

UESI and you get involved

On December 7th 2018 we had our initial meeting to get the UESI GTA Ontario Canada Chapter moving forward. As a member of the UESI community that we all are it is to our advantage to work together to elevate the name and awareness of Utility Engineering. We all are professional practitioners in this industry and working together to establish the high quality and raise the bar for all firms and clients involved the utility industry.

The meeting was held at the New T2 Utility Engineers Office in Whitby Ontario. Blaine and Juan the co-chairs will provide an update of the events and the ongoing of the Ontario UESI Chapter.

We should be collectively proud to support and take the lead in the opening of the UESI GTA-Ontario Chapter. The Utility Engineering & Surveying Institute (UESI) offers professionals working within the utility, pipeline engineering, and surveying/geomatics communities the opportunity to network with others and shape the future of the industry by participating in technical activities, conferences, and the development of internationally recognized standards.

We look forward to working alongside UESI – ASCE and the associated firms that provide Utility Engineering.
