

AI and Cloud : Taking Trade and Logistics to a New Stage

Nov. 1st
Takayuki Kida
NTT DATA Corporation

Agenda

- I. Overview and Experience of NTTDATA
- II. AI Based Risk Management Solution
- III. B to B Trade Cloud

Overview and Experience of NTTDATA

Fact Figure of NTT DATA (as of March 31, FY17)

ESTABLISHED BY GOVERNMENT

- Part of NTT Group: the largest telecommunications provider in Japan
- **Originally a public company**, privatized in 1985

GLOBAL TOP 9 SYSTEM INTEGRATOR

- The largest System Integrator in Japan
- **Global Top 9** System Integrators

Sales Figure and Financial Situation

Net Sales

USD **15.4** billion

Operating Income

USD **1.0** billion

Total Assets

USD **19.9** billion

(1USD=112JPY)

Our Experience in Asia

Japan (NACCS)

39 years since 1978

1978 Customs clearance system started
1991 Risk management system started
1997 Single Window started

The most Cutting-Edge System in the world

Leveraging expertise gained in Japan

1. Vietnam (VNACCS)

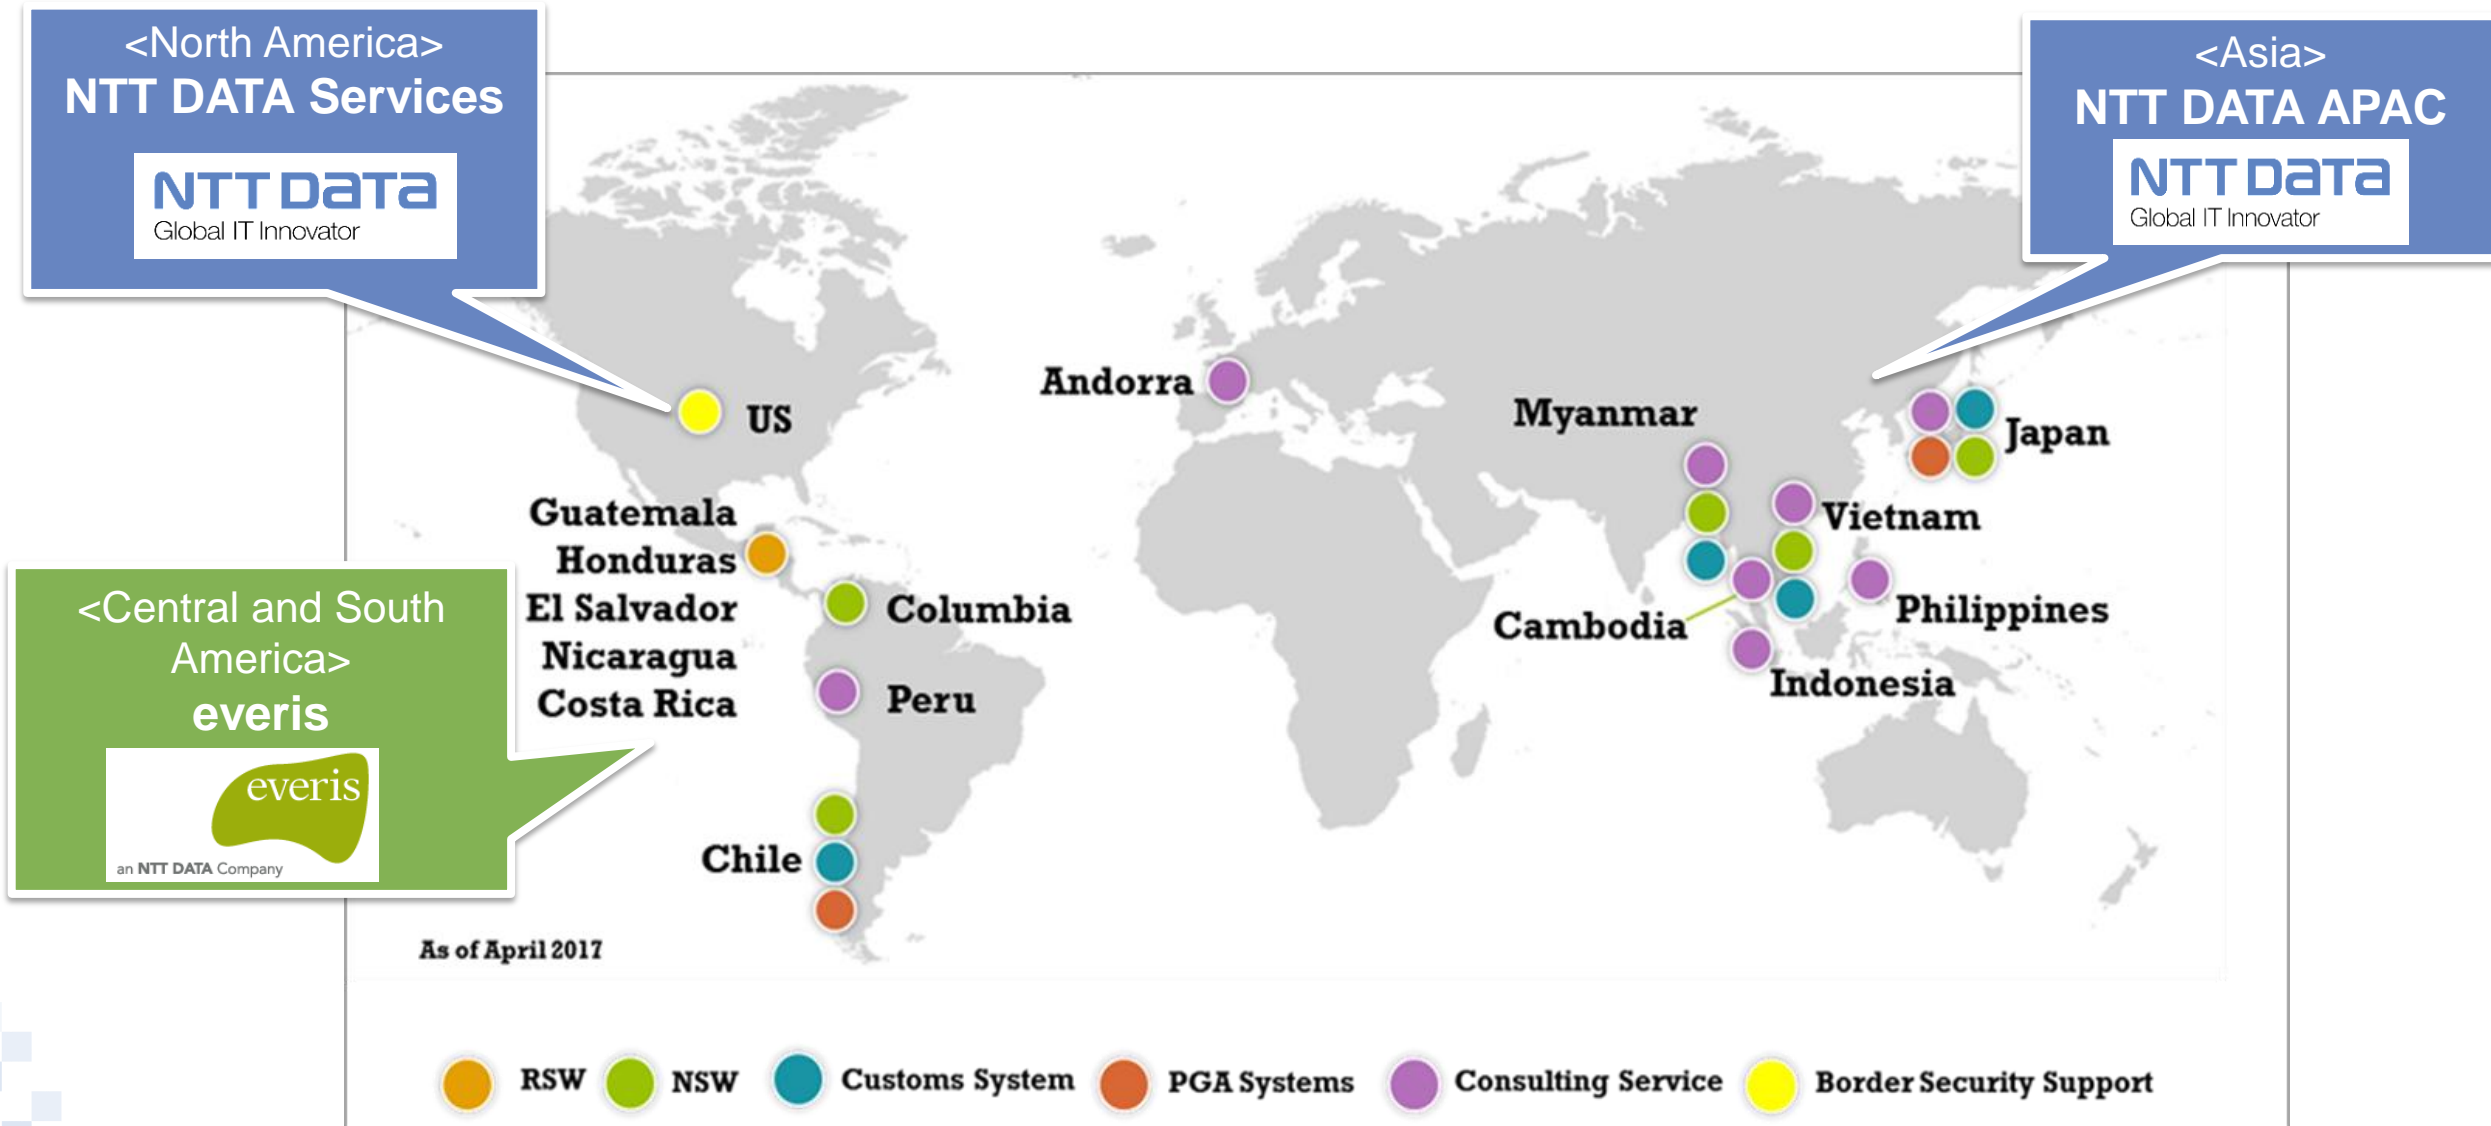

April, 2014 –

2. Myanmar (MACCS)

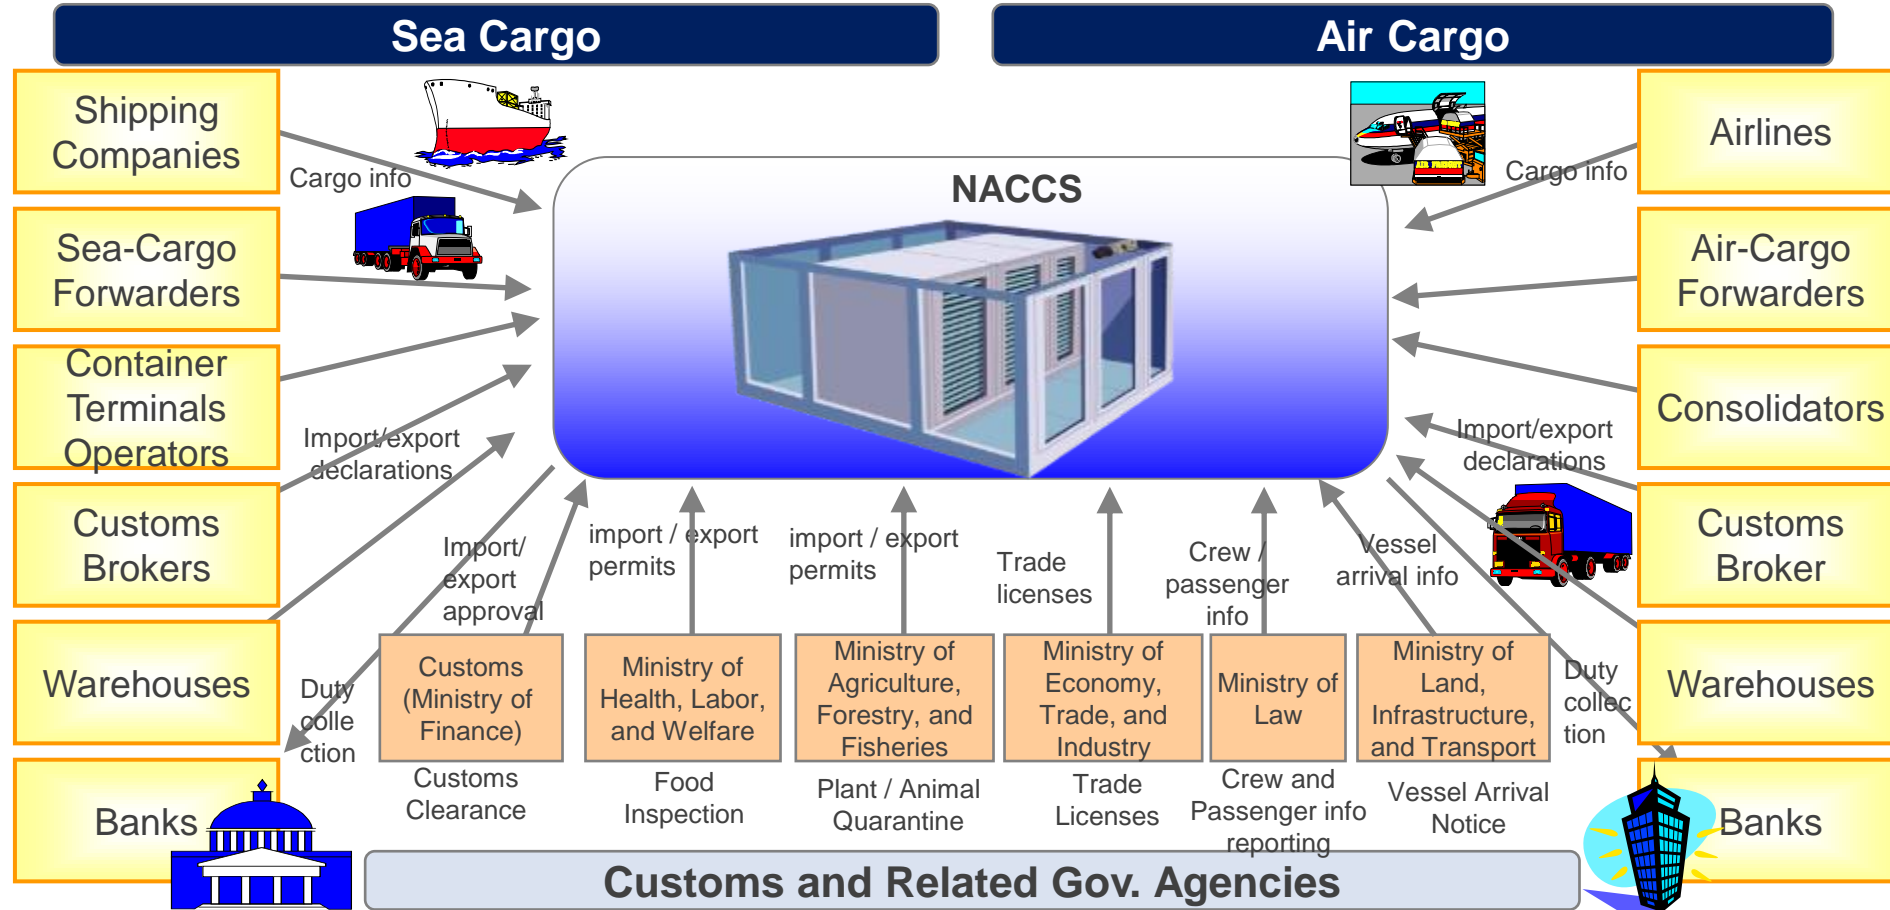

Nov, 2016 –

Our Global Coverage in Customs and Trade

Our Experience: NACCS

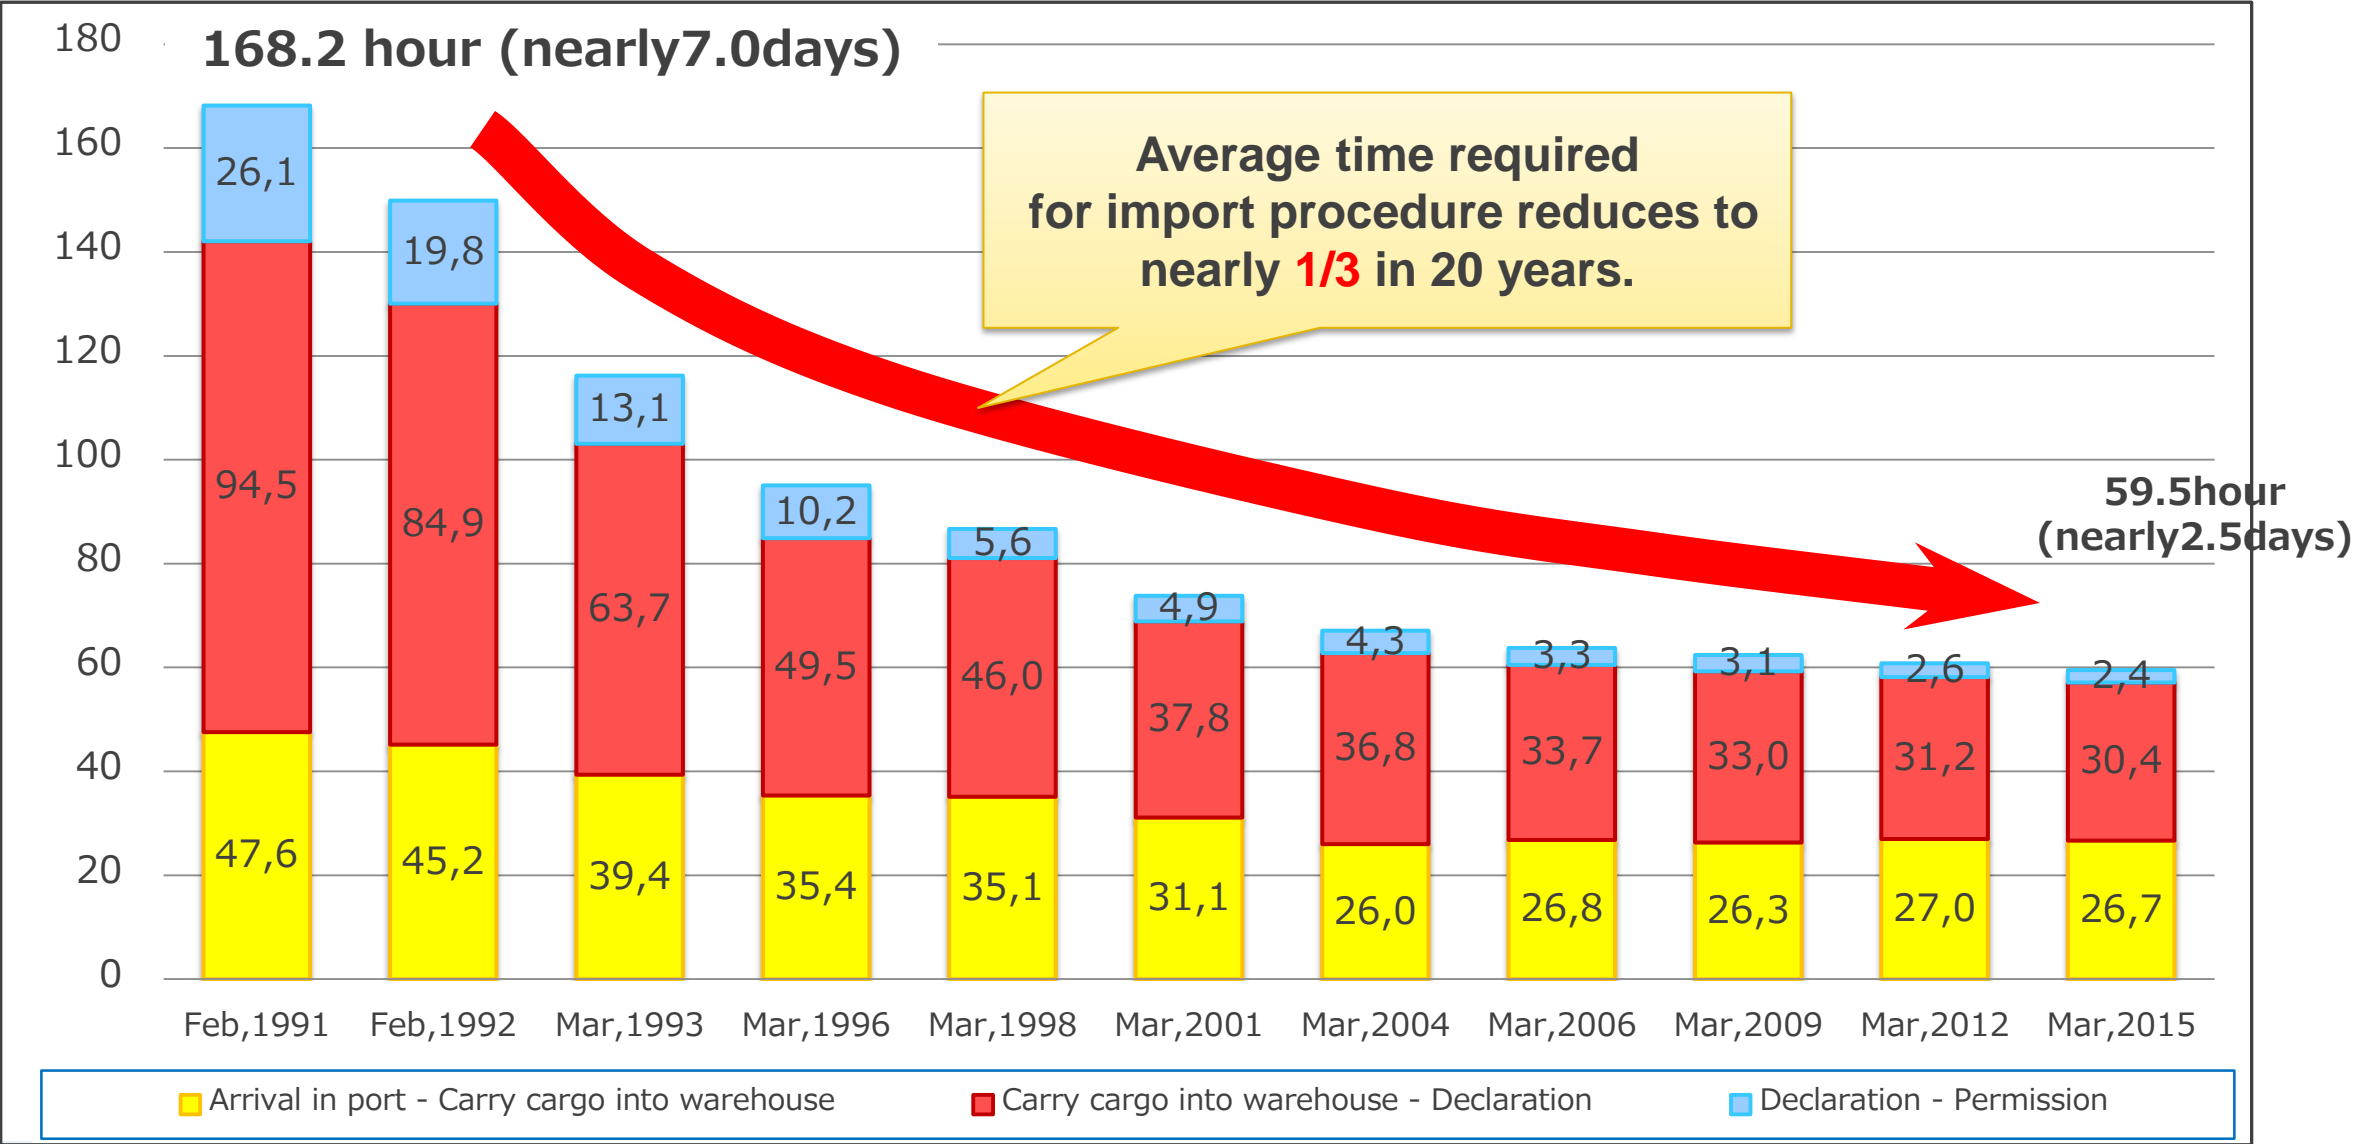

Fully Automated

Public and Private
use jointly

Single Window

99.99% Availability
24h 365d operation

Benefit of NACCS

Today's Topics

Recent Trend

Increase Significance of Risk Management

Needs: More efficient risk management process and more accurate risk detection

Facilitation in total process of trade

Needs: Easy and streamline communication within private users

NTT DATA's New Solutions

For Governments

AI Based Risk Management

For Private Sectors

B to B Trade Cloud

AI Based Risk Management Solution

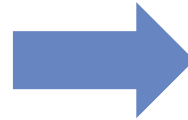

1. Challenges of Customs Officers in Risk Management

Environment Surrounding Customs

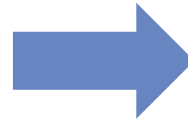

Increase of terrorism

Increase of cargo due to E-commerce

Increase burden of Customs Officers

Challenges of Customs Officers

Strengthen Enforcement on suspicious/dangerous goods

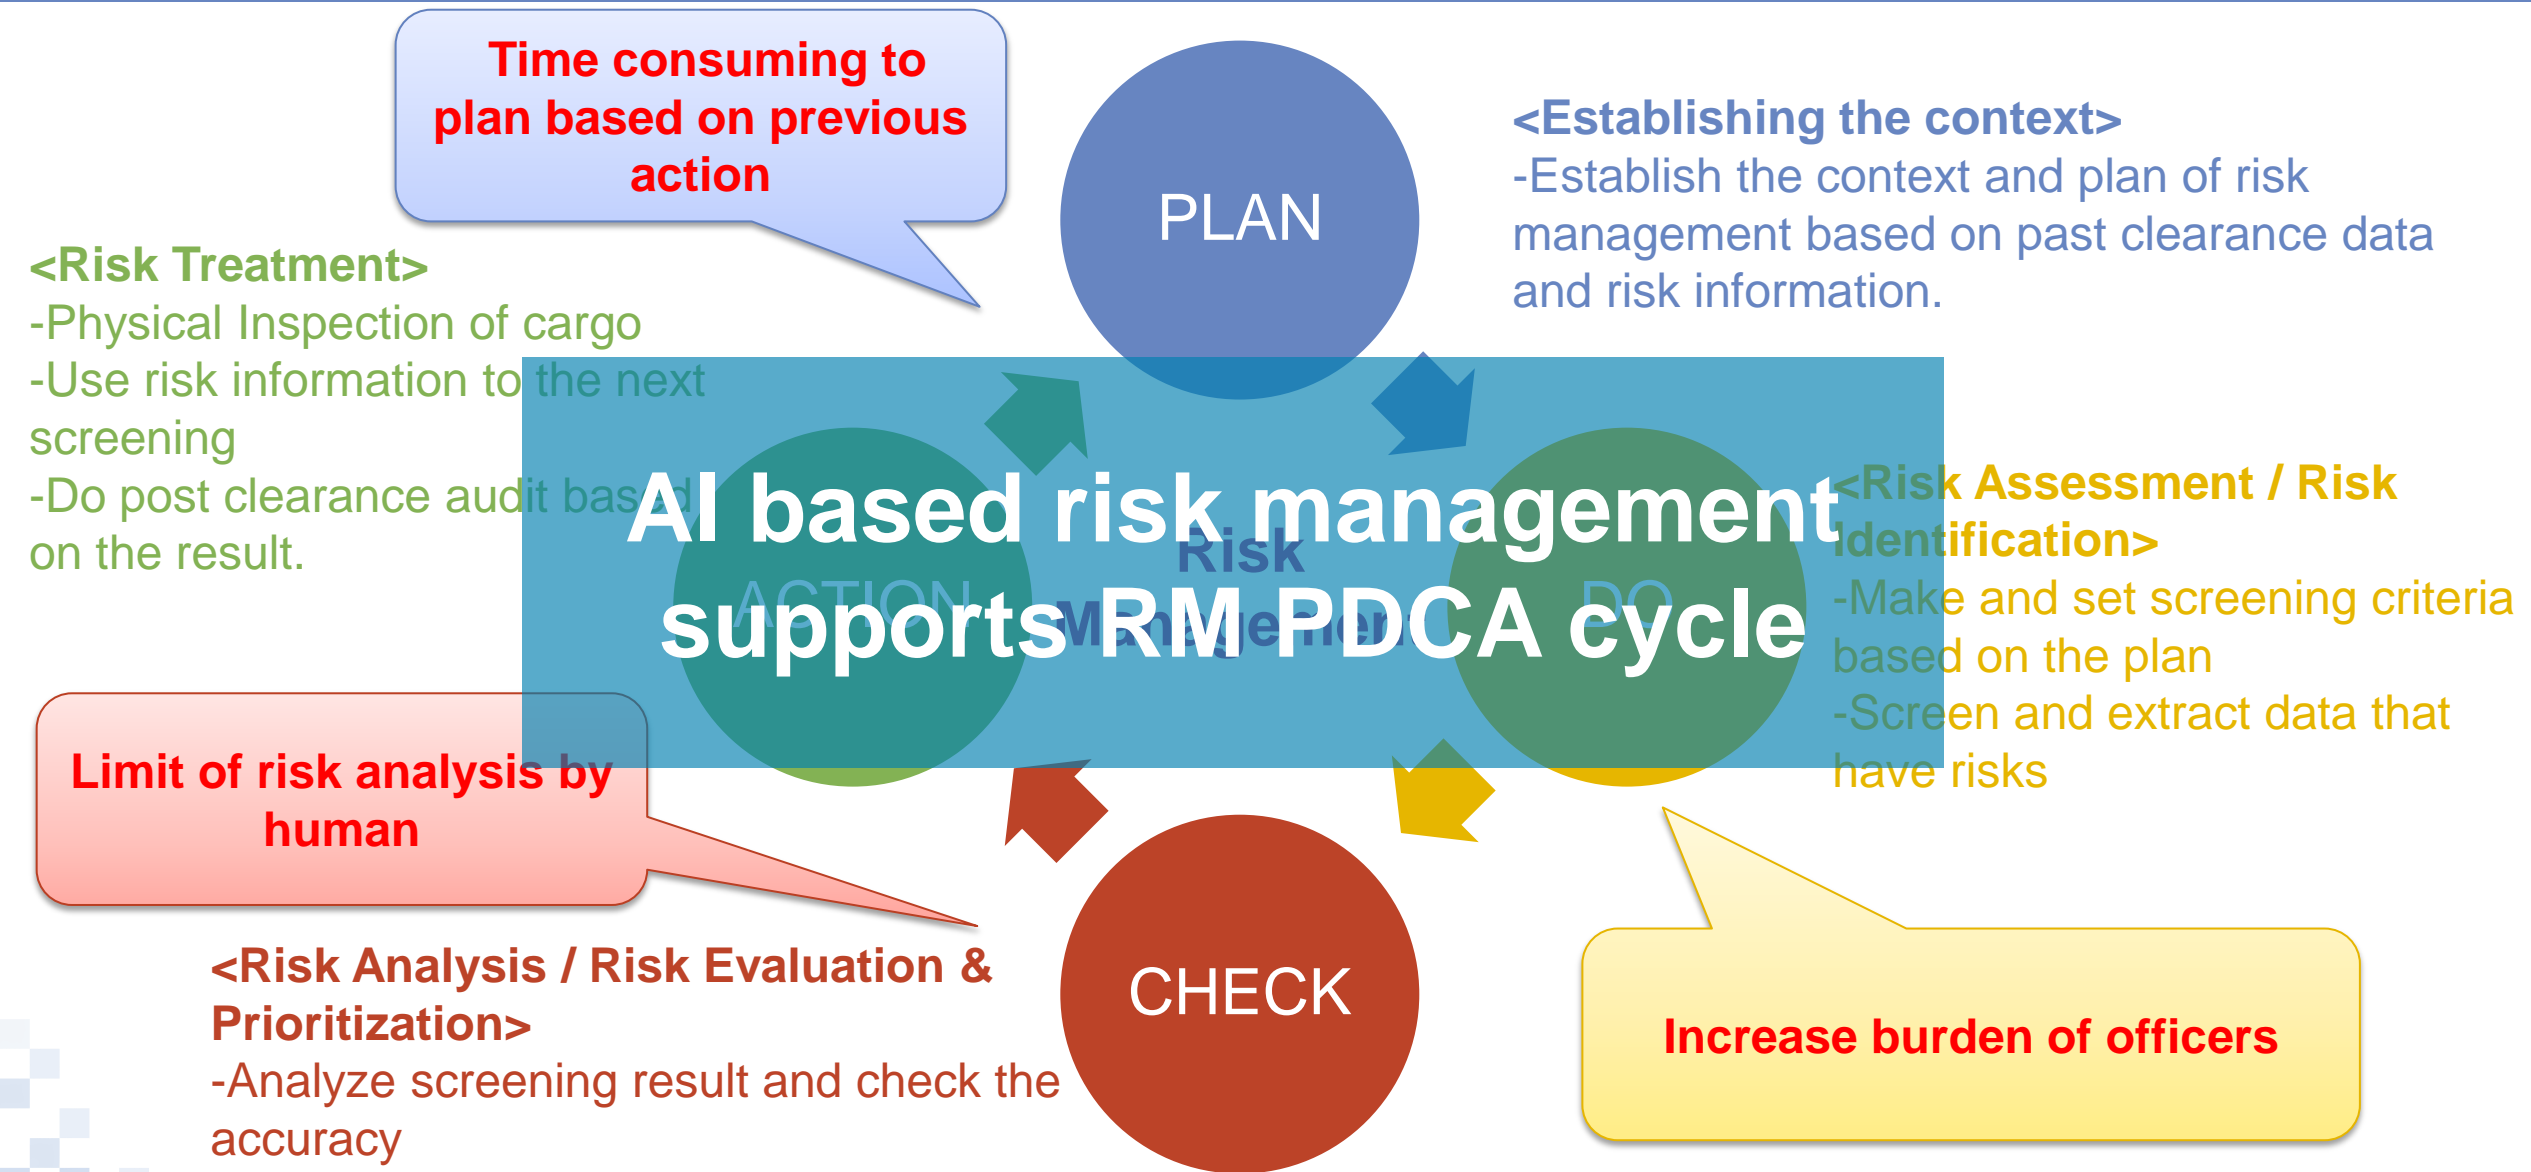

Increase efficiency of Customs Clearance

Expand know-how of officers

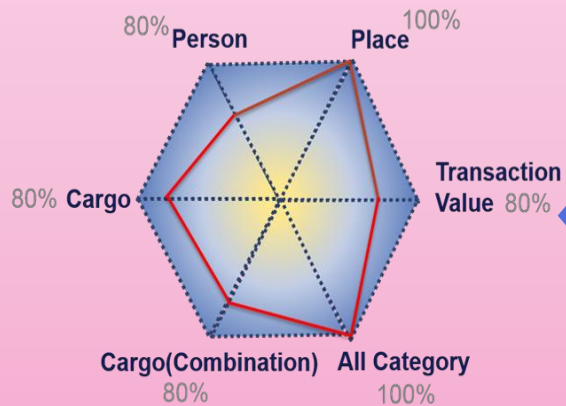

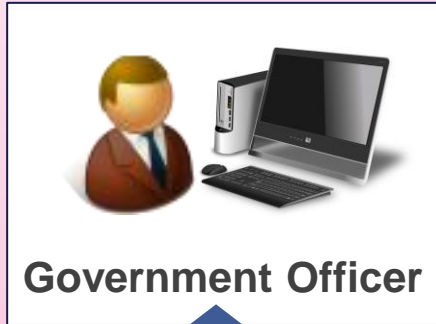

Need to deal with these challenges immediately otherwise...

- Inflow illegal goods into the country
- Increase time and cost in customs clearance
- Missing collection of customs duties
- Further Increase of burden

2. NTT DATA's Approach for the efficient and accurate Risk Management

5 Suggest risks by Category

1 Send Clearance Result from Clearance system

6 Register Screening Result

Machine Learning

2 Update Database

Risk Management Database

3 Generate Models

Screening Result

4 Screening & Selectivity by AI

7 Risk Analysis

Screen Image 1: Screening of new declaration

Answer
Green/Yellow/Red

Suggest risks by radar
chart, by category

Screen Image 2: Risk Analysis

By period (Complete declaration)

nttdata

Specify the period for past data.

2017-01-01 - 2017-03-31

Specify the channel for past data.

☐ Red

☐ Yellow

☒ Green

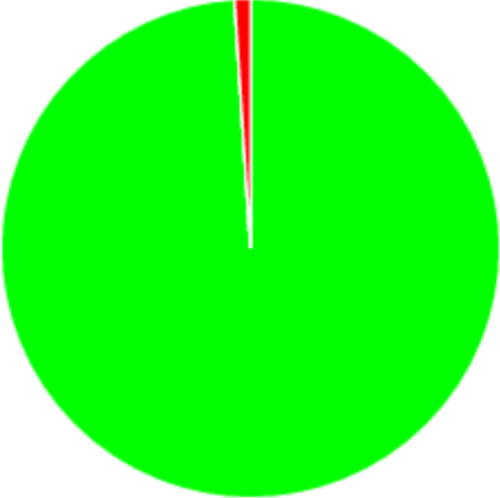

EXECUTE

Selectivity Result By AI Between 2017-01-01 and 2017-03-31 for Green Channel

Green

Yellow

Red

Specify the period for past data and the selectivity channel **by Rule**

From all the target data, **AI engine** routed some to **Red and Yellow**

Screen Image 2: Risk Analysis

List of selectivity result - Page 1

Green Result between 2017-01-01 and 2017-03-31 for Target Data of Red Channel

GREEN		YELLOW		RED	
Previous 1 Next					
Declaration No.	By Human	By AI	Green	Yellow	Red
20000369750	No problem	Red	<div><div>39.3</div></div>	<div><div>0.33</div></div>	<div><div>60.36</div></div>
20000388150	No problem	Red	<div><div>0</div></div>	<div><div>53</div></div>	<div><div>60</div></div>
20000396950	No problem	Red	<div><div>1.67</div></div>	<div><div>38.33</div></div>	<div><div>60</div></div>

20000404150	No problem	Red	<div><div>19.12</div></div>	<div><div>26.33</div></div>	<div><div>54.55</div></div>
20000410550	No problem	Red	<div><div>0</div></div>	<div><div>15.67</div></div>	<div><div>88.73</div></div>
20000416950	No problem	Red	<div><div>40.46</div></div>	<div><div>5</div></div>	<div><div>54.55</div></div>

Previous 1 Next

Risk probability of each declaration

4. Benefit of our Solution

**Show risk suggestion
graphically by category**

**Screening engine that
officers can know its
cause of decision**

**Specific screening
points are weighted and
can customized**

**Governments can keep
security and
confidential data within
the country**

**Can integrate with
existing customs
system**

**Can start from POC
using the real data**

AI X-ray Image Detection Solution

Declaration

Screening

Inspection

Clearance

High-speed, high-precision image recognition
with deep learning AI contributes to reducing inspection time
by efficiently detecting disparity from X-ray images

Image recognition during X-ray
inspection
Detect efficiently by AI

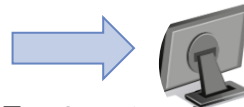

TO-BE

AI X-ray Image Detection

AS-IS

Check the
contents visually

Customs Officers

目視によるチェック

Check detection result by AI

By extracting local features of images by deep learning,
it is possible to detect objects at high speed and with
high accuracy

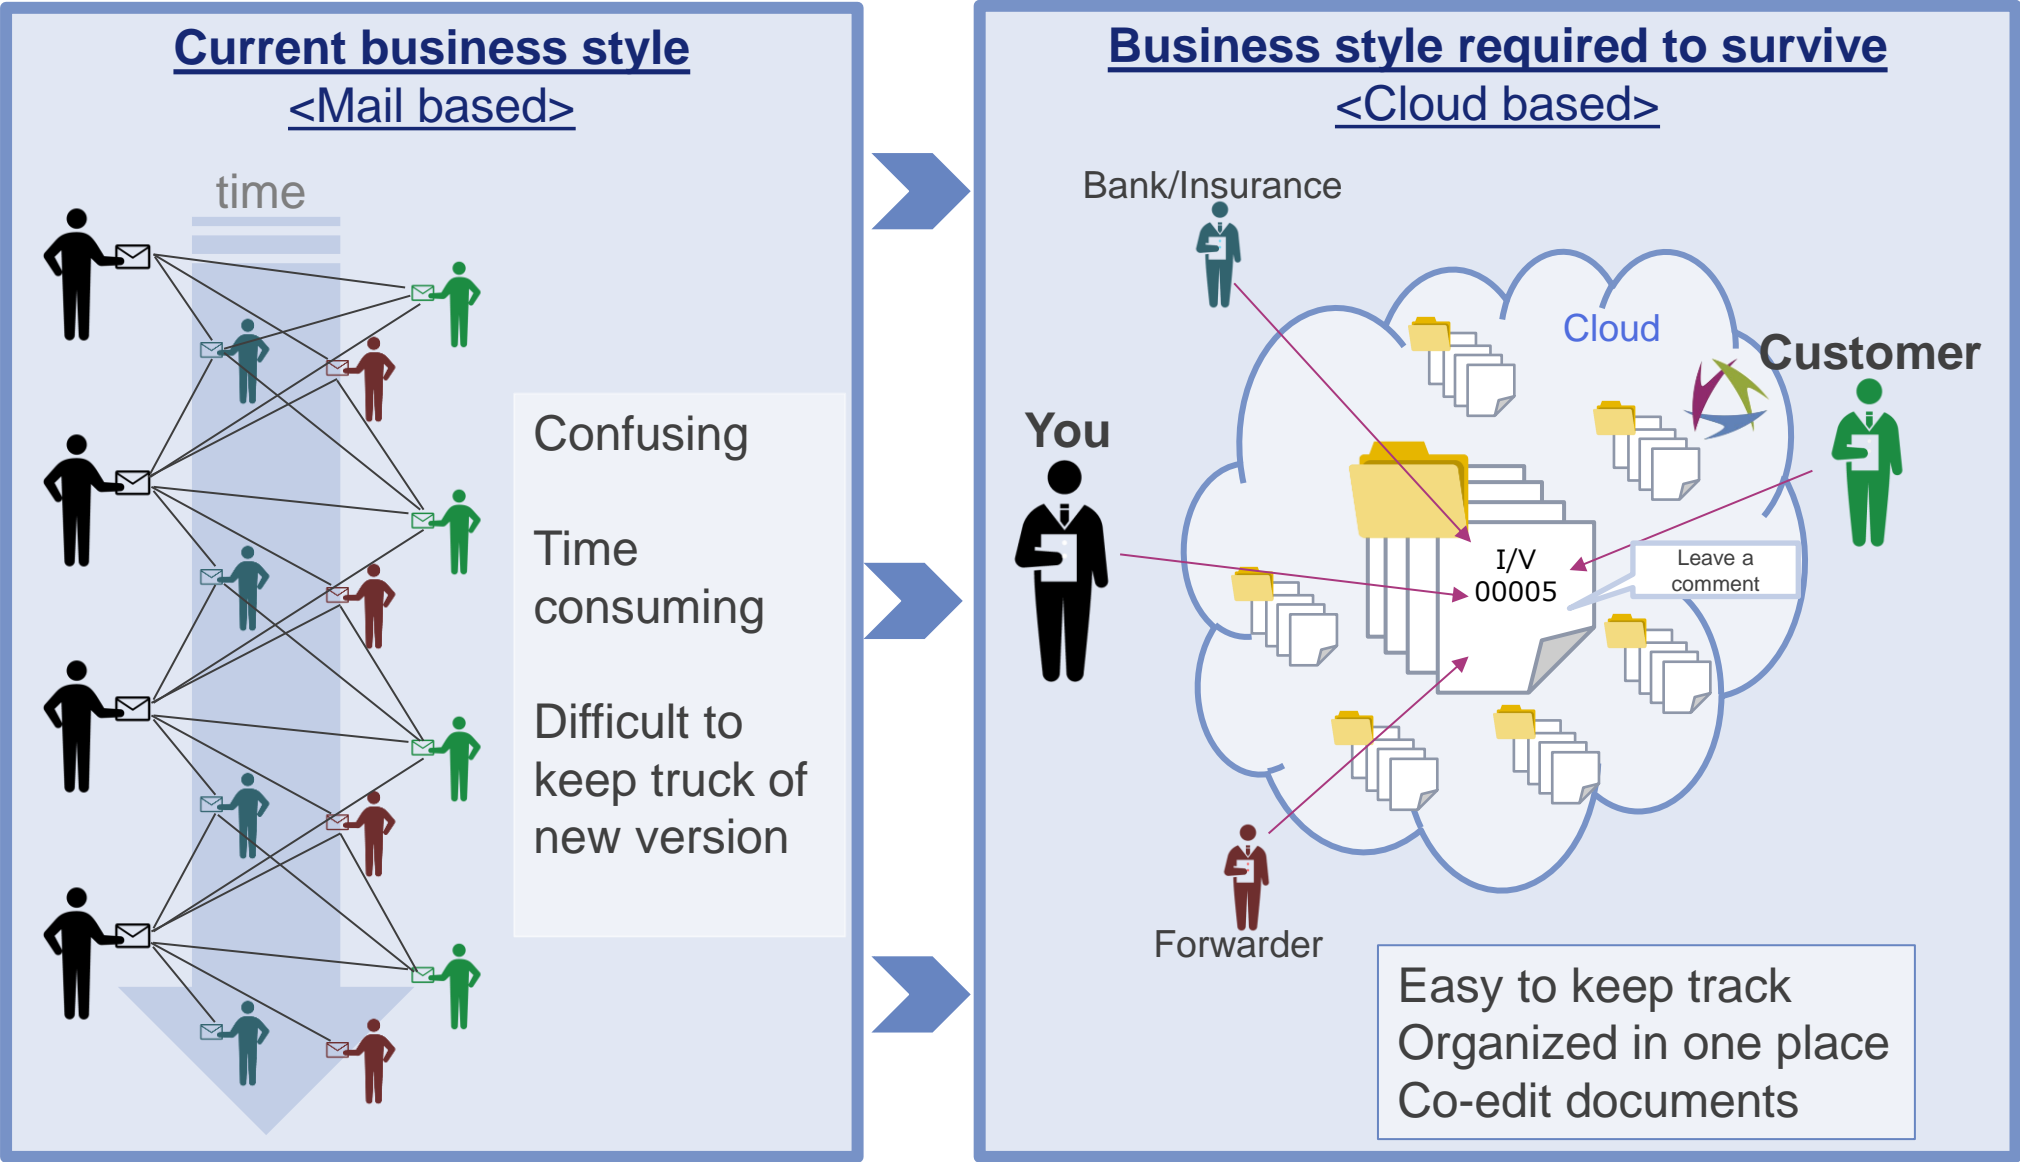

B to B Trade Cloud

For advanced logistics management and communication

- 1. Open platform strategy: Tracking*
- 2. Government to Government connection*

B2B TradeCloud: Trade document sharing platform on CLOUD

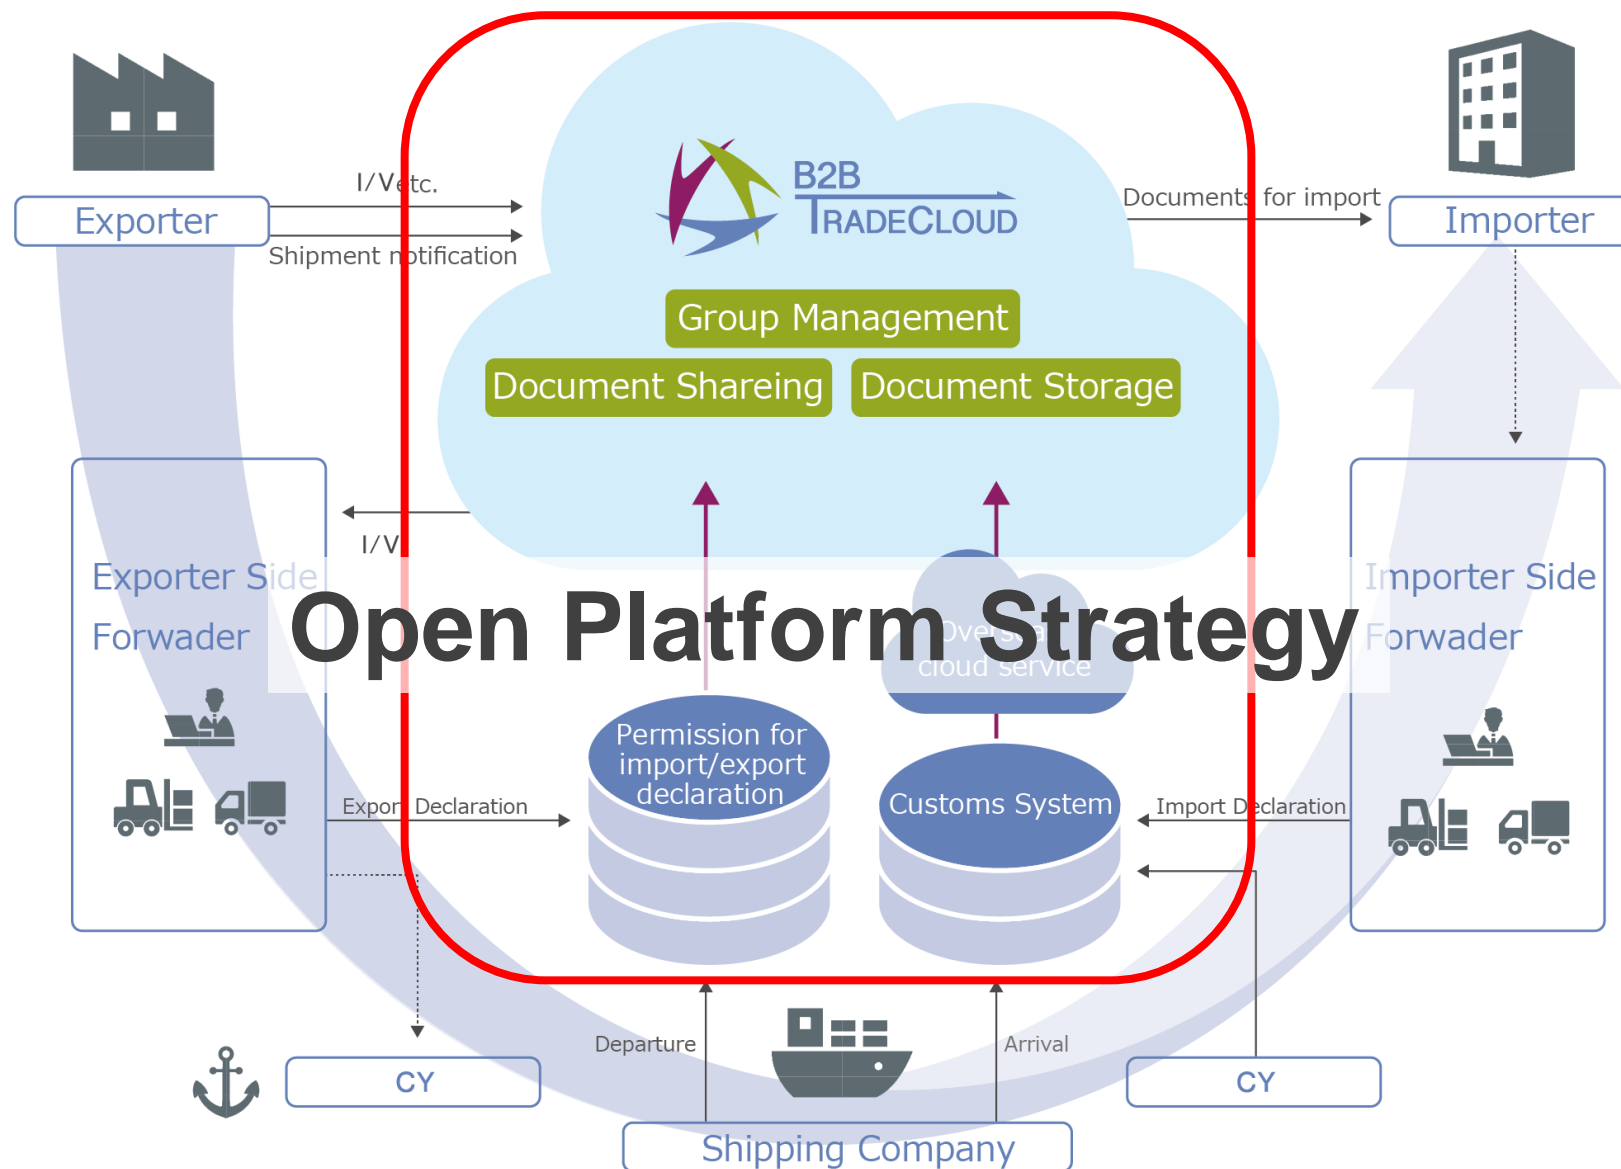

Security

Efficiency

History

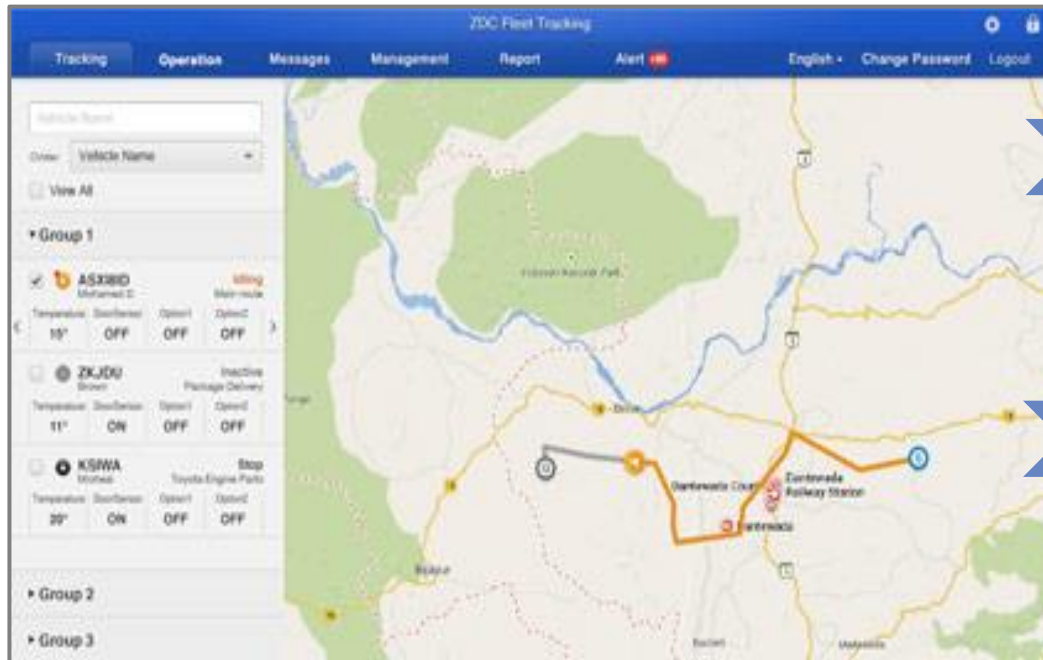

Audit

B2B TradeCloud: Open platform

Strengthen trade operation by IoT

B2B TradeCloud is a cloud service which supports the management of information (logical) and tracking information(physical) across borders.

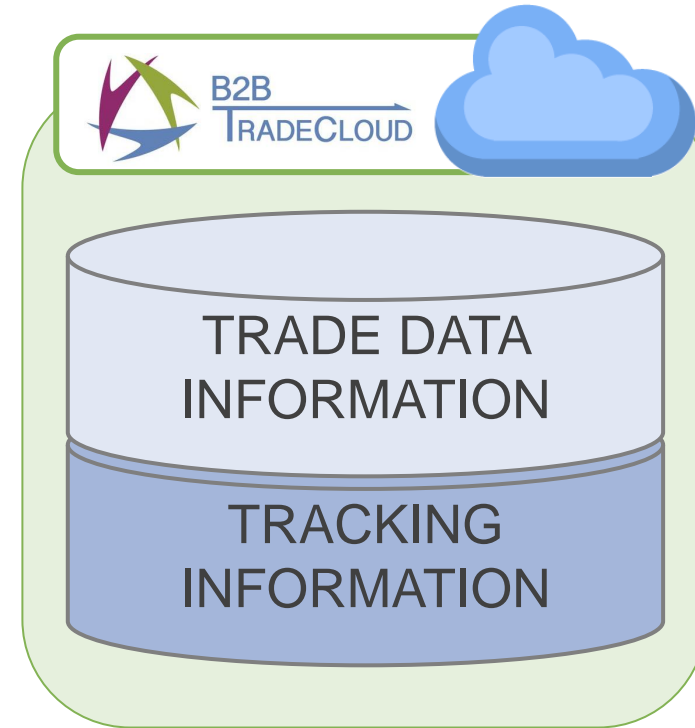

➤ 1. Performance

- Time & Location

➤ 2. Alert

- Irregular action

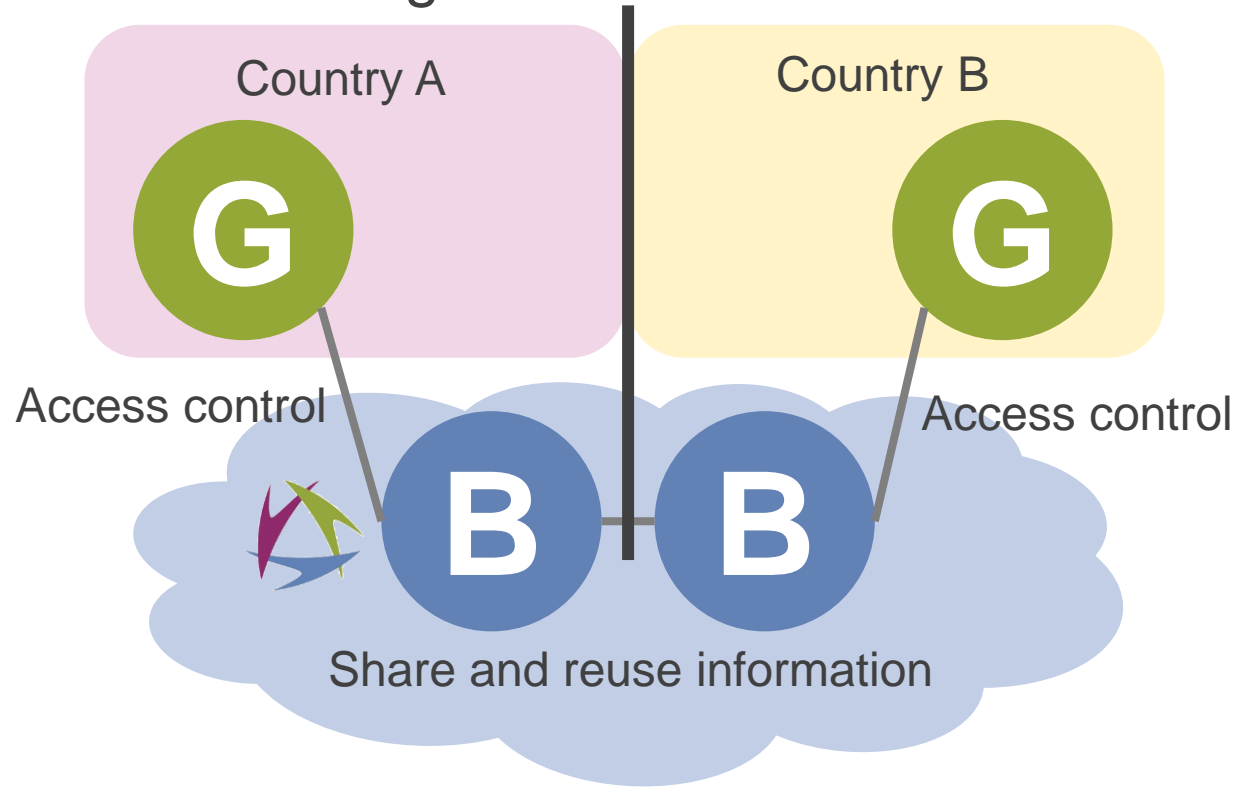

Benefits

- Concrete performance analysis and afford sheer improvement cycle
- Quick response to irregular case with clear view of document & delivery

Combination of G-B-B-G

The following formation of G-B-B-G will also enable efficient use of trade information.

Benefits

- Efficient use of information speeds up the operation
- Less mistakes in documents

B2B support transmitting necessary information between G-G

Thank you for your attention.
