Palpation Connects Physician to On-Site Caregivers
9. Algae Breeding for Improved Aquaculture Feed
10. Hydrogen Pipeline Transportation Technology
11. Decoding Thought Through Brain-AI Integration
12. Wireless Laser Technology for Long-Distance Power Transmission
13. GPU over APN - Scale Across Distributed Data Centers
14. Universal Wallet Infrastructure
15. Scale Academy
16. World's First Programmable Non-Linear Photonics Chip
17. Programmable Photonics With Novel Lithium-Based Waveguide
18. Balanced Framework for Autonomous Drug Therapy in Acute Heart Failure
19. Social Simulation Platform: Accelerate Marketing and Product Innovation with Digital Personas
20. AGV Route Optimization via Digital Twin
21. Next-Gen Identity Management Infrastructure
22. AI-Based Autonomous Inspection: Robo Dog
23. Digital Human
24. GPU Optimization
25. City Services
26. Agentic AI for Software Development
27. Industrial Robot Arm / AI Digital Twin
28. INSpace
29. Red Hat
30. Cisco
31. 1Finity

EXPO HALL
