EIP-AHA: ACTIONS TOWARDS GOVERNANCE OF INTEROPERABLE SPECIFICATIONS

European Innovation Partnership Track 5

Follow us  @eHealthWeekEU #eHW15

Wrap-up

- Health and well-being together
- Use case approach to define profiles is effective (Karima Bourquard)
- Open sustainable platforms (Florian Visser)
- Need to have platform interoperability (Reiner Wichert)
- Continua design guidelines (Horst Merckle)
- IHE as a model? IEC technical working group?

Q&A

- How to kickstart interoperability - stronger policies?
- Platforms must be associated with business models for sustainability
- User friendliness – and accessibility
 - Opportunity for new business
 - Again take the use case approach / living labs are also good instruments
 - Where is the pressure from the market on that?

The way to go

- Exchanging data / not solved yet
- User needs must be central
- Governance and ownership management?
 - Cannot be just the industry (conflict of interest)
 - EIP AHA alliance based on IHE experience?
 - Link with ISO/IEC-AAL working group ?
- Not discussed: Making available interoperability specifications
 - Publishing in market place
 - Maintaining

Actions for next year (not showed)

- identity common use case within EIP
 - Identifying community
 - Use case declaration of interest
 - Cooperation agreement within common use case community (research projects, industry projects...)
- Define interoperability specification process
 - Spec / Test / Validation /
 - Consensus scheme
- Define with EC and EIP alliance scheme

THANK YOU
