EIP-AHA B3 TOOLKIT TO SUPPORT SCALING UP IN EUROPE

Dr Andrea Pavlickova – NHS24, Scotland

Follow us  @eHealthWeekEU #eHW15

Towards the B3 Toolkit on integrated care...

- Journey of B3 Integrated Care collaborative
 - Strategic Implementation Plan (2011)
 - B3 Action Plan (2013)
 - EC Scaling-up Strategy (2014)

- B3 toolkit on integrated care
 - B3 Assets
 - **B3 Maturity model**
 - B3 Good practices

From vision to action...

Brussels
17 November 2011

STRATEGIC IMPLEMENTATION PLAN
FOR
THE EUROPEAN INNOVATION PARTNERSHIP
ON
ACTIVE AND HEALTHY AGEING

STEERING GROUP WORKING DOCUMENT

FINAL TEXT ADOPTED BY THE STEERING GROUP ON 7/11/11

STRATEGIC PLAN

European Innovation Partnership on Active and Healthy Ageing

ACTION PLAN

on

***'Replicating and tutoring integrated care for
chronic diseases, including remote
monitoring at regional levels'***

Date and place: 6 November 2012, Conference of Interested Partners, Brussels

European Scaling-up Strategy in Active and Healthy Ageing

Contents

1. Introduction.....	2
The EIP on AHA.....	2
Definition of scaling up.....	3
2. What to scale up.....	5
Step 1 - Building a database of good practices.....	5
Step 2 - Assessment of viability of good practices for scaling up.....	6
Step 3 - Classification of good practices for replication.....	8
3. How to scale up.....	10
Step 4 - Facilitating partnerships for scaling up.....	10
Collaborators' roles.....	10
Diffusion of good practices.....	10
Step 5 - Implementation - Key success factors and lessons learnt.....	12
1. Planning the innovative service and setting up a system for change.....	12
2. Organisational process and design choices.....	16
3. Monitoring, evaluation and dissemination.....	19
4. Timetable and next steps.....	21
5. Monitoring and evaluation of scaling up progress.....	22
Annex 1 - Types of scaling up.....	23

B3 Action Group on Integrated Care

Deliverables

Action Areas

1. Organisational Models
2. Change Management
3. Workforce Development
4. Risk Stratification
5. Care Pathways
6. Patient Empowerment
7. Electronic Care Records / ICT/Teleservices
8. Finance, Funding

Mapping of innovative practices

2013-2014

Practical Toolkits

2015

Implementation on large scale

provide input and expertise through an open collaboration

Commitments of the partners

More integrated, more efficient services

>50 regions by 2015

Action Group work

Local implementation
ihealth week

11 - 13 MAY 2015
RIGA, LATVIA

Delivery Targets for B3 Action Group

Expected outcomes

- B3 self-assessment **toolkit to support scaling up**
- **Database of good practices**
- **Database of resources** to assist with implementation of integrated care (literature reviews, maturity matrixes, recommendations, etc.)
- Collaboration with **EU funding projects** (Momentum, ACT, Smartcare)

Expected implementation

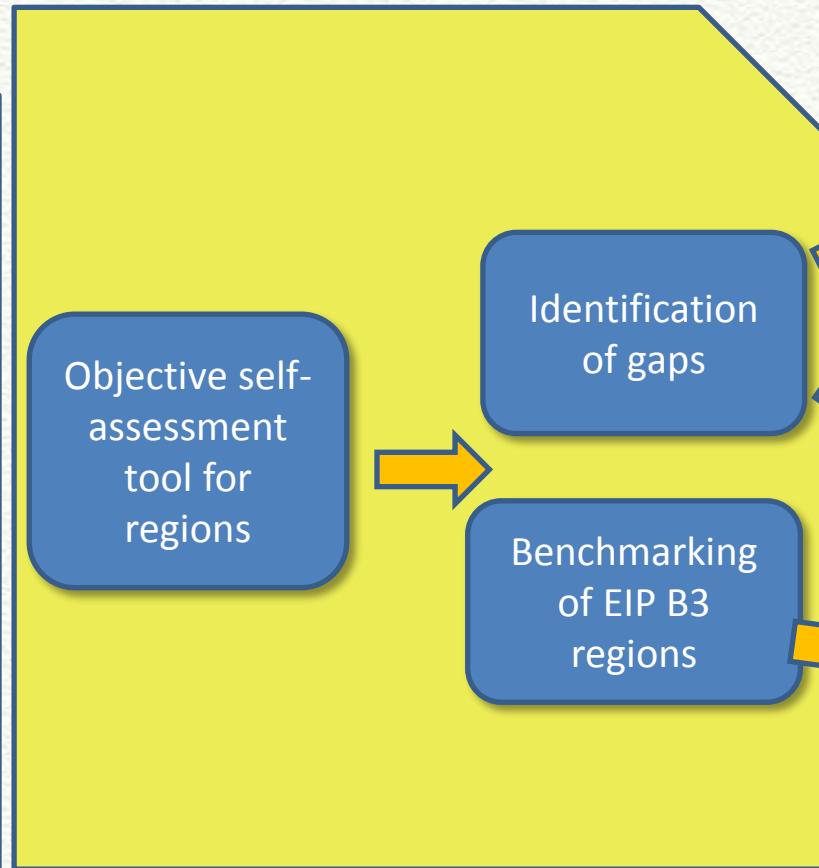

- At least 6 regions will **measure their current and future needs for integrated care**
- Good practice “pioneer” regions will coach “follower” regions

B3 Toolkit for Integrated Care

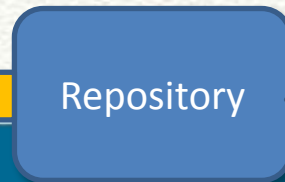

B3 Assets

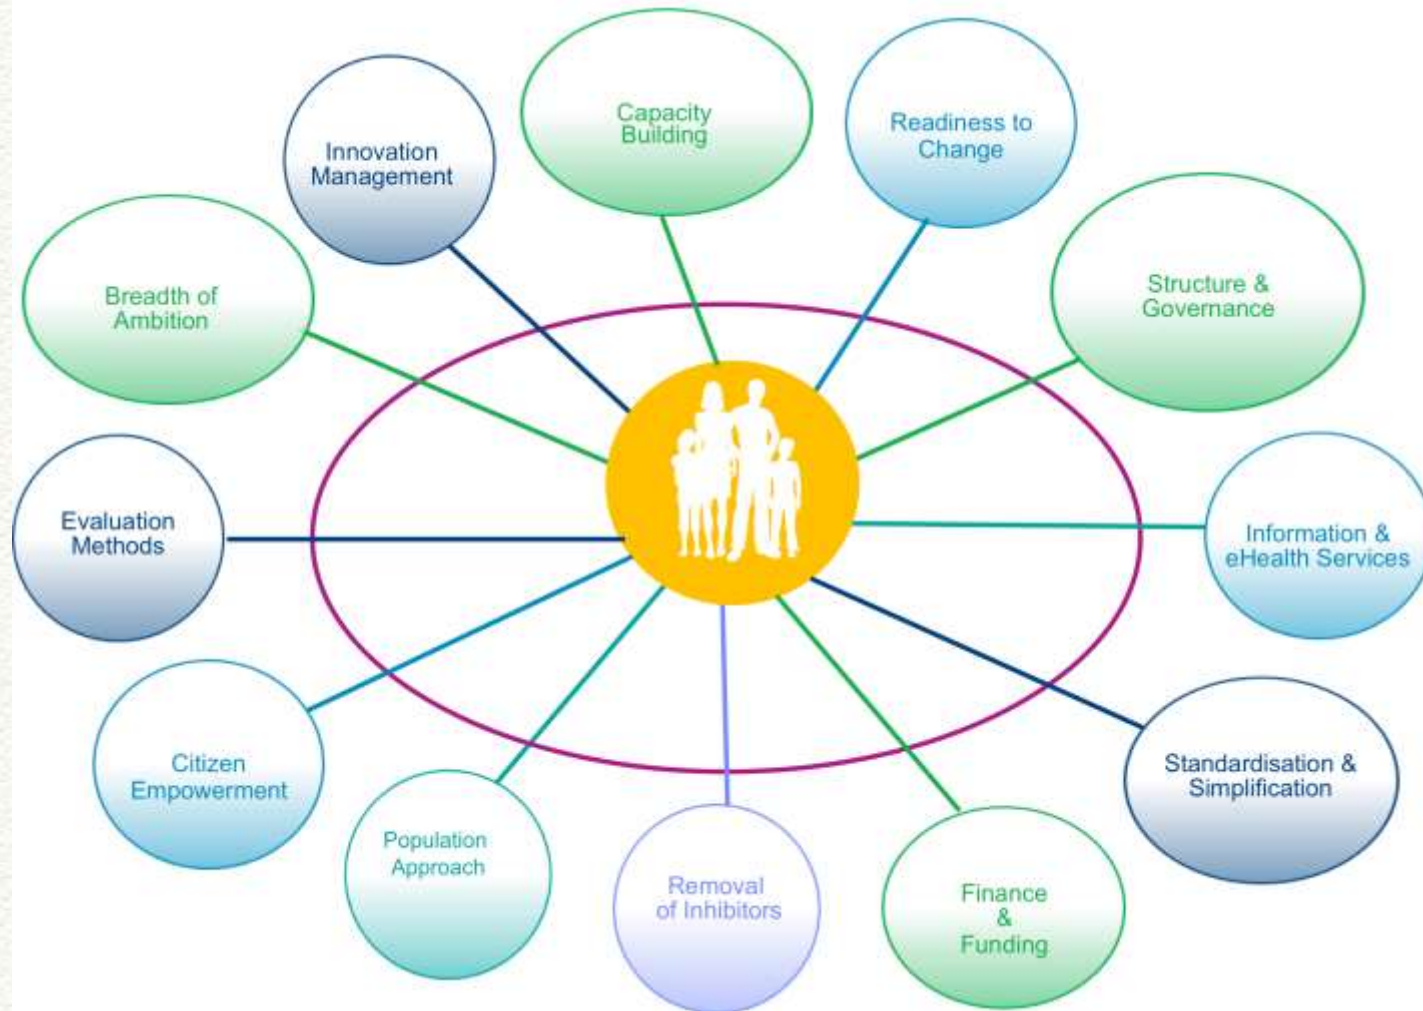

B3 Maturity Model

B3 Good practices

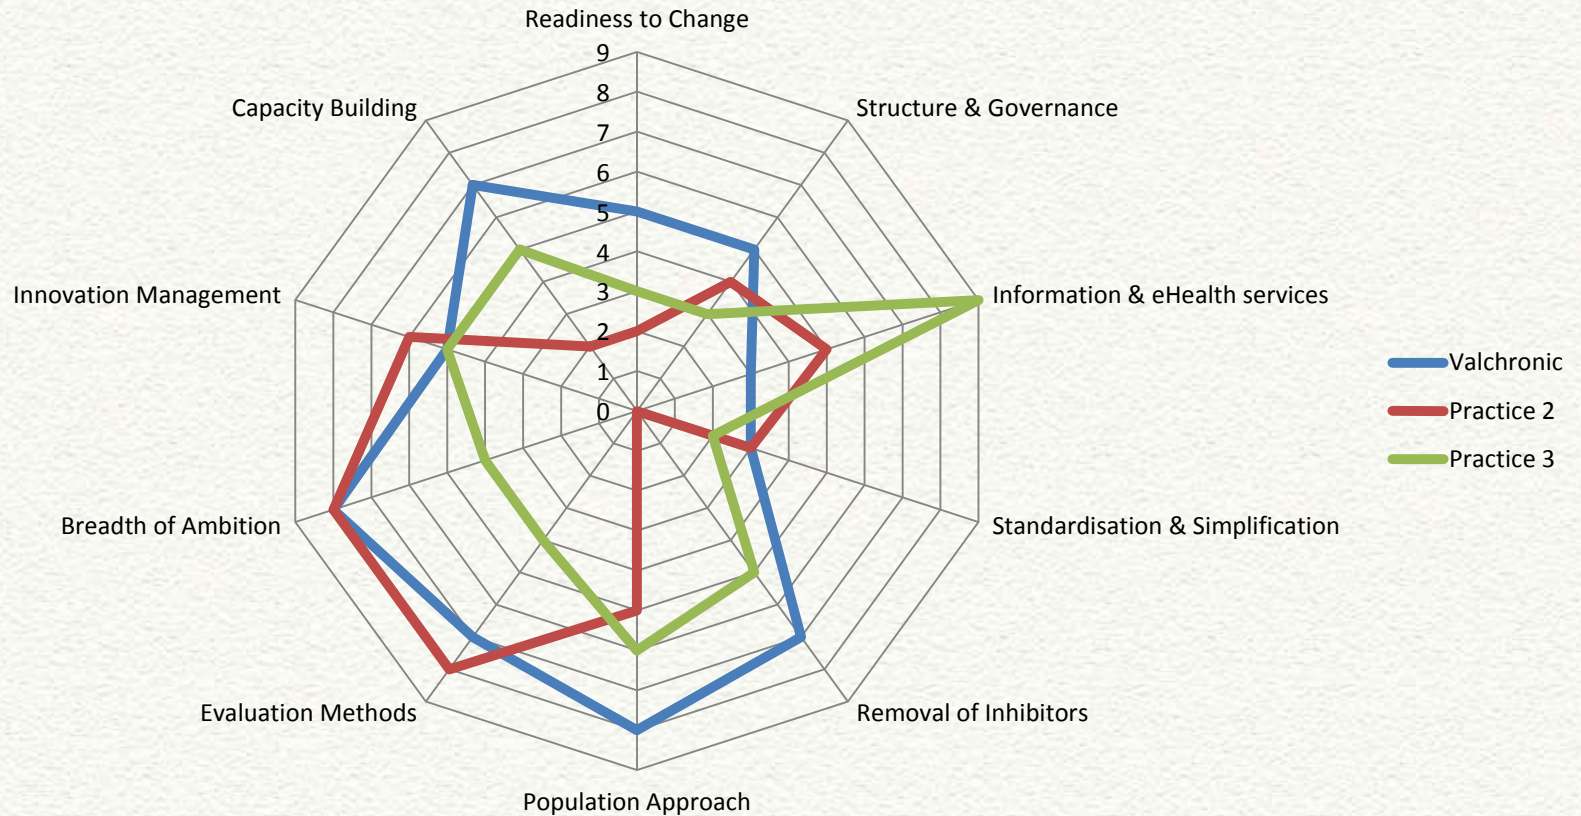

Maturity model for integrated care

How to use the B3 maturity model?

Domain	Objectives	Indicators	Assessment
Information & ehealth services	<ul style="list-style-type: none">• Essential components, secure and trusted services;• Availability of fundamental building blocks to enable eHealth and eHealth services;• Confidentiality and security designed into patient records, registries, online services, etc.• Enablement of new channels for HC delivery	Unique citizen ID; Linked health records, Regional longitudinal EHR, At-scale teleservices; Ability to combine health and social care information; Care collaboration platforms	0 – No connected health services, just isolated medical record systems 1 - No integrated services used, only pilots/local services 2 – ehealth deployed in some areas, but limited to specific organisations or patients 3 – Voluntary use of regional/national eHealth services across the HC system 4 – Mandated or funded use of regional/national ehealth infrastructure across the HC system 5 – Universal, at scale regional/national ehealth services used by all integrated care stakeholders

How to use the B3 maturity model?

Added value of the B3 maturity model

- Bottom-up approach – capturing the experience and knowledge from the regions/local authorities;
- Comprehensive and systematic model that:
 - Allows easy and quick detection of areas of improvement, gaps and strengths;
 - Orientates efforts to the most effective collaborations;
 - Facilitates multidisciplinary discussions;
 - Provides baseline on state of art of integrated care in Europe’
 - Enables comparisons of integrated care in Europe and objective measurement where the regions stand
 - Enables sharing of good practices and “matchmaking “of regions

Expected impact of the B3 maturity model

- **Scale up of integrated care in European regions**
 - Assessment of health and care's system's capacity to adopt integrated approaches to deal with challenges of ageing;
 - Assessment whether a particular good practice is adoptable by a health and care system
 - Identification of maturity characteristics necessary for adoption and scale up of good practice; Understanding the context and conditions in adopting and transferring regions
 - Match – adoptable; Mismatches – further actions/attention before the system can adopt the practice

THANK YOU
