

Bioengineering in Ireland²¹

16th - 17th January 2015
Carton House, Maynooth

Dr Conor Hanley

DR CONOR HANLEY is Senior Vice President, Chronic Disease Management, ResMed Inc.

Within ResMed, Conor has previously managed ResMed's cardiology business unit and its Ventures and Initiatives Business unit.

Prior to ResMed, Conor was a co-founder and CEO of BiancaMed a company that spun-out of University College Dublin and was headquartered at NovaUCD, the Centre for New Ventures and Entrepreneurs, to commercialise a novel, non-contact method to monitor sleep and breathing in the home for consumer and medical applications. ResMed Inc acquired BiancaMed in July 2011 which was renamed as ResMed Sensor Technologies Ltd which is now based at NexusUCD, the Industry Partnership Centre.

Prior to BiancaMed, Conor led business development efforts in Europe for hydrogen and fuel cells for Air Products and led the global technology licensing programme and the North American consumer electronics distribution network at NTERA, a printed electronics provider.

Conor holds a PhD in Chemical Engineering from the University of Pennsylvania, BEng from University College Dublin and an MBA from INSEAD.
