Costa Rica

WCO Data Model Implementation

Juan Diego Chavarría | Single Window Analyst

Foreign Trade Single Window

Law 7638, Article 8 Clause C

Centralization, agility and simplification.

Collaboration with public institutions.

Located in strategic geographic areas.

Peñas Blancas

Aeropuerto

Puerto Caldera

Limón

Pasc

Features VUCE 2.0

Digital signature

Electronic payment

Automatic approval

161 Total processes

Working with more than 16 public institutions

Interoperabilty

National

Phytosanitary, zoosanitary, health, among others

Regional

SIECA – The Secretariat for Central American Economic Integration

PDCC – Central American Platform for Digital Commerce

International

E-Phyto/Traces

Data harmonization (steps)

1- Recommendation from WCO to Costa Rica

2- Understanding the WCO Data Model through a consulting work by Alejandro Rinaldi, for guidance in the WCO Data Model.

3- Mapping of each element of each process through the mapping tool "Customs Hub" to form the MyIp VUCE.

4- Participation in the 60th DMPT in April with 11 DMRs.

5- Currently completing the mapping of all the processes to complete the MyIp.

Challenges

1- The "Single Declaration" project.

2- Learning and understanding the WCO Data Model.

3- Resources for its implementation (technical, monetary etc...).

4- Customs implementation.

Acceptance

Internal – Public agencies

As a strategical and visionary work for the future, especially regarding interoperability of the Single Window and Customs.

External – Private sector

Opportunity of transmitting data through API interaction with their internal systems to the Single Window facilitated by the WCO Data Model.

¡Thank you!
