7th International Symposium on
Meniere's Disease
 and **Inner Ear Disorders**
 ROME ITALY October 17 -20 . 2015

Dear Colleagues, dear Friends,

It is a great pleasure and honour for me to welcome all of you to the Seventh International Symposium on Meniere's Disease and Inner Ear Disorders that will take place in Rome, Italy, from the 17th to the 20th of October, 2015.

This is the second time that this Symposium is held in Italy, and more specifically in Rome, after the 1993 Edition chaired by my mentor, professor Roberto Filipo. So, twenty-two years later, all the major experts of this fascinating speciality will gather again in the special magical atmosphere of the Eternal City to exchange opinions, discuss old data and propose new enlightening ideas.

Thanks to your active participation, this Symposium will hopefully offer high-quality scientific contents in the form of keynote lectures, invited speeches, round tables and posters, as well as social activities during which old friends will meet once more and new friendships and co-operations will develop.

This Symposium will also be highly technological and interactive with a dedicated App available for all the delegates during and after the Symposium, giving the possibility to listen to missed presentations, to post questions to the speakers or to poster presenters, and more.

I hope the Symposium will fulfil the expectations that motivated more than 500 delegates to be present, in terms of scientific information to take home and spread within each local Otologic community. In simple words: a scientific event that was worthwhile!

Thank you for being here.
