

Dr. van den Brink earned his MD and PhD (Immunology) from the University of Leiden (The Netherlands). He trained in Internal Medicine at Duke University Medical Center (Durham, NC), followed by fellowship training in Hematology and Oncology at Beth Israel Deaconess Medical Center (Boston, MA). He is a Member of Memorial Sloan Kettering Cancer Center and holds the Alan N. Houghton Chair in Immunology. He is also a Professor of Medicine at Weill Cornell Medical College of Cornell University. He is the Co-Director of the Parker Institute for Cancer Immunotherapy at MSKCC and Vice Chairman of the Board of DKMS, an international nonprofit organization devoted to bone marrow donor registration. He is an Attending Physician of the Adult Bone Marrow Transplantation Service. In his laboratory, he studies novel strategies to improve immune therapies for cancer patients with a special emphasis on the role of the intestinal microbiome, Chimeric Antigen Receptor T cell therapy, and regeneration of thymic function to improve T cell immunity. He has been elected to the American Society for Clinical Investigation, the Association of American Physicians and the Royal Netherlands Academy of Arts and Sciences as a Foreign Member of Medical, Biomedical and Health Sciences.
